**Armored Personnel Carriers** Michael Green, Gladys Green, 2005 Describes the M113 Armored Personal Carrier (or APC), including its history, equipment, weapons, tactics, and future use. Includes photo diagram.

**M113: American Armoured Personnel Carrier** BEN. SKIPPER, 2021-03-30 The M113 has become as much a recognisable part of the US military machine at war as the Bell UH-1 Iroquois and M16 assault rifle. Earning its stripes in the jungles and highlands of Vietnam, it became the most widely armoured vehicle of the campaign. Such was its prowess that the Viet Cong gave it the nickname Green Dragon on account of its ability to go virtually anywhere. Its ground-breaking aluminium hull gives the M113 a relatively low weight of 12ts, this allows it to be easily transported by air and gives it an amphibious ability. The design was also easy to modify and can carry a range of support and indirect fire weapons. From mortars to ballistic missiles, the M113 spawned a progeny of useful and innovative vehicles. The base M113 is lightly armoured and safe against only the lightest of small arms fire and shell splinter. As a result a range of up-armour packages have been used in the past, from sandbags to complex appliqué armour. 80,000 M113s of all types have been produced and are in use with over 50 countries, making it one of the most widely used armoured fighting vehicles to be produced. Indeed such was its popularity that the US bought their final M113s in as late as 2007. The M113 was designed and developed by the Food Machinery Corporation (FMC) to replace the heavier and less reliable steel-bodied M59 and M75 armoured personnel carriers. It was specifically designed to be lighter, air-portable and have amphibious capability. Carrying a crew of two, driver and commander, who

manned the M113's only weapon, a .50cal machine gun, the M113 would transport 11 soldiers into combat before withdrawing to the rear. Powered initially by a V8 petrol engine the M113 would be continuously up-engined throughout its frontline and subsequent rear support lifespan. Changes included improved suspension, smoke dischargers and externally fitted fuel tanks. Other changes have included armoured commander's turrets and slat armour. This LandCraft title looks at the M113s development where the FMC sought to utilise its chassis into as many roles as possible, from smoke generators to flamethrowers. The book also looks at how the M113 was adapted for use by numerous overseas customers and how these are upgraded to suit local conditions. Finally the title looks at the M113's changing roles in the more sophisticated contemporary battlescape and how it's still providing service in theatres across the world in a variety of roles, both combat and support. For the modeller there is nothing more important than the little things and this image-rich section of Land Crafts M113 title delivers the goods. Filled with crisp photos that show the M113's many details, combined with helpful accompanying text, forms an enviable visual guide for the enthusiast and modeller alike.

Zajackowski,2019-12-27 In the '30s, Americans began working on a modern vehicle for cavalry reconnaissance and artillery units in freshly formed armored and motorized units. The American command became interested in French half-track vehicle designs. On their basis the American industry proposed its own solutions. In 1938, White Motor Company created a vehicle called T-7, which was a combination of the design of the M3 scout car and the T-9 half-track transporter. Year later, a version with a more powerful engine was prepared. The new car was designated T-14 and used mainly by artillery units. In 1940, the project was renamed M2 and put into production.

**Jane's Armoured Personnel Carriers** Christopher F. Foss,1985-01-01 Photographs, line drawings, and text describe all post World War II wheeled and tracked armoured personnel carriers, mechanised infantry fighting vehicles, and internal security vehicles.

**Bradley** R. P. Hunnicutt,2015-09-15 This entry in R. P. Hunnicutt's unrivaled 10-volume history of American armored fighting vehicles focuses on the spectrum of armored personnel carriers with a focus on the Bradley fighting vehicle (BFV). Operations in WWII indicated a need for an armored vehicle with improved protection and reliable mobility for transporting soldiers in and out of battle. To address this need, development began on full-

tracked armored personnel carriers with overhead protection before WWII came to a close. Development continued into the postwar period. One result of this program was the M59 armored infantry vehicle, which was pioneered as a low-production-cost vehicle and had the added benefit of being amphibious, a quality that became required in all armored personnel carriers that succeeded it. In his trademark style, Hunnicutt surveys the development of each armored personnel carrier since the end of WWII, illustrating his detailed history with line drawings and photographs. He covers the development of the M113, which was employed successfully in Vietnam and served as the basis for a family of vehicles ranging from armored combat vehicles to unarmored cargo carriers. The success of the M113 as a fighting vehicle gave rise to the development of the Bradley fighting vehicle, which was intended for use by both infantry and cavalry units. With all the detail and precision readers have come to expect from R. P. Hunnicutt's histories of American armored vehicles, Bradley is the definitive work on the history of American fighting and support vehicles. An absolute must-have for anyone interested in American military history.

*Russia MRAPs, Armored Cars, Armored Personnel Carriers & Armored Assault Vehicles* Alexandre Zanfirov, 2021-03 1 March 2021 This book is intended as a primer with summary specifications for the various armored vehicles in the present-day Russian military. For more complete specifications of these vehicles, I recommend the TRADOC Worldwide Equipment Guide (WEG). Unfortunately, the WEG is only available online, so we downloaded (most) of the information and publish an extract of the Russian vehicles only (including

tanks) as a separate title (search russia ground combat vehicles). That book is available on Amazon.com. Note that the pictures on the cover are a graphical Table of Contents. The page number is written before the vehicle name. If you have ideas for future titles, let me know and I will see how much info is out there and try and publish suggested titles. *China MRAPS, Armored Cars, Armored Personnel Carriers and Armored Assault Vehicles*  
■■■ (Xīn ■■■ (Xīn Shìjiè), 2021-01-16 January 2021 This is probably the toughest book I've attempted. Partly due to the lack of open-source information available and partly because of the Covid-19 lockdown. Anyway, I decided to go ahead and publish what I have since there are so few books on the subject out there. This is just the start as there are a lot of vehicles out there and I plan to add the ones I missed. Please let me know which I missed and I will add them. I would like to crowd source this book and ask that readers go to our web site (USGOVPUB.com) and send me comments to fill in the information gaps. Rather than writing a negative review, how about sending me the suggested changes and improvements and I then update the text as soon as I get your comments? I plan to upload updates on the last day of the month if I get input. In any event, I will continue to research the missing information myself and make corrections as I find them. Note that the pictures on the cover are a graphical Table of Contents. The page number is written before the vehicle name. Also, I hate to see blank pages, so I placed the cover page for a few suggested titles you may be interested in looking at. If you have ideas for future titles, let me know and I will see how much info is out there and try and publish suggested titles.

Thank you for your continued support. 4th Watch publishing is a SDVOSB.
