📖 **IRON FIST: CLASSIC ARMoured WARFARE** BRYAN PERRETT,2012-10-11 The greatest tank battles of history from the Great War to the Gulf, examined by one of Britain’s bestselling military writers. The story of the evolution of armoured warfare in the 20th century, which has seen tanks and other armoured vehicles develop from lumbering, primitive and vulnerable Goliaths to the immensely potent and manoeuvrable agents of lightning battlefield success. This is a collection of the greatest moments of armoured history from the conception of the tank as a means to break the stalemate of the Western Front to Blitzkrieg, the great tank battles of the Second World War and the ‘mother of all battles’ in the Gulf in 1991.

📖 **ARMoured WARFARE** ALARIC SEARLE,2017-02-09 This book charts the history of armoured warfare from the first use of the tank in 1916 right through to the 21st century, adopting military, political and global perspectives. Alaric Searle explores the origins of the tank, the part it played in the First World War and its contribution to the outcome of the war. He considers its role as a tool of propaganda, the military controversies of the interwar period and the employment of armoured forces in all the major theatres in the Second World War. Since the First World War, major and medium-sized powers have invested heavily in armoured forces. Searle looks at the conduct of mechanised warfare in Korea, Indo-China and Vietnam, and during conflicts such as the Arab-Israeli Wars and the Gulf Wars. Armoured Warfare adopts a global perspective, providing the most comprehensive survey of the history of the subject currently available. With a detailed bibliography of both primary and secondary sources, it is an ideal companion for those studying armoured warfare, modern military history and war studies.

📖 **THE BLACK BULL** PATRICK DELAFORCE,2010-06-30 This WWII history chronicles the legendary British Armored Division in combat across northern Europe with veterans’ personal recollections. The British Army’s 11th Armored Division, famous for its Black Bull insignia, was famous for its courageous fighting during the Second World War. In this volume, Black Bull veterans tell the story of their division in their own words. Beginning with the Normandy invasions, they vividly describe the role they played in Operations Epsom, Goodwood and Bluecoat. They bring readers with them on the “Great Swan” through France and Belgium; the taking of Antwerp; Operation Market Garden; and the final slog into Germany across well-defended river barriers. They also recount stories of casualties and losses, the hardships of a winter campaign, and the comradeship and bravery it takes to persevere. Historian Patrick Delaforce provides a historical narrative that gives context to the personal accounts. Twelve Black Bull regiments are represented, with memories from troop commanders and riflemen, bombardiers and signalmen, tank crews, troop leaders, as well as the Division’s GOC, Major-General G.P.B. Roberts. The text is supplemented throughout with wartime photographs showing the division in action.

📖 **ARMoured GUARDSMAN** ROBERT BOSCOWAN,2008-12-23 “A rare treat: a well-written account of what it was like to serve as a junior rank in the Brigade of Guards during the Second World War.” —The Guards Magazine The outbreak of World War II brought many changes to Britain’s Brigade of Guards. The dress-parade units had always maintained a full combat capacity and made a relatively easy transition into a new unit, the Guards Armoured Division. The Guards landed in Normandy on 26 June 1944 and steadily fought their way across northern Europe. Robert Boscawen was a tank commander in the 1st Coldstream Guards and had four tanks shot from under him. On the fourth occasion he was badly wounded and burned, making a difficult postwar recovery. The years after the war, however, also brought both business and political success, culminating in a twenty-three-year career in Parliament. Boscawen’s account of Britain’s elite at war is based on his wartime diaries. “Tells the author’s story in a most readable yet matter-of-fact way. It is one of the finest accounts of armoured warfare that I have ever read and I have no hesitation in recommending it to anyone who has not.” —Tank Regiment Magazine

📖 **ARMoured WARFARE IN THE VIETNAM WAR** MICHAEL GREEN,2014-10-30 This pictorial history of the Indochina and Vietnam Wars captures the range of armored warfare used in the region through rare wartime photographs. The two conflicts that engulfed Indochina and Vietnam in the decades after World War II are generally thought of as infantry wars. But in fact, they both involved a significant amount of armored warfare. In this fully illustrated volume, military expert and Vietnam veteran Michael Green describes the many kinds of armored vehicles deployed and their contributions in combat. The ill-fated French Expeditionary Force of the Indochina War was largely equipped with World War II era American tanks—including M3 and M5 Stuart, M4 Sherman and M24 light tanks—as well as armored cars and half-tracks. Most of these eventually went to the Army of the Republic of Vietnam, but were outdated and ineffective due to lack of logistics and training. The US Army and Marine Corps build-up in the 1960s saw vast quantities of M48 Pattons, M113 APCs and many specialist variants and improvised armored vehicles arrive in the theatre. The Australians also brought their British Centurion tanks. But it was the Russians, Chinese and North Vietnamese who won the day and their T-38-85 tanks, ZSU anti-aircraft platforms.

