Highly Irregular Arika Okrent, 2021-06-03 Maybe you've been speaking English all your life, or maybe you learned it later on. But whether you use it just well enough to get your daily business done, or you're an expert with a red pen who never omits a comma or misplaces a modifier, you must have noticed that there are some things about this language that are just weird. Perhaps you're reading a book and stop to puzzle over absurd spelling rules (Why are there so many ways to say '-gh'?), or you hear someone talking and get stuck on an expression (Why do we say How dare you but not How try you?), or your kid quizzes you on homework (Why is it eleven and twelve instead of oneteen and twoteen?). Suddenly you ask yourself, Wait, why do we do it this way? You think about it, try to explain it, and keep running into walls. It doesn't conform to logic. It doesn't work the way you'd expect it to. There doesn't seem to be any rule at all. There might not be a logical explanation, but there will be an explanation, and this book is here to help. In *Highly Irregular*, Arika Okrent answers these questions and many more. Along the way she tells the story of the many influences--from invading French armies to stubborn Flemish printers--that made our language the way it is today. Both an entertaining send-up of linguistic oddities and a deeply researched history of English, *Highly Irregular* is essential reading for anyone who has paused to wonder about our marvelous mess of a language.

Where these items are coming from or why there are so many coming into public purview at one time is unknown. What is known is that people who find them sometimes die of mysterious causes. Whether from the item or from something attracted to these strange magics is also unknown. There are contradictory reports whether or not this is a case of delusion or hysteria or if the veil or membrane that separates here from there has been damaged or destroyed. For anyone who finds an AccessORY, they can no longer go back to their normal lives. The item changes them and their place in our Reality. Be careful. Be prepared. Sounds of the Underground Stephen Graham, 2020-03-06 In basements, dingy backrooms, warehouses, and other neglected places around the world music is being made that doesn't fit neatly into popular or classical categories and genres, whose often extreme sounds and tiny concerts hover on the fringes of these commercial and cultural mainstreams. The term "underground music" as it's being used here connects various forms of music-making that exist outside or on the fringes of mainstream institutions and culture, such as noise, free improvisation, and extreme metal. This is music that makes little money, that's noisy and exploratory in sound and that's largely independent from both the market and from traditional high art institutions. It sometimes exists at the fringes of these commercial and cultural institutions, as for example with experimental metal or improv, but for the most part it's removed from the mainstream, "underground," as we see with noise artists such as Werewolf Jerusalem or Ramleh, obscure black metal artists such as Lord Foul, and improvisers such as Maggie Nicols. In response to a lack of previous scholarly discussion, Graham provides a cultural, political, and aesthetic mapping of this broad territory. By outlining the historical background but focusing on the digital age, the underground and its fringes can be seen as based in radical anti-capitalist politics or radical aesthetics while also being tied to the political contexts and structures of late capitalism. The book explores these various ideas of separation and captures, through interviews and analysis, a critical account of both the music and the political and cultural economy of the scene.

Crossing Borders Dominik Bonatz, Andreas Reinecke, Mai Lin Tjoa-Bonatz, 2012-01-01 Based on recent field research and excavation finds, the contributions in this volume focus on cultural practices and materials which reflect processes of integration, specification and diversification in the prehistory and early history of Southeast Asia. With chapters on the variability and distribution of lithic assemblages, funerary practices, the spread of Neolithic cultures and field agriculture, and the development of Metal Age remains, different approaches are presented to interpret these phenomena in their specific environmental context. Crossing Borders contains 25 papers presented at the 13th International Conference of the European Association of Southeast Asian Archaeologists (EurASEAA). Held in Berlin in 2010, the conference was jointly organized by the Institute of Ancient Near Eastern Archaeology at the Freie Universität Berlin and the German Archaeological Institute. The peer-reviewed proceedings bring together archaeologists, art historians and philologists who share a common interest in Southeast Asia's early past.
