Trends in Substance Abuse Research Cailin R. McKenna,2007 Substance abuse is one of society's most serious problems. Drugs seem to be readily available even in elementary schools, which attests to the success of the drug purveyors and the failure of law enforcement officials, education administrators and parents. As an example, in the U.S. in 2003, there were nearly 1.7 million admissions to publicly funded substance abuse treatment programs. Most admissions (23.2 percent) were for alcohol treatment. Marijuana accounted for the largest percentage of illicit drug admissions (15.4 percent), followed by heroin (14.4 percent). This book presents new and important research dealing with treatments and treatment programs aimed at alleviating the misery and loses to society of this vicious behavioural disorder.

Problems of the Agricultural Development of Less-Favoured Areas in Europe Yong Zhou,2013-10-22 Problems of the Agricultural Development of Less-Favoured Areas in Europe is a collection of papers from a symposium of the United Nations Economic Commission for Europe and Food and Agriculture Organization held in Geneva on May 22-26, 1978. This collection of papers covers European countries with areas where agricultural development is limited. This book defines less-favored agricultural areas as those places where there is limited agricultural development, of different sizes and economic and social importance. These areas are also defined as suffering serious deterioration of the natural environment and of economic and social activities. This book then presents country reports covering problem areas in Austria, Belgium, Czechoslovakia, Finland, France, and Germany. In reviewing each of these countries, and other countries as well, the text presents each government's objectives concerning the rural areas, the actual strategies and policies pursued by the state, and the problems encountered when implementing these policies. This text also gives the methodologies used in evaluating these programs. This book can prove useful for government officials and ministries dealing with the agricultural sector, heads of volunteer organizations dealing with countryside development, and academicians in political science and developmental planning.
