David Doyle, Don Greer

M113: American Armoured Personnel Carrier BEN. SKIPPER, 2021-03-30 The M113 has become as much a recognisable part of the US military machine at war as the Bell UH-1 Iroquois and M16 assault rifle. Earning its stripes in the jungles and highlands of Vietnam, it became the most widely armoured vehicle of the campaign. Such was its prowess that the Viet Cong gave it the nickname Green Dragon on account of its ability to go virtually anywhere. Its ground-breaking aluminium hull gives the M113 a relatively low weight of 12ts, this allows it to be easily transported by air and gives it an amphibious ability. The design was also easy to modify and can carry a range of support and indirect fire weapons. From mortars to ballistic missiles, the M113 spawned a progeny of useful and innovative vehicles. The base M113 is lightly armoured and safe against only the lightest of small arms fire and shell splinter. As a result a range of up-armour packages have been used in the past, from sandbags to complex appliqué armour. 80,000 M113s of all types have been produced and are in use with over 50 countries, making it one of the most widely used armoured fighting vehicles to be produced. Indeed such was its popularity that the US bought their final M113s in as late as 2007. The M113 was designed and developed by the Ford Machinery Corporation (FMC) to replace the heavier and less reliable steel-bodied M59 and M75 armoured personnel carriers. It was specifically designed to be lighter, air-portable and have amphibious capability. Carrying a crew of two, driver and commander, who manned the M113's only weapon, a .50cal machine gun, the M113 would transport 11 soldiers into combat before withdrawing to the rear. Powered initially by a V8 petrol engine the M113 would be continuously up-engined throughout its frontline and subsequent rear

support lifespan. Changes included improved suspension, smoke dischargers and externally fitted fuel tanks. Other changes have included armoured commander's turrets and slat armour. This LandCraft title looks at the M113s development where the FMC sought to utilise its chassis into as many roles as possible, from smoke generators to flamethrowers. The book also looks at how the M113 was adapted for use by numerous overseas customers and how these are upgraded to suit local conditions. Finally the title looks at the M113's changing roles in the more sophisticated contemporary battlescape and how it's still providing service in theatres across the world in a variety of roles, both combat and support. For the modeller there is nothing more important than the little things and this image-rich section of Land Crafts M113 title delivers the goods. Filled with crisp photos that show the M113's many details, combined with helpful accompanying text, forms an enviable visual guide for the enthusiast and modeller alike.

Bradley Vehicle : Comparison to the M113A3 Armored Personnel Carrier United States. General Accounting Office, 1987

M113 APC David Doyle, Don Greer, 2009

The Bradley and How It Got That Way W. Blair Haworth, 1999-11-30 The mechanized infantry is one of the least-studied components of the U.S. Army's combat arms, and its most visible piece of equipment, the Bradley Fighting Vehicle, is one of the military's most

controversial pieces of equipment. This study traces the idea of mechanized infantry from its roots in the early armored operations of World War I, through its fruition in World War II, to its drastic transformation in response to the threat of a nuclear, biological, and chemical battlefield. The U.S. Army's doctrinal migration from the idea of specialized armored infantry to that of more generalized mechanized infantry led to problematic consequences in training and equipping the force. Haworth explores the origins, conduct, and outcome of the Bradley controversy, along with its implications for Army institutional cultures, force designs, and doctrines. Challenging traditional partisan views of the Bradley program, Haworth goes to the roots of the issue. The author details the mechanized infantry's problematic status in the Army's traditional division of roles and missions between its Infantry and Armored branches. While new conditions demand new equipment, old institutions and current commitments inevitably complicate matters; thus, traditional infantry considerations have driven the Bradley's requirements. The raw capability of the vehicle and the fortitude and ingenuity of its users have to some extent compensated for the conflicting pressures in its design. However, the reluctance of the Army to see mechanized infantry as a specialty has led to the problem the vehicle has faced, as this book clearly shows.

Jane's Armoured Personnel Carriers Christopher F. Foss, 1985-01-01 Photographs, line drawings, and text describe all post World War II wheeled and tracked armoured personnel carriers, mechanised infantry fighting vehicles, and internal security vehicles.

