

Armoured Personnel Carrier

Michael Cecil

Armored Personnel Carriers Michael Green, Gladys Green, 2005 Describes the M113 Armored Personal Carrier (or APC), including its history, equipment, weapons, tactics, and future use. Includes photo diagram.

M113: American Armoured Personnel Carrier BEN. SKIPPER, 2021-03-30 The M113 has become as much a recognisable part of the US military machine at war as the Bell UH-1 Iroquois and M16 assault rifle. Earning its stripes in the jungles and highlands of Vietnam, it became the most widely armoured vehicle of the campaign. Such was its prowess that the Viet Cong gave it the nickname Green Dragon on account of its ability to go virtually anywhere. Its ground-breaking aluminium hull gives the M113 a relatively low weight of 12ts, this allows it to be easily transported by air and gives it an amphibious ability. The design was also easy to modify and can carry a range of support and indirect fire weapons. From mortars to ballistic missiles, the M113 spawned a progeny of useful and innovative vehicles. The base M113 is lightly armoured and safe against only the lightest of small arms fire and shell splinter. As a result a range of up-armour packages have been used in the past, from sandbags to complex appliqué armour. 80,000 M113s of all types have been produced and are in use with over 50 countries, making it one of the most widely used armoured fighting vehicles to be produced. Indeed such was its popularity that the US bought their final M113s in as late as 2007. The M113 was designed and developed by the Ford Machinery Corporation (FMC) to replace the heavier and less reliable steel-bodied M59 and M75 armoured personnel carriers. It was specifically designed to be lighter, air-portable and have amphibious capability. Carrying a crew of two,

driver and commander, who manned the M113's only weapon, a .50cal machine gun, the M113 would transport 11 soldiers into combat before withdrawing to the rear. Powered initially by a V8 petrol engine the M113 would be continuously up-engined throughout its frontline and subsequent rear support lifespan. Changes included improved suspension, smoke dischargers and externally fitted fuel tanks. Other changes have included armoured commander's turrets and slat armour. This LandCraft title looks at the M113s development where the FMC sought to utilise its chassis into as many roles as possible, from smoke generators to flamethrowers. The book also looks at how the M113 was adapted for use by numerous overseas customers and how these are upgraded to suit local conditions. Finally the title looks at the M113's changing roles in the more sophisticated contemporary battlescape and how it's still providing service in theatres across the world in a variety of roles, both combat and support. For the modeller there is nothing more important than the little things and this image-rich section of Land Crafts M113 title delivers the goods. Filled with crisp photos that show the M113's many details, combined with helpful accompanying text, forms an enviable visual guide for the enthusiast and modeller alike.

American Wheeled Armoured Fighting Vehicles Michael Green, 2016-10-31 Numerous wheeled armoured fighting vehicles have seen service in the US armed forces on and off for over 80 years. There have been various changes of policy and twice, after the Second World War and Vietnam, they went out of favour but their use is now well established. This well researched and superbly illustrated book describes all the different types and variants since the first M1 was ordered in 1931. The M8 armoured car was widely used during World War Two but it was not until Vietnam that further wheeled AFVs came into

service, notably the M706 armoured car. After a lull the US Marine Corps adopted the Light Armoured Vehicle (LAV) in 1983. The US Army first used armoured Humvees in 1994 and variants remain in service (M1141 and M1116). Other types today include the Guardian (M1117) and the Army version of the LAV names the  Stryker . To meet the operational requirements of Iraq and Afghanistan the Mine Resistant Ambush Protected vehicle (MRAP) was ordered in bulk from 2007.

The Encyclopedia of Tanks and Armoured Fighting Vehicles Christopher F. Foss, 2002 Tanks and armoured fighting vehicles have revolutionised modern warfare, dominating the battlefield in conflicts all over the world with their firepower, armour and mobility. Featured in this book are over 900 tanks, armoured personnel carriers, self-propelled guns, reconnaissance vehicles and armoured cars.

