Springfield Armory Alex MacKenzie,2015 Pres. George Washington authorized Springfield Armory to begin manufacturing small arms for the US military in 1794. Over nearly two centuries until its closure in 1968, the government armory at Springfield, Massachusetts, became legendary, not only for the arms provided to soldiers during conflicts such as the War of 1812, the Civil War, and World War II, but also for the way in which those arms were crafted. The drive to produce firearms of high quality and quantity for the nation's military created a need to improve manufacturing methods and machinery. Armory advancements, such as the interchangeability of parts, helped lay the groundwork of the American Industrial Revolution. Because of these efforts, Springfield Armory is recognized not only as a first-rate government arms manufacturer, but also as a hub of industry, attracting thousands of skilled men and women from around the world.

Documents of the 1913 Armory Show Kenyon Cox,2009 On February 17, 1913, the American Association of Painters and Sculptors opened the Armory Show in New York. The ad-hoc association had started out with the modest goal of showing some of the ¿new¿ art coming out of Europe--Duchamp, Matisse, Picasso and many more of today¿s acknowledged masters. What they ultimately created was a sprawling showcase of some of the most ground-breaking (many said subversive) art America had ever seen. This volume includes original documents from this exhibition, and collects the complete text of For and Against: Views on the Infamous 1913 Armory Show (ISBN 978-0-9823257-1-1) and The New Spirit: Pamphlets from the Infamous 1913 Armory Show (ISBN 978-0-9823257-2-8)

St. Louis Arsenal Randy R. McGuire,2001 On the afternoon of May 10, 1861, Army Captain Nathaniel Lyon marched out of the St. Louis Arsenal at the head of 7,000 Union Regulars and Volunteers to capture an encampment of nearly 700 reputed Confederate sympathizers at Camp Jackson on the western outskirts of St. Louis. It probably did not occur to him that he was embarking on a mission that would forever enshrine his name, and that of the Arsenal, in the annals of Civil War history. In words and images, St. Louis Arsenal: Armory of the West relates in detail the story of the Arsenal, from its founding in 1827 through its transition to cavalry post in 1872, then traces its new life and changing fortunes as the installation adapted its mission to meet the ever changing needs of the federal government. Such personalities as William Beaumont, Ulysses S. Grant, William Sherman, Robert E. Lee, Nathaniel Lyon, Daniel Frost, and many others who would claim a place in American military history once served at, or had dealings with, the St. Louis Arsenal.

Harpers Ferry Armory and the New Technology Merritt Roe Smith,1980-04-30 A study of the day-to-day operations of the U.S. armory at Harpers Ferry, Virginia, between 1798 and 1861, reveals the impact of the then new technology of mechanized production on organization, management, and worker morale.

Harpers Ferry Armory and the New Technology Merritt Roe Smith,2015-03-19 Focusing on the day-to-day operations of the U.S. armory at Harpers Ferry, Virginia, from 1798 to 1861, this book shows what the new technology of mechanized production meant in terms of organization, management, and worker morale. A local study of much more than local significance, it highlights the major problems of technical innovation and social adaptation in antebellum America. Merritt Roe Smith describes how positions of authority at the armory were tied to a larger network of political and economic influence in the community; how these relationships, in turn, affected managerial behavior; and how local social conditions reinforced the reactions of decision makers. He also demonstrates how craft traditions and variant attitudes toward work vis-à-vis New England created an atmosphere in which the machine was held suspect and inventive activity was hampered.Of central importance is the author's analysis of the drastic differences between Harpers Ferry and its counterpart, the national armory at Springfield, Massachusetts, which played a pivotal role in the emergence of the new technology. The flow of technical information between the two armories, he shows, moved in one direction only— north to south. In the end, Smith concludes, the stamina of local culture is paramount in explaining why the Harpers Ferry armory never really flourished as a center of technological innovation.Pointing up the complexities of industrial change, this account of the Harpers Ferry experience challenges the commonly held view that Americans have always been eagerly receptive to new technological advances.

New York 1913 Martin Green,1988 In this work, Green shows how two notable, seemingly quite disparate events of the pre-WW I era converged, both in time and place, and (more importantly) in their enthusiasm for radical art and radical politics. Champions of the Armory Show and the Paterson Strike Pageant interpreted these events as liberating forces from bourgeois tastes and bourgeois economics. Their common cause notwithstanding, Green notes the lines of divergence between these two celebrations and among their supporters, both then and in the years that immediately followed.

New York's Historic Armories Nancy L. Todd,2006-09-14 Winner of the 2007 Excellence in Historic Preservation Award presented by the Preservation League of New York State Winner of the 2007 Building Typology Award presented by the Metropolitan Chapter of the Victorian Society in America New York's Army National Guard armories are among the most imposing monuments to the role of the citizen soldier in American military history. In New York's Historic Armories, Nancy L. Todd draws on archival research as well as historic and contemporary photographs and drawings to trace the evolution of the armory as a specific building type in American architectural and military history. The result of a ten-year collaboration between the New York State Office of Parks, Recreation and Historic Preservation and the New York State Division of Military and Naval Affairs, this illustrated history presents information on all known armories in the state as well as the units associated with them, and will serve as a valuable reference for readers interested in general, military, and architectural history. Built to house local units of the state's volunteer militia, armories served as arms storage facilities, clubhouses for the militiamen, and civic monuments symbolizing New York's determination to preserve domestic law and order through military might. Approximately 120 armories were built in New York State from the late eighteenth century to the middle of the twentieth, and most date from the last quarter of the nineteenth century, when the National Guard was America's primary domestic peacekeeper during the post-Civil War era of labor-capital unrest. Together, New York's armories chronicle the history of the volunteer militia, from its emergence during the early Republican Era, through its heyday during the Gilded Age as the backbone of the American military system, to its early twentieth-century role as the nation's primary armed reserve force.

Richmond's Leigh Street Armory and African American Militia Roice D. Luke, Maureen Elgersman Lee & Stacy L. Burrs, Photography by Karl Elchinger, Captions by CW2 John W. Listman Jr., VaARNG (Ret.),2018 In 1895, the City of Richmond constructed the magnificent Leigh Street Armory for its African American militia. During Reconstruction, Virginia led the nation in establishing black militia units, and Richmond was the only city to build an armory for that use. These volunteer soldiers drilled and trained there, and many joined other volunteers to serve in the Spanish-American War. In 1899, the Leigh Street Armory ceased to serve its original function and became first a school and ultimately the home of the Black History Museum and Cultural Center of Virginia. Authors Roice Luke, Maureen Elgersman Lee and Stacy Burrs reveal the history of the Leigh Street Armory and its soldiers.
