Designing, Selecting, Implementing and Using APS Systems Vincent C. S. Wiers,A. (Ton) G. de Kok,2017-11-08 Commercial advanced planning and scheduling (APS) systems have been around for about 25 years and have seen widespread adoption in a variety of companies. The promises made by APS system implementations are high, and at the same time, APS projects are complex, costly, and carry a significant risk of failure. There is a great need for guidance on how to successfully implement APS systems, which is why this book was written. In this book, we aim to discuss all facets of APS implementation, from theoretical background to definition, vendor selection, system design and the implementation process. In addition, this book helps readers understand how the underlying concepts were formed, why a concept will work in practice, and when it will not. The contents of this book are based on many years of academic research and APS implementation experience. It draws together theory and practice in production control and explains how theories can be applied to support planning and scheduling processes in practice. This book will help anyone involved in APS implementations to achieve success: human planners generate better plans than before, using the APS.

Positive Options for Antiphospholipid Syndrome (APS) Triona Holden,2003-08-01 This book contains information on an increasingly common autoimmune disorder. Also called sticky blood and Hughes Syndrome, APS makes one's blood clot too easily, creating high risk of stroke, thrombosis, and premature heart attack. It is also implicated in many other health problems including repeated miscarriages, neurological problems, early dementia and migraines. It is often associated with lupus, and mimics the symptoms of other diseases, including MS. Symptoms include; migraines and headaches, recurrent miscarriage, memory loss, slurred speech, blood clots, poor circulation, muscle pain and cramps, blurred vision, extreme fatigue, epilepsy, strokes, thrombosis and a form of angina. Because of lack of knowledge of APS in the medical establishment, sufferers are often misdiagnosed with MS or other more life-threatening conditions. This book helps the reader identify the symptoms and provides important information on diagnosis and treatment of APS. It contains many moving stories, explaining how people eventually got a diagnosis, their symptoms, the impact of APS on their lives and whether or not treatment has worked. Written in collaboration with Dr. Graham Hughes, the major researcher of APS in the UK, this book provides a clearly written informative look at an important but little-known disease.

Accelerated Predictive Stability (APS) Fenghe Qiu,Garry Scrivens,2018-06-28 Accelerated Predictive Stability (APS): Fundamentals and Pharmaceutical Industry Practices provides coverage of both the fundamental principles and pharmaceutical industry applications of the APS approach. Fundamental chapters explain the scientific basis of the APS approach, while case study chapters from many innovative pharmaceutical companies provide a thorough overview of the current status of APS applications in the pharmaceutical industry. In addition, up-to-date experiences in utilizing APS data for regulatory submissions in many regions and countries highlight the potential of APS in support of registration stability testing for certain regulatory submissions. This book provides high level strategies for the successful implementation of APS in a pharmaceutical company. It offers scientists and regulators a comprehensive resource on how the pharmaceutical industry can enhance their understanding of a product's stability and predict drug expiry more accurately and quickly. Provides a comprehensive, one-stop-shop resource for accelerated predictive stability (APS) Presents the scientific basis of different APS models Includes the applications and utilities of APS that are demonstrated through numerous case studies Covers up-to-date regulatory experience

Antiphospholipid Syndrome Doruk Erkan,Silvia S. Pierangeli,2012-05-19 The International Congress on Antiphospholipid Antibodies is held every three years to discuss the recent advances and future directions in Antiphospholipid Syndrome (APS). This volume collects the scientific highlights and new findings about APS that were generated from the most recent 13th Congress, held in Galveston, Texas in 2010. Chapters were written by an internationally-distinguished group of scientists from the point-of-view of multiple specialty areas. Each chapter was written in a uniform and systematic basis to present the latest evidence-based research, including the basic science of APS, task force reports from the Congress on controversial aspects of APS, and future directions of APS research. This book will appeal to all clinicians involved in the treatment and management of APS patients, to residents in a variety of medical subspecialties, and to research scientists interested in a better understanding of this complex and evolving disease.

