Through the Arch Larry B. Dendy,2013 Through the Arch captures UGA's colorful past, dynamic present, and promising future in a novel way: by surveying its buildings, structures, and spaces. These physical features are the university's most visible--and some of its most valuable--resources. Yet they are largely overlooked, or treated only passingly, in histories and standard publications about UGA. Through text and photographs, this book places buildings and spaces in the context of UGA's development over more than 225 years. After opening with a brief historical overview of the university, the book profiles over 140 buildings, landmarks, and spaces, their history, appearance, and past and current usage, as well as their namesake, beginning with the oldest structures on North Campus and progressing to the newest facilities on South and East Campus and the emerging Northwest Quadrant. Many profiles are supplemented with sidebars relating traditions, lore, facts, or alumni recollections associated with buildings and spaces. More than just landmarks or static elements of infrastructure, buildings and spaces embody the university's values, cultural heritage, and educational purpose. These facilities--many more than a century old--are where students learn, explore, and grow and where faculty teach, research, and create. They harbor the university's history and traditions, protect its treasures, and hold memories for alumni. The repository for books, documents, artifacts, and tools that contain and convey much of the accumulated knowledge and wisdom of human existence, these structures are the legacy of generations. And they are tangible symbols of UGA's commitment to improve our world through education. Guide includes 113 color photos throughout 19 black-and-white historical photos Over 140 profiles of buildings, landmarks, and spaces Supplemental sidebars with traditions, lore, facts, and alumni anecdotes 6 maps

The Column and the Arch Essays on Architectural History William P. P. Longfellow,2018-03-21 Excerpt from The Column and the Arch Essays on Architectural History: With Illustrations Some of these essays have been already printed, and I have to thank the proprietors of the American Architect and the Architectural Record for permission to repeat them here; others of them appear now for the first time. I have brought them together with the wish to trace in sequence the main thread that binds the successive phases of European architecture, and the evolution of the two leading features of its forms, the classic order and the arch. I have passed by the Byzantine style because it was a collateral development, and outside

the cycle which, beginning with Greek architecture, returned upon itself in the Renaissance. For a like reason I have touched but lightly on the Gothic, a splendid growth that structurally was the completion of the Romanesque, but, as a matter of form, was hors de ligne, like the Byzantine, and like it had no successor; for the logical predecessor of the Renaissance was the Romanesque, and the development of the older forms was finished when that merged in the pointed Gothic.