📖 **MEN, IDEAS, AND TANKS** J. P. HARRIS,1995 Men, Ideas and Tanks reviews the development of British military ideas on armoured forces from 1903 to 1939. Great Britain was the nation which first developed the tank, first used it in action and first gained dramatic results by employment. The British continued to be world leaders in the field of mechanised warfare until the early 1930s. Now available in paperback for the first time, J. P. Harris original work offers new interpretations of the early history of British armoured forces and explains why Great Britain had lost the lead by the outbreak of the Second World War. This work will be of interest to all those concerned with British military history in the first half of the twentieth century, with the history of mechanised warfare and with the history of military thought.

📖 **ARMoured WARFARE IN THE KOREAN WAR** ANTHONY TUCKER-JONES,2013-01-19 This fully illustrated history explores the unique role of armored vehicles in the Korean War with more than 180 wartime photographs. After World War II, military analysts thought that the only place significant armored forces were ever likely to confront each other again was in central Europe where the NATO alliance would fend off the Soviet Red Army. But then during the Korean War of 1950-53, large numbers of armored fighting vehicles were deployed by both sides. This neglected aspect of the conflict is the subject of Anthony Tucker-Jones’s photographic history. Korea, with its rugged mountains, narrow passes, steep valleys and waterlogged fields. was not ideal tank country so the armor mainly supported the infantry and rarely engaged in battles of maneuver. Yet the wide variety of armor supporting UN and North Korean forces played a vital if unorthodox role in the swiftly moving campaigns. More than 180 contemporary photographs have been selected to show Soviet-built T-34/85s and Su-76s, American M4 Shermans, M26 Pershings and M46 Pattons, as well as British Cromwells and Centurions in one of the defining conflicts of the Cold War.

📖 **FIRST POLISH ARMoured DIVISION 1938-47** EVAN MCGILVRAY, JANUSZ JARZEMBOWSKI,2022-07-20 “If the Polish armed forces are of interest to you this title covering their distinguished service during World War II should appeal to many.” —Armorama The First Polish Armored Division was formed in Scotland in February 1942 from Polish exiles who had escaped first Poland and then France. Its commander, Stanislaw Maczek, and many of its men had previously served in Polish 10th Motorized Cavalry Brigade (10 BKS), which had taken part in the Polish invasion of Czechoslovakia in 1938 and given a good account of itself in the defense of Poland against German and Soviet invasion of 1939. Under Maczek’s leadership the division was trained and equipped along British lines in preparation for the invasion of France. Attached to 1st Canadian Army, the division was sent to Normandy in late July 1944. It suffered heavily during Operation Totalize but went on to play a crucial role in preventing an orderly German withdrawal from the Falaise Pocket by its stand at Hill 262. They then played their part in the advance across Western Europe and into Germany. This detailed history, supported by dozens of archive photos, concludes by looking at the often-poor treatment of Maczek and his men after the war. “A Polish armoured division comprising volunteers from Polish refugees—it reads like a story from the Boys Own Paper . . . Astonishing!” —Books Monthly

📖 **ARMoured WARFARE IN NORTHWEST EUROPE, 1944-1945** ANTHONY TUCKER-JONES,2013-07-19 This latest volume in Anthony Tucker-Jones’s series of photographic histories of armored warfare records in graphic detail the role played by tanks, infantry fighting vehicles and self-propelled artillery during the decisive campaign in northwest Europe in 1944-5. In a sequence of over 200 archive photographs he shows how American, British, Canadian, and Polish armored divisions spearheaded the assault on the Third Reich, and how the Wehrmacht mounted a desperate armored defense. Tanks were required to operate in the dust of Normandy, the mud and waters of the Scheldt and Rhine rivers and the snows of the Ardennes and the forests of Germany. A succession of crucial armored engagements was fought during the D-Day landings, Operation Goodwood and the struggle for the Bourguibus ridge, the Falaise Pocket, the Seine crossing, Arnhem, the German attack in the Ardennes, the Rhine crossing, in the Reichswald and during the rearguard actions and the last-ditch tank battles fought by the Panzers in the Ruhr before the German surrender. Anthony Tucker-Jones’s photographic survey of the ultimate tank battles of the Second World War illustrates the range of armored fighting vehicles that were developed during the conflict, and it features the specialized vehicles deployed in Europe for the first time such as the Buffalo, DUKW, Weasel and Terrapin.

