*American Wheeled Armoured Fighting Vehicles* Michael Green, 2016-10-31

Numerous wheeled armoured fighting vehicles have seen service in the US armed forces on and off for over 80 years. There have been various changes of policy and twice, after the Second World War and Vietnam, they went out of favour but their use is now well established. This well researched and superbly illustrated book describes all the different types and variants since the first M1 was ordered in 1931. The M8 armoured car was widely used during World War Two but it was not until Vietnam that further wheeled AFVs came into service, notably the M706 armoured car. After a lull the US Marine Corps adopted the Light Armoured Vehicle (LAV) in 1983. The US Army first used armoured Humvees in 1994 and variants remain in service (M1141 and M1116). Other types today include the Guardian (M1117) and the Army version of the LAV names the "Stryker". To meet the operational requirements of Iraq and Afghanistan the Mine Resistant Ambush Protected vehicle (MRAP) was ordered in bulk from 2007.

Early US Armor Steven J. Zaloga, 2018-02-22 The first American armoured cars began to emerge around the turn of the century, seeing their first military use in 1916 during the Punitive Expedition against Pancho Villa. When the United States entered World War I, the American Expeditionary Forces used some armoured cars in France, and American armoured cars were used by the French Army. The inter-war years saw considerable innovation and

experimentation in armoured car design. Of the 1930s scout car designs, the M3A1 scout car was good enough to be produced in very large numbers in World War II, and was widely exported to many other armies via Lend-Lease. It also served as the basis for the late M2 and M3 armoured half-tracks. In this study, using detailed full colour plates and rigorous analysis, US armour expert Steven J. Zaloga chronicles the development of the US armoured car in the years leading up to World War II.

Chobham Armour William Suttie, 2022-10-27 A comprehensive overview of the work of the Military Vehicles Research and Development Establishment on Chobham Common, which provided armoured vehicles for the British Army from 1945 to its close in 2004. Through much of World War II British tanks and armoured vehicles were outmatched by the German tanks they encountered and this led to the British Army placing much emphasis on ensuring that the same situation would not arise again if the Cold War turned hot. The task of developing the Main Battle Tanks and supporting armoured vehicles to out-range and quickly destroy the Soviet threat fell to the scientists and engineers at the Fighting Vehicle Research and Development Establishment on Chobham Common near to Chertsey. It was the design authority for all British Military vehicles for most of the period. Military vehicle and equipment expert William Suttie draws extensively on official MOD reports to tell the story of the development of the British Cold War armour, such as the Centurion, Chieftain, Challenger, and many other wheeled and tracked armour

vehicles that served the British Army of The Rhine. The vehicles developed at the Chertsey site were never used for their intended purpose on the plains of North-west Germany, but have proved their worth in British operations in places like Korea, Bosnia, Kuwait, Iraq and Afghanistan, as well as in the hands of other users around the world. Fully illustrated with photographs, schemes and drawings, including some that have never been published before, this is a unique detailed overview of the development of all post-war British armoured vehicles.

Tank Michael E. Haskew, 2015-11-02 Military historian Michael E. Haskew profiles the entire history of the mechanized juggernaut that changed the face of military engagement 100 years ago.

The Rolls-Royce Armoured Car David Fletcher, 2012-04-20 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a

final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

**Soviet Armoured Cars 1936–45** Jamie Prenatt, 2020-10-29 The armoured car has an important place in the early history of Soviet armoured fighting vehicles (AFVs) – they were the most important AFV during the Russian Civil War and figured prominently in the mechanization of the Red Army that began in late 1929. The 1930s saw the development and production of a wide variety of armoured cars, which were used extensively in Soviet conflicts from then on. They saw service in the Spanish Civil War, in the 1939 Manchurian conflict with Japan, and in the occupation of the Baltic states and the invasion of Poland and Finland. Although many of its armoured cars were lost in the early months following the German invasion in June 1941, Russia continued with its armoured car development program, and the final model, the BA-64, was accepted for service in 1942 with over 9,000 built before production ended in 1946. This detailed book provides a survey of Russian armoured cars from 1936 to 1945, focusing on the history, design, and specifications of the wheeled armoured cars that entered series production, including the rail variants and tracked BA-30. Packed with photographs, cross-sections, and stunning battleplates, this is a comprehensive guide to some of the Red Army's fastest AFVs.

