Status and Future of Large Marine Ecosystems of the Indian Ocean Ezekiel Okemwa,Micheni J. Ntiba,Kenneth Sherman,1995 This report signals a new approach to ocean monitoring and management that lays a solid base using the principles of ecology and sustainable development while transcending traditional geopolitical and disciplinary divisions. LMEs are relatively large regions, often including the territorial waters of more than one nation, thus making coordination of monitoring and management highly desirable.

Large Marine Ecosystems of the Indian Ocean Kenneth Sherman,Ezekiel N. Okemwa,Micheni J. Ntiba,2009-06-01 In this volume marine experts from countries of East Africa and southern Asia describe the conditions of marine resources of the large marine ecosystems of the Indian Ocean. Countries of the region represent over a quarter of the world's population, most of whom are existing at or below the poverty level. The potentials for economic growth through the development of coastal tourism, mariculture, fisheries, mineral extraction, and oil and gas production are examined by the authors in relation to the need for ensuring the long-term sustainability of marine resources. Case studies of resource assessments presented by several authors illustrate the magnitude of risk from continuing degradation of resources under the prevailing unmanaged conditions extending over much of coastal areas of East Africa and southern Asia. The authors explore the application of multidisciplinary ecosystem-based assessment and management strategies to the future economic development of the large marine ecosystems of the region. With the initiation of science-based management practices, the ecosystems of the area can provide an important source of economic growth, improved food security, and nutritional benefits to the populations of stakeholders in coastal areas bordering the Indian Ocean

Star Trek: Titan #5: Over a Torrent Sea Christopher L. Bennett,2009-02-24 As the Federation recovers from the devastating events of Star Trek: Destiny, Captain William Riker and the crew of the U.S.S. Titan are ordered to resume their deep-space assignment, reaffirming Starfleet's core principles of peaceful exploration. But even far from home on a mission of hope, the scars of the recent cataclysm remain with them as they slowly rebuild their lives. The planet Droplet is a world made mostly of water without a speck of solid ground. Life should not exist here, yet it thrives. Aili Lavena, Titan's aquatic navigator, spearheads the exploration of this mysterious world, facing the dangers of the vast, wild ocean. When one native species proves to be sentient, Lavena finds herself immersed in a delicate contact situation, and Riker is called away from Deanna Troi at a critical moment in their marriage. But when good intentions bring calamity, Lavena and Riker are cut off from the crew and feared lost. Troi must face a life-changing event without her husband, while the crew must brave the crushing pressures of the deep to undo the global chaos they have triggered. Stranded with her injured captain, Lavena must win the trust of the beings who control their fate -- but the price for Riker's survival may be the loss of everything he holds dear.

Evaluating and Monitoring the Health of Large-Scale Ecosystems David J. Rapport,Connie L. Gaudet,Peter Calow,2013-06-29 Ecosystem health offers a fresh perspective on the management of natural resources and the environment. While some of the root concepts can surely be traced back to Aldo Leopold and even earlier, it is only in the recent decade that a substantial body of work has emerged on this topic. There is no question that a novel approach which is by its nature cross disciplinary, bridging the health and biological sciences, will initially raise a number of questions particularly pertaining to the use of metaphors and the validity of the analogy. This volume however goes beyond merely the philosophical dimensions of the subject by covering a number of case studies which have given rise to the development of promising quantitative methods for diagnosis and rehabilitation of ecosystems under stress. The focus of most studies is on regional ecosystems i.e. ecosystems of large scale. As such, the methods and approaches should have wide appeal to government agencies charged with the responsibility of sustainable development of regional ecosystems and natural resources. Health is one of those difficult concepts that everyone thinks they can define, until they come to try. We all have personal knowledge about health and illness and this makes the ecosystem analogy so potentially powerful. Yet it is also clear that the uncritical application of the concept could lead to overly simplistic approaches to analysis and management of ecosystem health.

Life in the pristine bubble of the Greater Los Angeles District isn't as idyllic as the Central Protectorate wants its citizen to believe. Iris Flores and her friends are relegated to the edge of a society that has no use for them—until the day she is hunted down and forced to leave her home to spy on the enemy. The wayward son of Cascadian political royalty, Xander Kendrick is once again in trouble after pummeling a man in front of dozens of witnesses. When given the choice to serve his sentence in the Army instead of going to a maximum-security prison, he accepts the former. Little does he know that the military stint will set him on a collision course with danger... and Iris. As loss and betrayal destroy their lives, Iris and Xander will risk everything to save the people they love.

Box Wine Sailors Amy McCullough,2015-11-01 The true story of a young couple who quit their jobs and set sail for a year on the ocean with no boating experienceAmy and Jimmie were not sailors and their experience on the seas included reading a few books, watching a couple of instructional videos, and boating once a week each year. They were middle-class land-lubbers, audacious and in love, and all they wanted was to be together and do something extraordinary. The Box Wine Sailors tells the true story of a couple's ramshackle trip down the coast with all the exulting highs and terrifying lows of sailing a small boat on the Pacific. From sailing on Thanksgiving morning under spectacular bright blue Californian skies just off the Channel Islands as dolphins raced alongside their boat to the terrifying experience of rounding Punta Gorda and hanging on to the mast for dear life. It also tells the story of two very normal people doing what most people only dream of and settling the argument that if you want something bad enough you can make it happen.

Dream City Lance Berelowitz,2010-08 Located at the edge of a continent and at the corresponding edge of national public consciousness, Vancouver has developed in unique and unanticipated ways. It is now emerging as an experiment in contemporary city-making, with international interest in Vancouver as a model of post-industrial urbanism increasing exponentially. Lance Berelowitz explores the links between the city's seductive natural setting, its turbulent political history and changing civic values, and its planning and design culture. He also makes the startling case that Vancouver is to Canada's imagination what Los Angeles is to the American -- a mythologized place of endless possibilities, while being grounded in an altogether more limited set of socio-economic and environmental limitations. Dream City is richly illustrated with both historical and contemporary photographs of many significant buildings and public spaces, as well as specially commissioned maps that reveal the underlying patterns of growth and change of Canada's youngest metropolis.
