Aircraft of the Luftwaffe, 1935-1945 Jean-Denis G.G. Lepage, 2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

Luftwaffe Secret Projects Dieter Herwig, Heinz Rode, 2000 This eagerly awaited companion volume to the enormously popular volume on fighters looks at the might-have-been strategic German bombers. Filled with transatlantic jets and projects that were on the drawing board or in prototype form at the war's end. Full color action illustrations in contemporary markings and performance data tables show vividly what might have been achieved had the war continued beyond 1945.

Kites, Birds & Stuff - Aircraft of GERMANY - MESSERSCHMITT Aircraft P.D. Stemp, 2014-12-14 A detailed history of Messerschmitt aircraft. From their very early years, through the war years and beyond. Specifications on performance, dimensions, weights, engines, armaments, prototypes, first flights, plus other relevant details. The book contains around 216 pictures, along with around 63 plan diagrams, also with around 679 individual aircraft details.

Arado Flugzeugwerke Volker Koos, 2021-04-19 Founded in Warnemünde in 1925, Arado Flugzeugwerke developed civilian and military prototypes for the clandestine armament programme of the Reichswehr. From 1933 when licensed production of military aircraft commenced, the factory also built a number of their own designs. Best known are the training planes Ar 66 and Ar 96, the catapult floatplane Ar 196, and the record-breaking sport aircraft Ar 79. With the two- or four-engine Ar 234, the world's first operational jet bomber was built. At the end of the war, Arado initiated the project of the first supersonic experimental aircraft. *Arado Flugzeugwerke: Aircraft and Development* charts the development of all Arado aircraft between 1925 and 1945, as well as the development and capabilities of the factory. It also gives an overview of the licensed-productions and other projects. The information in this book is based on original documentation, unpublished photographs and will rectify some of the speculation and fantasy that has been published about Arado Flugzeugwerke.

Last Days of the Luftwaffe Manfred Griehl, 2009-04-17 Drawn from newly-available historical archives, this German air force history is “packed with many fascinating revelations.” (IPMS/USA) The end of the Second World War in Europe was an epoch of complete social, cultural and technological upheaval. In the realm of military and aviation history this period was revolutionary. The eclipse of the piston-engine, and the introduction of electronic detection equipment, rockets and airborne weapons in previously unknown quantities changed the face of the air war and paved the way for post-war developments in aviation technology. Many details of this crucial phase of the war remained hidden for many years in top-secret files, but in this fascinating new history Manfred Griehl makes use of recently declassified sources, alongside his own vast collection of photographs, to provide a fresh look at the story of the Luftwaffe. Among the many aspects he covers are the new models of Bf 109 and Fw 190; the Me 262 jet plane; the establishment of He 162 squadrons; Stukas and Fw 190 fighter-bomber operations on the Eastern Front; Me 262 Blitzbombers in the West, the recruitment of 1928-born Hitler Youth into the two hundred glider schools; the increasing importance of remote-controlled air-to-air rockets; and the development of heavy bombs, remote-controlled bombs, atom bombs and Germany's chemical and bacteriological arsenal. Brimming with intriguing discoveries, such as the existence of the real-life Luftwaffe kamikaze squadron, this meticulously researched and fully illustrated book will be of interest to historians and enthusiasts alike.

Arado Jörg Armin Kranzhoff, 1997 The Arado Flugzeugwerke devoted twenty years to making aviation history in Potsdam-Babelsberg. Within the pages of this book the reader will find the first comprehensive history of Arado, including many previously unpublished details about this little-known aviation company.

Tajné operace Wehrmacht Faggioni Gabrielle, 2019-10-31 Německé tajné služby a ozbrojené síly sprádaly v letech 1939–1945 množství různých plánů: některé byly realistické (a také se uskutečnily), jiné vykazovaly spíše velikášské či fantastické rysy. Nacisté chystali například invazi na Island nebo do Severního Irsku, přepadení Švýcarska či Gibraltarů, připravovali rozsáhlé sabotážní akce zaměřené na infrastrukturu USA a možná dokonce plánovali i únos Churchilla, Roosevelta a Stalina z konference v Teheránu v roce 1943. Tato kniha opisuje více než čtyři desítky operací, které mají jednu společnou vlastnost – nikdy k nim nedošlo. Zatímco o provedených vojenských akcích druhé světové války toho bylo napsáno mnohé, tyto (naštěstí jen plánované) už tak známé nejsou. Přesto zasluhují pozornost, protože jejich studium umožní i po letech lépe pochopit myšlení nacistických stratégů. Italský historik Gabriele Faggioni na základě archivního výzkumu, dobových fotografií a podrobných historických map představuje zapomenuté tajné vojenské akce, které měly do války zatáhnout nové státy a rozšířit ji do dalších částí světa.

Defeat in the West, 1943-1945 Mike Spick, 1998 This exciting on-going series covers every aspect of the Luftwaffe in World War II and charts the rise and fall of this mighty force. Each volume makes use of over a hundred rare and valuable photographs, many of them taken by Luftwaffe personnel, to bring history to life and record both the men and the aircraft they flew. By 1943 the war in the skies of Europe had changed dramatically as the RAF and USAAF began to dominate and eventually achieve air superiority. Defeat in the West captures the essence of the Luftwaffe's losing battle for survival.