Bradley R. P. Hunnicutt, 2015-09-15 This entry in R. P. Hunnicutt's unrivaled 10-volume history of American armored fighting vehicles focuses on the spectrum of armored

personnel carriers with a focus on the Bradley fighting vehicle (BFV). Operations in WWII indicated a need for an armored vehicle with improved protection and reliable mobility for transporting soldiers in and out of battle. To address this need, development began on full-tracked armored personnel carriers with overhead protection before WWII came to a close. Development continued into the postwar period. One result of this program was the M59 armored infantry vehicle, which was pioneered as a low-production-cost vehicle and had the added benefit of being amphibious, a quality that became required in all armored personnel carriers that succeeded it. In his trademark style, Hunnicutt surveys the development of each armored personnel carrier since the end of WWII, illustrating his detailed history with line drawings and photographs. He covers the development of the M113, which was employed successfully in Vietnam and served as the basis for a family of vehicles ranging from armored combat vehicles to unarmored cargo carriers. The success of the M113 as a fighting vehicle gave rise to the development of the Bradley fighting vehicle, which was intended for use by both infantry and cavalry units. With all the detail and precision readers have come to expect from R. P. Hunnicutt's histories of American armored vehicles, Bradley is the definitive work on the history of American fighting and support vehicles. An absolute must-have for anyone interested in American military history.

Tanks and Armored Fighting Vehicles Robert Jackson, 2007 A highly illustrated and comprehensive reference guide to more than 240 tanks and armored fighting vehicles from 1915 to the present day. China MRAPS, Armored Cars, Armored Personnel Carriers and Armored Assault Vehicles 新新 (Xīn Shìjiè) (Xīn Shìjiè), 2021-01-16 January 2021 This is probably the toughest book I've attempted. Partly due to the lack of open-source information available and partly because of the Covid-19 lockdown. Anyway, I decided to go ahead and publish what I have since there are so few books on the subject out there. This is just the start as there are a lot of vehicles out there and I plan to add the ones I missed. Please let me know which I missed and I will add them. I would like to crowd source this book and ask that readers go to our web site (USGOVPUB.com) and send me comments to fill in the information gaps. Rather than writing a negative review, how about sending me the suggested changes and improvements and I then update the text as soon as I get your comments? I plan to upload updates on the last day of the month if I get input. In any event, I will continue to research the missing information myself and make corrections as I find them. Note that the pictures on the cover are a graphical Table of Contents. The page number is written before the vehicle name. Also, I hate to see blank pages, so I placed the cover page for a few suggested titles you may be interested in looking at. If you have ideas for future titles, let me know and I will see how much info is out there and try and publish suggested titles. Thank you for your continued support. 4th Watch publishing is a SDVOSB. Here is a partial list of vehicles: CSK-131 4x4 Tactical Vehicle CSK-141 6x6 Tactical Vehicle

US Cold War Tanks and Armoured Fighting Vehicles Michael Green, 2019-08-30 This expert study of the U.S. military's armored vehicles deployed during the Cold War features rare photographs from the wartime archives. To counter the Soviet threat and that of their client States during the Cold War years 1949-1991, the American military deployed an impressive range of main battle tanks and armored fighting vehicles. Expert author Michael Green presents a detailed study of these vehicles and their variants in this informative volume of stunning wartime photographs. The Patton series of medium main battle tanks—including the M46, M47 and M48—supplemented by the M103s Heavy Tank initially formed the core of the US tank fleet. In 1960 the M60 MBT entered service and, in turn, was replaced by the M1 Abrams in 1980. In support were armored reconnaissance vehicles, progressively the M41 bull dog (1951); the M114 (1961), the M551 Sheridan (1967) and M3 Bradley Cavalry Fighting Vehicle (1981). The armored personnel carrier

range included the ubiquitous M113 and its replacement the M2 Bradley, cousin of the M3. All of these vehicles are covered in this highly detailed volume in the Images of War series.

The Encyclopedia of Tanks and Armoured Fighting Vehicles Christopher F. Foss, 2002

Tanks and armoured fighting vehicles have revolutionised modern warfare, dominating the battlefield in conflicts all over the world with their firepower, armour and mobility. Featured in this book are over 900 tanks, armoured personnel carriers, self-propelled guns, reconnaissance vehicles and armoured cars.

Armoured Warfare in the Vietnam War Michael Green, 2014-10-30 This pictorial history of the Indochina and Vietnam Wars captures the range of armored warfare used in the region through rare wartime photographs. The two conflicts that engulfed Indochina and Vietnam in the decades after World War II are generally thought of as infantry wars. But in fact, they both involved a significant amount of armored warfare. In this fully illustrated volume, military expert and Vietnam veteran Michael Green describes the many kinds of armored vehicles deployed and their contributions in combat. The ill-fated French Expeditionary Force of the Indochina War was largely equipped with World War II era American tanks—including M3 and M5 Stuart, M4 Sherman and M24 light tanks—as well as armored cars and half-tracks. Most of these eventually went to the Army of the Republic of Vietnam, but were outdated and ineffective due to lack of logistics and training. The US Army and Marine Corps build-up in the 1960s saw vast quantities of M48 Pattons, M113 APCs and many specialist variants and improvised armored vehicles arrive in the theatre. The Australians also brought their British Centurion tanks. But it was the Russians, Chinese

and North Vietnamese who won the day and their T-38-85 tanks, ZSU anti-aircraft platforms.
