Armor Command: The Personal Story of a Commander of the 13th Armored Regiment Brig.-Gen. Paul McDonald Robinett, 2017-07-11 "Armor Command is a candid book presenting the activities and observations of an armor commander who was among the first overseas and in action against the European Axis in World War II. All who are interested in the activities of combat troops that make or break the reputations of high military figures and all those who desire an understanding of life in the combat zone will find this book of compelling interest. Military men will find it of professional value for it deals with the problems of a small command in the initial campaign against the German-Italian Allies. Among other things it deals with the problems of the meeting engagement and the withdrawal—two of the most difficult operations in war."—Foreword

US Commanders of World War II (1) James Arnold, Robert Hargis, 2012-05-20 To be a successful commander requires experience, character, tenacity and boldness: the ability to establish a good rapport with both your staff and your men is also vital. The real test comes in combat though, where a large proportion of luck is involved the luck to be in the right place at the right time and lasting reputations can be formed in a very brief and frenetic period. The key US commanders of World War II were subject to (and often gratuitously fostered) the projection of their 'characters', exploiting the growing power of the media. This title examines the careers, personalities and fortunes of the key US Army and Air Force commanders of World War II.

Battalion Commanders at War Steven Thomas Barry, 2013-05-23 Most histories of the U.S. Army in World War II view the Mediterranean Theater of Operations primarily as a deadly training ground for very green forces, where lessons learned on the beaches of Oran, in the hills of the Kasserine Pass area, and at the collapse of the Tunis bridgehead all contributed to later success in Western Europe. Steven Barry, however, contends that victory in the MTO would not have materialized without the leadership of battalion-level commanders. They operated at a high level, despite the lack of combat experience for themselves and their troops, ineffective leadership at higher levels, and deficiencies in equipment, organization, and mobilization. Barry portrays these officers as highly trained, adaptable, and courageous in their first combat experiences in North Africa and Sicily. Their leadership, he argues, brought discipline, maturity, experience, and the ability to translate common operational guidance into tactical reality, and thus contributed significantly to battlefield success in North Africa and Sicily in 1942-1943. To explain how this happened, he examines their prewar experiences, including professional military education and unit training exercises; personal factors such as calmness and physical resilience under fire; and the ability to draw upon doctrine, creatively apply the resources at their disposal, and clearly define and communicate mission goals and means. He also reveals how battalion leaders incorporated technological innovations into combined arms maneuvers by employing tank capabilities and close air support doctrine. As Barry's assessment shows, these battalion commanders were not the sole reason for the Allied triumph in North Africa and Sicily, but victory would not have been possible without the special brand of military leadership they exhibited throughout those campaigns. Under their leadership, even inexperienced units were able to deliver credible combat performance, and without the regular army battalion leaders, U.S. units could not have functioned tactically early in the war. One of the few studies to focus on tactical adaptation at the battalion level in conventional warfare, Barry's book attests to the pivotal value of professional military education-and makes an important contribution to today's organizational learning debate-while providing an in-depth view of adaptation of U.S. infantry and armored forces in 1942-1943.

Arms-Commander L. E. Modesitt, Jr., 2011-03 L.E. Modesitt, Jr.'s Arms-Commander continues his bestselling fantasy series the Saga of Recluce, which is one the most popular in contemporary epic fantasy. The keep of Westwind at the Roof of the World, faces attack by the adjoining land of Gallos. Arthanos, son and heir to the ailing Prefect of Gallos, wishes to destroy Westwind because the idea of a land where women rule is total anathema to him. Westwind dispatches Saryn, their Arms-Commander, a neighboring land to seek support against the Gallosians. To secure their aid, Saryn

must pledge her personal support—and any Westwind guard forces she can raise—to the defense of its ruler. The fate of four lands, including Westwind, rest on Saryn's actions. “An intriguing fantasy in a fascinating world.”—Robert Jordan, New York Times bestselling author of The Wheel of Time® series