Antiphospholipid Syndrome Doruk Erkan,Michael D. Lockshin,2017-06-09 This new edition is a comprehensive and updated resource on antiphospholipid syndrome (APS), which is an autoimmune disorder. In APS, the body recognizes certain normal components of blood and/or cell membranes as foreign substances and produces antibodies (antiphospholipid antibodies) against them. APS is associated with recurrent clotting events (thrombosis) including premature stroke, repeated miscarriages, phlebitis, venous thrombosis, and pulmonary thromboembolism. It is also associated with low platelet or blood elements that prevent bleeding. Recently, however, even more disease states have been linked with APS, including premature heart attack, various cardiac valvular abnormalities, skin lesions, kidney disease, abnormal involuntary movement/chorea, diseases that mimic multiple sclerosis, and vascular diseases of the eye that can lead to visual loss and blindness. The International Congress on Antiphospholipid Antibodies, held every 3 years, is the venue where representatives from different disciplines gather to discuss the recent advances in APS. The conference intends to cover basic aspects of APS, such as pathogenesis, origins, genetics, intracellular and molecular events, the role of infections, as well as traditional and non-traditional clinical manifestations associated with antiphospholipid antibodies. The 15th Congress took place in September 2016. A novel aspect of the Congress was that multiple teams, chaired by Scientific Planning Committee members, used evidence-based literature reviews and expert discussions to answer specific pre-defined APS-related questions. These teams included points of view from experts in rheumatology, hematology, cardiovascular medicine, obstetrics, neurology, and immunology. The Scientific Planning Committee members also chaired the congress sessions and supervised completion of the reports that are the bases of the chapters of this book. In addition, there are two chapters included specifically written for APS patients. Much like the previous volume, dedicated to the 13th International Congress on Antiphospholipid Antibodies (April 2010), this up-to-date and comprehensive work gathers invaluable insights from a multidisciplinary team of world-renowned experts and represents the authoritative resource on causes, symptoms, diagnosis, and treatment of APS.

Army Prepositioned Operations Department Army,2008-07-01 This manual establishes the doctrinal framework for the Army prepositioned stocks (APS) program. It describes the missions, duties, and responsibilities of all parties involved in moving APS to an operational area and handing it off to designated Army units. This manual supersedes Field Manual (FM) 100-17-1 and FM 100-17-2.The changing world environment has led to significant changes in how the Army structures its forces. No single solution will succeed when confronting an adaptive adversary. The Army must retain a wide range of capabilities while significantly improving its

agility and versatility. Building a joint and expeditionary Army will require versatile forces that can execute smaller, shorter duration operations without degrading its traditional role in a major combat operation. At the core of this philosophy is having the ability to rapidly project predominately continental United States (CONUS)-based forces to an area of operations (AO), requiring the involvement of numerous military Services, agencies, departments, and organizations. Its credibility depends on the capability to deploy, in a timely manner, an appropriate military force capable of accomplishing the mission. The APS program is a cornerstone of the Army's ability to rapidly project power. The Army has dedicated significant priorities and resources to ensure the readiness and availability of APS. APS has become a significant deterrent for potential enemies in recent contingencies. These stocks-identified as APS-1 (CONUS), APS-2 (Europe), APS-3 (Afloat), APS-4 (Northeast Asia), and APS-5 (Southwest Asia)-are available to support all combatant commanders' (CCDR) missions, not only in contingencies, but also for major exercises.

Hughes Syndrome Munther A Khamashta,2013-03-14 In 1983 Graham Hughes described a syndrome in which the blood has a tendency to clot. Hughes syndrome is at the root of diverse conditions such as stroke, leg vein thrombosis and recurrent abortion. Hughes Syndrome addresses the complete range of features produced by this common disorder, which is also known as antiphospholipid syndrome. The condition can affect any organ, and is treated using commonly available drugs including low-dose aspirin and warfarin. This timely book fulfils the need for a cross-disciplinary clinical textbook and contains contributions from the leading international authorities. Hughes Syndrome should be read by anyone who might have a clinical or scientific interest in this condition: rheumatologists, haematologists, obstetricians and neurologists.

Deceived from Within Darren Radke,2021-06-10 Ever wake up one day to see part of your body look out of the ordinary? Unusual swelling and discolored? Followed by tremendous chest pain that makes sleep impossible. A pain that ranks as a number ten on the pain scale. You have both a Deep Vein Thrombosis and a Pulmonary Embolism. Two blood clots. My whole life changed. Welcome to my story. What once was a thriving life, changed in a matter of years. Lost two jobs, unable to find the right Doctors to treat me. The lack of interest to do more. To help find answers. The shame and the depression they caused. How close I was to giving up. To move forward while ignoring my body. I no longer cared. After five long years, life changed. All I needed was a push in the right direction. Finding the right person to trust and provide guidance to find the answers. Her guidance helped me with a change in Doctors. New Doctors who were looking out for my best interests. Providing the answers for what ails me. Answers that would help me understand my health issues and how to move forward. I was diagnosed with both Antiphospholipid Syndrome and Lupus. Autoimmune disease I had no clue what they were or meant. 90% who have both Antiphospholipid Syndrome and Lupus are usually women! I'm amongst the 10 percenters, men living with both APS and Lupus. My book details when my life was changing for the better and eventually the worst. The challenges I continue to live with and how I live with those. My outlets that guide me through the tough times. And appreciating what life has to offer instead of living in the past.
