**Early US Armor** Steven J. Zaloga,2018-02-22 The first American armoured cars began to emerge around the turn of the century, seeing their first military use in 1916 during the Punitive Expedition against Pancho Villa. When the United States entered World War I, the American Expeditionary Forces used some armoured cars in France, and American armoured cars were used by the French Army. The inter-war years saw considerable innovation and experimentation in armoured car design. Of the 1930s scout car designs, the M3A1 scout car was good enough to be produced in very large numbers in World War II, and was widely exported to many other armies via Lend-Lease. It also served as the basis for the late M2 and M3 armoured half-tracks. In this study, using detailed full colour plates and rigorous analysis, US armour expert Steven J. Zaloga chronicles the development of the US armoured car in the years leading up to World War II.

**Staghound Armored Car 1942-62** Steven J. Zaloga,2011-12-20 The Staghound was a unique World War II armored vehicle designed and manufactured in the US, but intended solely for the British army. Since its combat debut in Italy in 1943 until the end of the war it had performed particularly valuable service in a reconnaissance role where its speed and armor ensured that it was able to extricate itself from trouble as required without additional support. This book examines the development of this category of armored cars and offers a detailed analysis of the extensive combat use of the Staghound in British service as well as in the service of other Allied countries including Canada, New Zealand and Poland.

**M8 Greyhound Light Armored Car 1941-91** Steven J. Zaloga,2012-09-20 The M8 light armored car was the only significant wheeled combat vehicle used by the US Army in World War II. In conjunction with the lightly armed utility version, the M20, it was the staple of the army's cavalry squadrons for use in reconnaissance and scouting. First entering combat in Italy in 1943, it was widely used throughout the campaign in northwest Europe, though its off-road performance was found to be wanting. This title describes the design and development of the M8, covering the many variants that were produced during World War II and afterwards, along with a comprehensive survey of its operational use.

**The Matter of the Dematerializing Armored Car** Steve Levi,2018-03-02 In The Matter of the Dematerializing Armored Car, Chief of Detectives Heinz Noonan is asked to solve the disappearance of an empty armored car and its two drivers from a tunnel with guards on both ends. Why would anyone want to steal an empty armored car and is it linked the \$12 million in cash in the armored car vault under the control of the United States Department of Treasury which vanishes without a trace - legally? A suspenseful thriller of breathtaking action where the detective must solve an impossible crime before the heist can become an unsolved crime!

**How to Rob an Armored Car** Iain Levison,2009-10-01 In a dying Pennsylvania coal town, three friends are looking for a way out. Mitch is a rebellious malcontent whose bad attitude gets him fired from a chain big box store. Doug can identify any pill by sight and any '80s rock song by the first three notes but doesn't understand credit scores. Kevin got married and had a kid too soon and is now on parole after serving jail time for growing marijuana. The three of them dabble in petty crime and believe they have a talent for it. They start by stealing a high-definition TV, then set their sights on bigger scores. Soon things begin to get out of hand.

*U.S. Army Ford M8 and M20 Armored Cars* Didier Andres,2023-11-30 A fully illustrated examination of the M8 and M20 armored cars which served the US Army throughout World War II. The M8 and M20 served in Europe and the Pacific during WWII. Author has used the archived notes of the officer tasked with coordinating the project to develop and deliver the M8, explaining why it took two years to deliver it to the Army. Over 200 photographs make this a great reference for any military modeler or vehicle enthusiast.

**Ford M8 and M20** David Doyle,2021-04-28 Developed to provide the US military with a fast-moving reconnaissance vehicle sufficiently armed to knock out WWII-era armored vehicles. The M8 Armored Car and its sibling, the M20 Armored Utility Vehicles, were the most widely used armored vehicles built by Ford. These vehicles saw use with the US Army as well as Allied nations during WWII and well into the 1960s. This book chronicles the development and use of the vehicle from concept to combat. Through dozens of archival photos, many never before published, as well as detailed photographs of some of the finest existent examples of these vehicles, this iconic tank is explored, and its history is explained.

*American Wheeled Armoured Fighting Vehicles* Michael Green,2016-10-31 Numerous wheeled armoured fighting vehicles have seen service in the US armed forces on and off for over 80 years. There have been various changes of policy and twice, after the Second World War and Vietnam, they went out of favour but their use is now well established. This well researched and superbly illustrated book describes all the different types and variants since the first M1 was ordered in 1931. The M8 armoured car was widely used during World War Two but it was not until Vietnam that further wheeled AFVs came into service, notably the M706 armoured car. After a lull the US Marine Corps adopted the Light Armoured Vehicle (LAV) in 1983. The US Army first used armoured Humvees in 1994 and variants remain in service (M1141 and M1116). Other types today include the Guardian (M1117) and the Army version of the LAV names the "Stryker". To meet the operational requirements of Iraq and Afghanistan the Mine Resistant Ambush Protected vehicle (MRAP) was ordered in bulk from 2007.