Shadow Commander Mike Guardia,2015-11-24 The true story of the US Army legend who organized “Blackburn’s Headhunters” against Japan in WWII and went on to initiate Special Forces operations in Vietnam. The fires on Bataan burned on the evening of April 9, 1942—illuminating the white flags of surrender against the dark sky. Outnumbered and outgunned, remnants of the American-Philippine army surrendered to the forces of the Rising Sun. Yet US Army Captain Donald D. Blackburn refused to lay down his arms. With future Special Forces legend Russell Volckmann, Blackburn escaped to the jungles of North Luzon, where they raised a private army of 22,000 men against the Japanese. His organization of native tribes into guerrilla fighters would lead to the destruction of the enemy’s naval base at Aparri. But Blackburn’s amazing accomplishments would not end with the victory in the Pacific. He would go on to play a key role in initiating Army Special Forces operations in Southeast Asia, spearheading Operation White Star in Laos as commander of the 77th Special Forces Group and eventually taking command of the highly classified Studies and Observations Group (SOG), charged with performing secret missions now that main-force Communist incursions were on the rise. In the wake of the CIA’s disastrous Leaping Lena program, in 1964, Blackburn revitalized the Special Operations campaign in South Vietnam. Sending reconnaissance teams into Cambodia and North Vietnam, he discovered the clandestine networks and supply nodes of the Ho Chi Minh Trail. Taking the information directly to General Westmoreland, Blackburn was authorized to conduct full-scale operations against the NVA and Viet Cong in Laos and Cambodia. In combats large and small, the Communists realized they had met a master of insurgent tactics—and he was on the US side. Following his return to the US, Blackburn was the architect of the infamous Son Tay Prison Raid, officially termed Operation Ivory Coast, the largest prisoner-of-war rescue mission—and, indeed, the largest Army Special Forces operation—of the Vietnam War. During a period when US troops in Southeast Asia faced guerrilla armies on every side, America had a superb covert commander of its own. This book follows Blackburn through both his youthful days of desperate combat and his time as a commander, imparting his lessons to the new ranks of Army Special Forces.

Certain Victory Robert H. Scales,1993 Written in a colorful, readable style, Certain Victory chronicles the Army’s remarkable regeneration in the two decades after Vietnam—the foundation of the Desert Storm victory. Each chapter starts with a compelling personal combat story that puts the conflict into human perspective. A quick read? without military jargon, Certain Victory brings the

civilian reader into battle alongside individual soldiers. On the Military Intelligence History Reading List 2012.

To Be a Soldier Department of the Army, 2017-10-17 To Be a Soldier offers the US Army's two capstone doctrinal manuals in one place for the first time. This guide begins with the Army's introductory text, FM-1 The Army, which explains the Army's origin and purpose, its mission and values, how it functions as a portion of a joint military force in combat, and the importance of the individual soldier in a larger fighting force. When readers have learned the fundamentals of the Army, FM-3 Operations provides foundational knowledge of the full spectrum of Army operations. This manual is the Army's principal tool for the instruction of today's soldiers in the art and science of warfare, and has been recently updated to discuss counter-insurgency and hybrid threats in addition to conventional land operations. To Be a Soldier is the reader's guide to the Army's most fundamental knowledge by offering its two capstone texts in one place. The information in this handbook forms the basis for all the knowledge conveyed in any subsequent Army field manuals, making it required reading for all soldiers and readers with interest in US Army training and operations.