📖 **ARMoured WARFARE** J. P. HARRIS,F. H. TOASE,1990 J.P.HARRIS AND F.H.TOASE PRESENT A DOCUMENTED ACCOUNT OF ARMoured WARFARE WORLDWIDE AND LOOK TOWARDS ITS FUTURE. ARMoured FORCES HAVE PLAYED DRAMATIC ROLES IN THE 20TH CENTURY AND THEIR OPERATIONS HAVE HELPED SHAPE TODAY’S WORLD. THIS CONTEMPORARY AND WIDE-RANGING ANALYSIS, WITH CONTRIBUTIONS BY EIGHT EXPERTS ON MILITARY AFFAIRS, SHOWS WHAT A CRUCIAL ROLE ARMOUR CONTINUES TO PLAY TODAY.

📖 **ARMoured WARFARE IN THE ITALIAN CAMPAIGN, 1943-1945** ANTHONY TUCKER-JONES,2013-09-19 This WWII pictorial history illustrates the wide array of armored vehicles deployed by Allied and Axis powers in Italy. The Second World War campaigns in North Africa, on the Eastern Front and in northwest Europe were dominated by armored warfare, but the battles in Italy were not. The Italian peninsula’s mountainous terrain was best suited to an infantry war. Yet from the Allied landings in Sicily in 1943 to the German surrender after the crossing of the Po in 1945, tanks, self-propelled guns and armored cars were essential elements in the operations of both sides. Anthony Tucker-Jones’s selection of rare wartime photographs shows armor in battle at Salerno, Anzio and Monte Cassino, during the struggle for the Gustav Line, the advance on Rome and the liberation of northern Italy. These dramatic images reveal the full array of Axis and Allied armored vehicles that was deployed, including German Panzers, Panthers, and Tigers and Allied Stuarts, Chaffees, Shermans and Churchills. They also vividly illustrate the Italian landscapes over which the campaign was fought and

THE GRUELING CONDITIONS ENDURED BY THE MEN WHO FOUGHT IN IT.

🔗 **AMERICAN WHEELED ARMoured FIGHTING VEHICLES** MICHAEL GREEN,2016-10-31 Numerous wheeled armoured fighting vehicles have seen service in the US armed forces on and off for over 80 years. There have been various changes of policy and twice, after the Second World War and Vietnam, they went out of favour but their use is now well established. This well researched and superbly illustrated book describes all the different types and variants since the first M1 was ordered in 1931. The M8 armoured car was widely used during World War Two but it was not until Vietnam that further wheeled AFVs came into service, notably the M706 armoured car. After a lull the US Marine Corps adopted the Light Armoured Vehicle (LAV) in 1983. The US Army first used armoured Humvees in 1994 and variants remain in service (M1141 and M1116). Other types today include the Guardian (M1117) and the Army version of the LAV names the Stryker🔗 . To meet the operational requirements of Iraq and Afghanistan the mine resistant ambush protected vehicle (MRAP) was ordered in bulk from 2007.

🔗 **ARMoured WARFARE AND HITLER’S ALLIES, 1941-1945** ANTHONY TUCKER-JONES,2013-07-19 This WWII pictorial history sheds light on the armored fighting vehicles built and deployed by Italy, Hungary and other Axis powers on the Eastern Front. In discussions of Second World War military vehicles, German, American and British tanks are given the most focus. Meanwhile, the tanks, self-propelled guns and armored cars built and deployed by Hitler’s Axis allies, have been almost forgotten. Both the rarity of these fighting vehicles and the vital roles they played in battle make them a fascinating subject of photographic history. This selection of previously unpublished wartime photographs provides a visual record of the armored forces thrown into action by Hitler’s allies on the Eastern Front from 1941 to 1945. Illustrated here are the panzers deployed by Bulgaria, Finland, Slovakia, Hungary, Italy and Romania on the Eastern Front and in the Balkans. Hungary’s home-made armor included the Toldi and Tur🔗 n tanks and Zr🔗 nyi self-propelled guns. The Italians produced CV-33 tankettes, Semovente self-propelled guns, Autoblinda and Lancia armored cars and a series of tanks. Romanian and Czech tanks and assault guns were also deployed.

