

Armored Fighting Vehicle

Philip Trehitt

Tanks and Armored Fighting Vehicles Robert Jackson, 2007 A highly illustrated and comprehensive reference guide to more than 240 tanks and armored fighting vehicles from 1915 to the present day. Illustrated throughout with photographs and detailed artworks showing every aspect of the featured military vehicles. Includes a full specification table for each machine, detailing armament, crew, dimensions, weight, speed, range, engine types, and power output. --

Armored Fighting Vehicles Martin J. Dougherty, 2012-12-15 Profiles armored vehicles from the Middle East, Gulf War, and the twenty-first century.

Armoured Fighting Vehicles Philip Trewhitt, 2000
Marines Under Armor Kenneth Estes, 2013-04-11 In this story of men, machines and missions, Kenneth Estes tells how the U.S. Marine Corps came to acquire the armored fighting vehicle and what it tried to do with it. The longtime Marine tank officer and noted military historian offers an insider's view of the Corps's acquisition and use of armored fighting vehicles over the course of several generations, a view that illustrates the characteristics of the Corps as a military institution and of the men who have guided its development. His book examines the planning, acquisition, and employment of tanks, amphibian tractors, and armored cars and explores the ideas that led to the fielding of these weapons systems along with the doctrines and tactics intended for them, and their actual use in combat. Drawing on archival resources previously untouched by

researchers and interviews of both past and serving crewmen, Estes presents a unique and unheralded story that is filled with new information and analysis of the armored vehicles, their leaders, and the men who drove these steel chariots into battle. Such authoritative detail and documentation of the decisions to acquire, develop, and organize armored units in the U.S. Marine Corps assures the book's acknowledgement as a definitive reference.

Modern Armored Fighting Vehicles Thomas

Bruce, 2018-09-13 Armored vehicles are essentially armed and armored high mobility off-road vehicles. While their mobility aspects are clearly very important, there are many high mobility off-road vehicles not designed for military applications. Therefore the key defining aspects of an Armored Fighting Vehicle (AFV), as the name implies, is the armament they carry to inflict damage and the armor they possess as protection against damage. There has within recent years been a great number of exciting and innovative developments in critical AFV technologies. Key among these are significant enhancements to both armament and armor. The primary armament of an AFV consists of relatively large caliber guns that fire a range of ballistic munitions, including kinetic energy penetrators, high explosive, incendiary, and shaped-charge warhead tipped rounds. Some guns are also capable of firing anti-tank guided missiles. In addition to the main weapon, many AFV's are

also equipped with a range of secondary weapons including machine guns, grenade launchers, mortar tubes and missile launchers. These weapons and their capabilities in penetrating standardized armor is reviewed in detail in this volume. AFV armor is designed to protect the vehicle against both threats fired by other AFVs and threats originating from any other source, including buried mines, infantry portable weapons, air-launched missiles, artillery shells and improvised devices. Protection against each type of threat often requires a unique type of armor solution. These solutions are then layered onto the vehicle to provide the required protection. Vehicle armor systems include applique armor, spaced armor, reactive armor, cage armor, netted armor, electric armor, spall systems, dazzlers, jammers, and Active Protection Systems (APS). Each type of armor is covered in detail in this volume, both at a system level and with respect to their integration into specific AFVs. This volume covers the theory of AFV design, of armament performance and of armor design and performance. As well most modern AFVs are described and discussed. A modern AFV is considered to be one that was either designed over the last 20 years or is likely to continue to see service with front line combat troops for the foreseeable future. Main battle tanks, light tanks, reconnaissance vehicles, tracked and wheeled armored personnel carriers, infantry fighting vehicles and tank destroyers are covered.

Tank Michael E. Haskew, 2015-09-10 Explore the 100-year evolution of the tank and its role on the

battlefield, from World War I to today's armored fighting vehicles. From the Greek phalanx to Roman siege engines, plans by Leonardo da Vinci, and the wondrous imagination of H. G. Wells, the idea of the armored fighting vehicle--the tank--has crossed centuries and given rise to the technologically advanced land warfare systems that populate the armies of countries large and small today. First appearing during World War I as unwieldy boxes mounted on tractor chassis and prone to mechanical failure, tank designs evolved into sleek weapons with the now-classic characteristics of speed, mobility, and firepower. During the 1920s, American Maj. Gen. Adna Chaffee Jr., correctly predicted that mechanized armies would win the land battles of the future. Young US Army officers such as Dwight D. Eisenhower and George Patton risked their careers to champion the development of armored divisions. Modern tanks perform in both offensive and defensive roles, capable of exploiting breaches in enemy defenses and rapidly slashing into rear areas, disrupting communications, supply, and command and control. In *Tank: 100 Years of the World's Most Important Armored Military Vehicle*, noted military historian Michael E. Haskew is your guide to the complete 100-year history of these unparalleled machines. He starts with the development of early tanks, moves on to the uses of tanks in World War I, World War II, and the Cold War, and covers the modern armored fighting vehicles in use during the Gulf Wars and in conflicts right up to today.

Design and Development of Fighting Vehicles

Richard M. Ogorkiewicz, 1968

American Wheeled Armoured Fighting Vehicles

Michael Green, 2016-10-31 Numerous wheeled armoured fighting vehicles have seen service in the US armed forces on and off for over 80 years. There have been various changes of policy and twice, after the Second World War and Vietnam, they went out of favour but their use is now well established. This well researched and superbly illustrated book describes all the different types and variants since the first M1 was ordered in 1931. The M8 armoured car was widely used during World War Two but it was not until Vietnam that further wheeled AFVs came into service, notably the M706 armoured car. After a lull the US Marine Corps adopted the Light Armoured Vehicle (LAV) in 1983. The US Army first used armoured Humvees in 1994 and variants remain in service (M1141 and M1116). Other types today include the Guardian (M1117) and the Army version of the LAV names the [Stryker]. To meet the operational requirements of Iraq and Afghanistan the Mine Resistant Ambush Protected vehicle (MRAP) was ordered in bulk from 2007.

Russian Armored Fighting Vehicles