**LAV-25** James D'Angina, 2011-11-20 The Light Armored Vehicle 25 (LAV-25) has played a significant role in transforming United States Marine Corps doctrine since its introduction in the early 1980s. The Marine Corps' Light Armored Vehicle program was based on the proven Swiss MOWAG Piranha series of 4x4, 6x6, and 8x8 wheeled vehicles. However, developing organizational units, tactics, and employment of the weapon system within the force structure of the Marine Corps proved to be more of a challenge than fielding the weapon system. This resulted in multiple re-designations for LAV units within the Corps. The LAV first saw combat in Panama during Operation Just Cause and LAV-25s have fought in every major conflict since, including Operation Enduring Freedom, and Operation Iraqi Freedom. This book covers the design, development, and deployment of this continually successful vehicle.

**The Encyclopedia of Tanks and Armoured Fighting Vehicles** Christopher F. Foss, 2002 Tanks and armoured fighting vehicles have revolutionised modern warfare, dominating the battlefield in conflicts all over the world with their firepower, armour and mobility. Featured in this book are over 900 tanks, armoured personnel carriers, self-propelled guns, reconnaissance vehicles and armoured cars.

*Staghound Armored Car 1942–62* Steven J. Zaloga, 2011-12-20 The Staghound was a unique World War II armored vehicle designed and manufactured in the US, but intended solely for the British army. Since its combat debut in Italy in 1943 until the end of the war it had performed particularly valuable service in a reconnaissance role where its speed and armor ensured that it was able to extricate itself from trouble as required without additional support. This book examines the development of this category of armored cars and offers a detailed analysis of the extensive combat use of the Staghound in British service as well as in the service of other Allied countries including Canada, New Zealand and Poland.

**The Complete Guide to German Armored Vehicles** David Doyle, 2019-05-07 The

market's most comprehensive guide to German combat vehicles. The Complete Guide to German Armored Vehicles is an encyclopedia of all the armored vehicles used by the Nazis in World War II. At over four hundred pages and with over six hundred photos, many of which never before seen by the public, this volume becomes the market's most comprehensive on the subject. David Doyle, award-winning author of dozens of books on the subject, provides mechanical information, photos, and usage history for: • Armored cars • Half-tracks • Tanks • Assault guns • Jagdpanzers • Panzerjagers • Self-propelled guns, howitzers, and mortars • Flakwagens • Flammpanzers • Recovery vehicles • Armored Engineer vehicles An encyclopedic resource by an authority on the subject, The Complete Guide to Armored Vehicles is a must-have for modelers, gamers, and WWII buffs alike.

Modelling Armoured Vehicles Gary Edmundson, Steve van Beveren, Graeme Davidson, Jim Carswell, Tom Cockle, 2011-03-15 Designed to appeal to all armour modellers from the beginner to the veteran this book details all the steps involved in creating a realistic and attractive model armoured vehicle. Each chapter is illustrated with a range of models covering the whole spectrum of armour modelling, including World War II armour as well as more modern subjects. The authors also cover techniques and subject areas in which they individually excel, highlighting the different tools and approaches required for each individual discipline. Lavishly illustrated with over 250 images, this book contains all the detailed, step-by-step information you need to become an expert armour modeller.

**Early US Armor** Steve Zaloga, 2018

**British Armoured Car Operations in World War I** Bryan Perrett, 2023-08-17 Readers have come to expect a level of detail and critical rigour from the established military historian and author Bryan Perrett. They will not be disappointed at all here by this new publication. Focussing predominantly on the British armoured car units of World War One, it also untangles many fascinating strands forming the history of modern warfare. Full of detail, it acquaints the reader with the complete history of the armoured car, from invention onwards, setting the history of its Great War service career firmly

in context. Well written in an accessible style, this publication serves as an impressive tribute to the armoured car, one of the most effective weapons utilised by the allies during the course of the Great War.