🔗 **ARMoured WARFARE IN THE BATTLE FOR NORMANDY** ANTHONY TUCKER-JONES,2012-07-19 This fully illustrated WWII history offers a vivid look at the armored vehicles used by Allied and Nazi forces during D-Day and the Normandy Campaign. The remarkable photographs collected here illustrate in graphic detail the role armor played in the Allied D-Day landings and the liberation of occupied France—as well as the skill and tenacity of the German panzer units that confronted them. The struggle gave rise to a sequence of battles that were among the most intense, and critical, of any fought in the Second World War. Anthony Tucker-Jones traces the course of the armored campaign through these striking wartime photographs: the D-Day landings, the first clashes of the opposing tanks and anti-tank guns, then the Allied operations that culminated in the Allied breakthrough and the destruction of the German 5th Panzer Army at Falaise. The images offer a fascinating inside view of the fighting itself and of the widespread destruction it caused. But they also record the routines of tank warfare, and give a vivid impression of the experience of the tank crews of the day and of the tanks they operated, including the German Mk IVs, Panthers, and Tigers, and the Allied Shermans, Churchills and specialized tanks, such as Hobart’s Funnies, that confronted each other in France.

🔗 **HUNGARIAN ARMoured FIGHTING VEHICLES IN THE SECOND WORLD WAR** EDUARDO MANUEL GIL MART🔗 nez,2019-12-27 The actions of the German armoured forces during the Second World War is well known. What has not yet been so well told are the actions of the armoured forces from Germany’s allies. While it is true that their performance was generally quite secondary in comparison to the Reich,the actions of the Hungarian armoured forces should be highlighted. Hungary not only managed to organize its armoured forces, but developed its own military industry that was able to supply weapons and equipment to its troops. The Hungarian military was able to produce all kinds of weapons, vehicles and armoured vehicles, although they were generally under-gunned and under-armoured. This book rescues Hungary’s participation during the Second World War from oblivion through the use of superb photographs, which take the reader from the beginning of the USSR campaign and the conquest of Soviet lands, before ending with the bloody battles to avoid the Soviet and Romanian advance into Hungary (the Siege of Budapest) and the last clashes in Austrian and Slovenian territory before the army’s unconditional surrender. The author highlights the bravery and courage of these men, as well as the terrible fate of the Hungarian armoured forces when the Soviet Army invaded Hungary.

🔗 **ARMoured WARFARE IN THE NORTH AFRICAN CAMPAIGN** ANTHONY TUCKER-JONES,2011-12-13 The North African campaign, the struggle of the Italians and Germans against the Allies in Egypt, Libya and Tunisia between 1940 and 1943, was a war of movement and maneuver, of dramatic changes of fortune, and it was a war in which mechanized forces—tanks in particular—excelled. Compared with the heavily populated landscapes of northwest Europe, the empty open spaces of North Africa appeared to be ideal operating terrain for tanks, yet the harsh desert conditions tested men and machinery to the limit, as Anthony Tucker-Jones demonstrates in this remarkable selection of wartime photographs. The use of armor during the entire course of the campaign is covered, from the initial Italian offensive, the arrival of Rommel’s Panzergruppe Afrika, the battles fought along the North African shore which culminated in El Alamein, then the Allied advance into Tunisia which led to the final defeat of the German and Italian armies. The images give a fascinating inside view of combat, but they also reveal the daily routines of tank warfare 65 years ago, and give a vivid impression of what it was like to fight in and live with the tanks of the day the German Mk IIIs and Mk IVs and the Tiger, the British Matildas and Valentines and the American Grants and Shermans that contributed so much to the Allied victory. Training, maintenance, transportation and supply are shown, as are the daily lives of the tank crews and extreme conditions in which they worked and fought.