The Complete Guide to Tanks and Armoured Fighting Vehicles George Forty, Jack Livesey, 2012 This features over 400 vehicles and 1200 wartime and modern photographs. It features A - Z visual directories of tank destroyers, command versions, specialized tanks, armoured cars, armoured personnel carriers and self-propelled artillery. It is an illustrated history of the world's most important tanks and AFVs from the beginning of the 20th century to the present day. It covers a range of tracked and wheeled vehicles, including the No. 1 Lincoln Machine Little Willie, D-Day Funnies, Jeep Multi-Role Vehicle, M3 Half-Track Infantry Carrier, Challenger 2 Main Battle Tank, Scud Missile System, Warrior Mechanised Combat Vehicle and many more. Specification boxes provide at-a-glance information about each vehicle's official name, country of origin, date, crew, weight, dimensions, armament, armour, powerplant and performance. This book is an authoritative history and directory of tanks and their immediate derivatives, such as ARVs

(armoured recovery vehicles), tank destroyers, command versions, bridgelayers, mine-clearers and other Funnies, and AFVs such as armoured cars, armoured personnel carriers and self-propelled artillery, covering a vast range of wheeled, tracked and semi-tracked vehicles. From the world's first tank, Little Willie, to the contemporary M1A2 Abrams Main Battle Tank, the book covers a vast range of tanks and AFVs. This unique volume, with over 1200 wartime and museum photographs, brings together the most significant tanks and AFVs in military history.

Warrior Mechanised Combat Vehicle 1987–94 Christopher Foss, 1994-07-28 The Warrior has been an important component of the British Army since the first production example was handed over in May 1987. It has seen action in many parts of the globe and the British Army alone uses eight different specialised versions of the vehicle, while Desert and Arctic Warriors are also produced for countries with extreme climates. In this authoritative text Christopher Foss examines the development and operational life of the Warrior, the British army's most modern armoured personnel carrier, and its many variants, focussing on its role in 'Desert Storm' and other campaigns.

Armored Personnel Carrier M2/M3/M4 Half-Track Slawomir Zajackowski, 2019-12-27 In the '30s, Americans began working on a modern vehicle for cavalry reconnaissance and artillery units in freshly formed armored and motorized units. The American command became interested in French half-track vehicle designs. On their basis the American industry proposed its own solutions. In 1938, White Motor Company created a vehicle called T-7, which was a combination of the design of the M3 scout car and the T-9 half-track transporter. Year later, a version with a more powerful engine was prepared. The new car

was designated T-14 and used mainly by artillery units. In 1940, the project was renamed M2 and put into production.

M2/M3 Bradley Infantry Fighting Vehicle 1983–95 Steven J. Zaloga, 1996-01-15 One of the most sophisticated armoured fighting vehicles in the world, the M2/M3 Bradley is the United States equivalent of the British Warrior, combining the role of personnel carrier with the formidable armament of a 25mm cannon and TOW anti-tank missiles. With a maximum road speed of 66kmh it also has a degree of manoeuvrability dreamed of by other armoured vehicles. In this book Steven Zaloga examines the different variants of the Bradley in detail and looks at the changing tactical requirements of the US Army for an armoured personnel carrier.

US Cold War Tanks and Armoured Fighting Vehicles Michael Green, 2019-08-30 This expert study of the U.S. military's armored vehicles deployed during the Cold War features rare photographs from the wartime archives. To counter the Soviet threat and that of their client States during the Cold War years 1949-1991, the American military deployed an impressive range of main battle tanks and armored fighting vehicles. Expert author Michael Green presents a detailed study of these vehicles and their variants in this informative volume of stunning wartime photographs. The Patton series of medium main battle tanks—including the M46, M47 and M48—supplemented by the M103s Heavy Tank initially formed the core of the US tank fleet. In 1960 the M60 MBT entered service and, in turn, was replaced by the M1

Abrams in 1980. In support were armored reconnaissance vehicles, progressively the M41 bull dog (1951); the M114 (1961), the M551 Sheridan (1967) and M3 Bradley Cavalry Fighting Vehicle (1981). The armored personnel carrier range included the ubiquitous M113 and its replacement the M2 Bradley, cousin of the M3. All of these vehicles are covered in this highly detailed volume in the Images of War series.