Tactics, Techniques, and Procedures for Fire Support for the Combined Arms Commander (FM 3-09. 31 / MCRP 3-16C) Department of the Army, U.S. Marine Corps, 2012-11-14 This publication, "Tactics, Techniques, and Procedures for Fire Support for the Combined Arms Commander," is intended for the combined arms brigade or battalion commander, and their staffs to help synchronize fires with their scheme of maneuver. Experience shows that combat forces must be employed as part of the combined arms team. Maneuver and fires must be synchronized and orchestrated by the combined arms commander to realize the full potential of each arm and maximize the combat power of the combined arms team. The same applies in principle to firepower. Mortars, cannon and rocket artillery, naval gunfire, and air support on the lethal side, and intelligence and electronic warfare (IEW) and information operations (IO) systems on the non-lethal side, are various means of fire support. Each has its own advantages and disadvantages. Each provides a measure of capability the others lack: responsiveness, flexibility, and accuracy from mortars and artillery; precision and destructiveness from close air support; disruption of command and control and capability to exclude collateral damage from IEW and IO systems. Using all of these means in combination creates a synergistic effect - the whole system is far more effective than its parts. The proper application of fire support requires as much skill and orchestration from the combined arms commander as it does from the fire support coordinator (FSCORD). This is what this publication is about, to help clarify the art of applying fire support at the right time and place on the battlefield.

Returning Fire Col. James W. Booth, 2011-09-28 This book is the factual story of the development of armed helicopters in the US Army and their first employment in combat. The story is dramatically told by the courageous men who lived it--flying daily into enemy infested areas facing murderous fire from automatic and anti-aircraft weapons. In late 1961 the US Government deployed five Transportation Helicopter Companies (H-21 lift ships) to South Vietnam to increase the mobility of South Vietnamese ground forces. The Viet Cong quickly recognized that the H-21s were unarmed and began shooting at them endangering the lives of American crewmen. A helicopter company equipped with 25 UH-1 helicopters had been cobbled together on Okinawa by the Commander US Army Pacific. Believing the company was soon to be deployed to Vietnam, the men assigned to the unit armed its helicopters by scrounging weapons systems left over from WW II and Korea stored in Army/Air Force depots in Okinawa. Machine guns and 2.75 inch rockets were jury rigged onto the UH-1s. Officially designated the Utility Tactical Helicopter Company, but widely known as the UTT, the company deployed to Saigon in September 1962. After some jurisdictional squabbles with the Air Force over roles and missions, UTT began combat operations in October. It quickly became widely known for professionalism and the courage of its crew members. Such was its fame that for years South

Vietnamese military personnel called all armed helicopters UTT. Unfortunately over its years in RVN the Company endured frequent designation changes--UTT/68th/197th/334th Armed Helicopter Company. Why remains a mystery even today. The Companys legacy is strong and endures today. Armed helicopters are a major component of US Army combat forces. The current Army Apache program (over 600) is a direct descendent. Additionally, the Marines and Navy have strong armed helicopter programs, as does every major military power in the world. Ironically it all began with a small group of courageous men mounting scavenged weapons [mostly outmoded] on helicopters originally designed for medical evacuation. This is their story.

Gen Otto P. Weyland USAF: Close Air Support In The Korean War LTC Michael J. Chandler,2015-11-06 This study analyzes Gen O. P. Weyland's impact on close air support (CAS) during the Korean War. First, the author briefly traces the history and evolution of air-ground support from its infancy to the start of the Korean War. Second, he shifts his focus to the effectiveness of CAS throughout the conflict and addresses why this mission was controversial for the Army and Air Force. Third, he highlights General Weyland's perspective on tactical airpower and his role in the close-air-support "controversy." Throughout his career, Weyland was a staunch advocate of tactical airpower. As Patton's Airman in World War II, Far East Air Force commander in Korea, and the commander of Tactical Air Command in the mid-1950s, Weyland helped the tactical air community to carve out its role as a critical instrument of national power.

Crisis in Command Richard A. Gabriel,Paul L. Savage,1978 *Crisis in Command*, written in the aftermath of the Vietnam War, details the mismanagement of the US Army's leadership. Former soldiers Richard A. Gabriel and Paul L. Savage provide documented evidence that the military forces of the United States are ill-prepared for war, having been weakened by officer-corps members who have abandoned honor and integrity to further their individual careers.