*Axis Armoured Fighting Vehicles of the Second World War* Michael Green, 2018-03-30 During the Second World War the Axis powers, most prolifically the Germans, deployed a vast array of armored fighting vehicles to support their tanks and infantry. These included tank destroyers, reconnaissance vehicles, flame-thrower vehicles, and self-propelled artillery pieces. Armored tank destroyers, such as the Marder series, the Nashorn, Jagdpanther, Jagdtiger and the turretless German Stu III series (based on the Panzer III medium tank), helped the Nazis overcome their shortage of tanks. Copying the Stu III series the Italians created the turretless Semovente da 75/18 assault gun and the Hungarians the turretless Zrinyi. In the role of self-propelled artillery the German fielded the Hummel, the Wespe and the Grille while the Brummbär and the Sturmtiger performed in the dedicated assault gun role. For armored reconnaissance German industry came up with a series of capable armored cars; examples were the eight-wheel Puma and the full-tracked Luchs reconnaissance tank. The Italians developed the impressive four-wheel Autoblinda armored cars. Specialized antiaircraft tanks such the Möbelwagen, Wirbelwind and the Ostwind gave some protection against the ever more powerful Allied air forces. This fine book covers all these variants and many more besides in words and rare images and will delight readers,

collectors, model-makers and war-gamers.

Italian Armoured & Reconnaissance Cars 1911–45 Filippo Cappellano, Pier Paolo Battistelli, 2018-07-26 The first Italian armoured cars were used in the war in Libya in 1911-12 against the Ottoman Empire. With few tanks being developed, the Italians relied instead on the development of more mobile armoured cars like the Ansaldo Lancia 1 Z, during World War I, but post-war the army, focusing on the Alpine battlegrounds of Italy's northern borders, did not consider armoured cars suitable for reconnaissance duties. The experience of the Spanish Civil War would provide the much needed last push for the Italians to develop modern armoured cars. The result were the famous AB 41-43 models, which fought against the British in North Africa and Marshall Tito's forces in Yugoslavia, along with other vehicles such as the AS 36 light armoured car. Using detailed colour plates and contemporary photographs, this book examines the development of the Italian armoured car in the two world wars and the inter-war years, from the deserts of North Africa to the slopes of the Alps.

*BMP Infantry Fighting Vehicle 1967–94* Steven J. Zaloga, 2013-06-20 The Russian BMP infantry fighting vehicle (IFV) was one of the most significant innovations in infantry tactics in the latter half of the 20th century. Built in response to the threat of nuclear warfare, it was the world's first IFV, providing the infantry squad with unprecedented firepower, mobility and protection. With over 55,000 manufactured since 1966, the BMP is also

numerically one of the most important armoured vehicles ever built. This richly illustrated book examines the development and design of the BMP, detailing its armaments, performance in combat and variants.

**Tank** DK,2017-04-04 Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armored vehicles. In 1916, the British built a vehicle that could pound the battlefield impervious to enemy fire, crushing obstacles and barbed wire in its path. The first tank, or Mother as it was known, had arrived. In Tank you can view it in detail, along with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat – the fastest armored fighting vehicle ever. This comprehensive volume takes you through the most exciting story in recent military history with the development of heavy artillery, anti-tank weaponry, and the men – such as Mikail Koshkin and Sir William Tritton – who designed these awe-inspiring beasts. Produced with The Tank Museum, Tank traces the tank's development in response to two world wars, Korea, Vietnam, the Cold War and many other conflicts. It shows each model in detail, highlighting details such as their performance, specification, armor, weaponry, and much more. If you are interested in modern warfare, Tank is truly unmissable reading.

Ford M8 and M20 David Doyle,2021-04-28 Developed to provide the US military with a fast-moving reconnaissance vehicle sufficiently armed to knock out

WWII-era armored vehicles. The M8 Armored Car and its sibling, the M20 Armored Utility Vehicles, were the most widely used armored vehicles built by Ford. These vehicles saw use with the US Army as well as Allied nations during WWII and well into the 1960s. This book chronicles the development and use of the vehicle from concept to combat. Through dozens of archival photos, many never before published, as well as detailed photographs of some of the finest existent examples of these vehicles, this iconic tank is explored, and its history is explained.