🔗 **BRITISH ARMoured DIVISIONS AND THEIR COMMANDERS, 1939-1945** RICHARD DOHERTY,2013-07-16 A total of eleven British armoured divisions were formed during the 1939-1945 war but, as this highly informative book reveals, just eight saw action.??In 1940 only 1st Armoured Division faced the German blitzkrieg and it was in the North African desert that armoured divisions came into their own. The terrain was ideal and six such divisions of Eighth Army fought Rommel’s Panzers into submission. Three were disbanded prior to the invasion of Sicily and Italy. The campaign from D-Day onwards saw the Guards Armoured, 7th Armoured (the Desert Rats), 11th and Percy Hobart’s 79th Armoured Division in the thick of the action.??Of particular interest are the men who commanded these elite formations and the way their characters contributed to the outcome of operations. While some, such as Dick McCreery, went onto greater heights, others did not make the grade; the stakes were high. A number, such as ‘Pip’ Roberts, were just perfectly suited in the role.??Written by a leading military historian, this book describes many fascinating aspects of armoured warfare from its uncertain beginnings, through the development of tactics and the evolving tank design. Due to British deficiencies, reliance had to be placed on US Grants and Shermans, with the Comet coming late and the Centurion too late.??The combination of gripping historical narrative and well researched fact make this an invaluable and highly readable work on the contribution of British Armoured Divisions to victory in the Second World War.

🔗 **ARMoured WARFARE IN THE FIRST WORLD WAR 1916-18** ANTHONY TUCKER-JONES,2016-11-30 A hundred years ago, on 15 September 1916, on the Western Front during the Battle of the Somme, the tank made its debut on the battlefield. The first tanks were crude, unreliable, vulnerable weapons, but they changed the character of land warfare forever, and Anthony Tucker-Jones’s photographic history of these pioneering armored vehicles is the ideal introduction to them. In a selection of over 150 archive photographs he offers a fascinating insight into the difficult early days of this innovative new weapon, describing its technical history and its performance in combat. While the Battle of Cambrai in 1917 is often held up as the first large-scale tank battle, tanks had already served at Flers-Courcelette on the Somme, during the Nivelle offensive and the battles of Messines and Passchendaele. His book shows that the development of the tank was fraught with technical obstacles and battlefield setbacks. It was invented by the British and the French at almost the same time to help break the deadlock of trench warfare, and the British deployed it first in 1916. Belatedly the Germans followed the British and French example. The initial designs were continuously refined during two years of intense warfare. Finding the right balance between power and weight, getting the armament right, and working out the best tactics for tanks on the battlefield was a tricky, often deadly business.

🔗 **ARMoured WARFARE AND THE WAFFEN-SS, 1944-1945** ANTHONY TUCKER-JONES,2017-04-30 Over 150 wartime photographs give a graphic snapshot of the dramatic tank battles fought by the Waffen-SS Panzer and Panzergrenadier divisions during 1944-5 on both the Eastern and Western fronts. By this stage of the Second World War these formations were at the height of their powers and took part in major armoured operations in Russia, France, the Netherlands, and Poland. As the Wehrmacht retreated the Waffen-SS played an increasingly important role. Most notably their panzers prolonged the war by staving off defeat at Arnhem and Wolomin, stabilizing both the Western and Eastern fronts at critical points in the fighting. The photographs and the accompanying narrative record the contrasting conditions they faced on each battlefront and the weapons and equipment they used, especially the armored vehicles, including the Tiger and Panther tanks, which were among the best designs the Germans produced. But they also record the crimes committed by members of the Waffen-SS against civilians and captured enemy soldiers during the series of brutal, often desperate operations mounted to stave off German defeat. Anthony Tucker-Jones’s photographic history is a fascinating introduction to these elite units during the final phase of the fighting in Europe.

🔗 **ARMoured WARFARE IN THE BATTLE OF THE BULGE, 1944-1945** ANTHONY TUCKER-JONES,2018-10-30 The Battle of the Bulge took the Allied armies by surprise in 1944. It was a result of the extraordinary recovery of Hitler’s Panzer divisions following crushing defeats on the Eastern and Western fronts. In a daring offensive he hoped his panzers would un hinge the American and British push on the Rhine by charging through the Schnee Eifel, thereby prolonging the war. The consequence was one of the best-known battles of the entire conflict, and Anthony Tucker-Jones’s photographic history is the ideal introduction to it. The story is told through a sequence of revealing contemporary photographs and a concise text. They give a sharp insight into the planning and decision-making, the armored forces involved, the terrain and the appalling mid-winter conditions, the front-line fighting and the experience of the troops involved. The armored battle, which was critical to the outcome, is the main focus. Through a massive tank offensive the Germans aimed to cut through the US 1st Army to Antwerp and Brussels, in the process trapping three Allied armies. The confusion and near collapse of the Americans as their defenses were overrun is vividly recorded in the photographs, as is their resistance and recovery as the German spearheads were slowed, then stopped.
