Theory and Practice of Pile Foundations Wei Dong Guo,2012-11-14 Pile Foundations are an essential basis for many structures. It is vital that they be designed with the utmost reliability, because the cost of failure is potentially huge. Covering a whole range of design issues relating to pile design, this book presents economical and efficient design solutions and demonstrates them using real world examples. Coverage includes nonlinear response of single piles to vertical or torsional loading and to cyclic lateral loading, as well as prediction of nonlinear response of lateral pile groups, vertically loaded pile groups and the design of slope stabilising piles. Most solutions are provided as closed-form expressions. Theory and Practice of Pile Foundations is: illustrated with case studies accompanied by practical applications in Excel and MathCad the first book to incorporate nonlinear interaction into pile design. A valuable resource for students of geotechnical engineering taking courses in foundations and a vital tool for engineers designing pile foundations.

Altered Perceptions Kenn Gordon, 2020-12-22 I grew up in the Highlands of Scotland. I became a musician whilst still at school. Then I made my first musical instrument, at the age of 13. At the age of 18, I joined the Royal Air Force. I served for 9 years and worked at numerous secret establishments. During my military career, I continued to play in bands and to write music. When I left the RAF, I still played music, forming my own bands and

recording over 32 Albums, under various names. I also created Gordon Guitars, making high end and bespoke guitars. As I grew older, I looked for a new avenue for my creative juices. It is because of this, that I have decided to become a writer. The first novel entitled 'Altered Perceptions' is the first part of a Trilogy featuring. Andy McPhee and Team Seven, of the SIS Black Door Operations. SIS (Secret Intelligence Service) do exist, as do Black Door Ops. What goes on at CDE (Chemical Defence Establishment) Porton Down, is part factual and part fiction. Although this story is fiction, or you could say factional. The Enriched Uranium and Plutonium did go missing from FBR (Fast Breeder Reactor) Dounreay. The Secret Royal Navy program, the Vulcan Project, did take place between the RN (Royal Navy) and Rolls Royce. There were two major accidents at FBR Dounreay, and they were covered up. There still, to this day, remains two miles of off-limit shoreline. Where pieces of Plutonium are being found, on the beach near Dounreay. Much of what happened in this first book, did happen in real life. Some is of course pure fiction. Real names have been changed. Many of the places exist. Gruinard Island was used by the British Government, to test out bacteriological and viral spores of anthrax. The island remained uninhabitable for almost 50 years. The UK has signed up to the Geneva Convention, that bans the use of chemical and biological warfare. Yet it continues to make these banned items. The UK is not alone in this. The USA, France, Belgium, Germany along with many countries in the west. Yet we first world countries, condemn the third world countries, who try to make them. Worse still, in some cases, we even supply these countries, with the parts required to make these weapons of mass destruction. That is a fact.

Internet Routing Architectures Bassam Halabi, Sam Halabi, Danny McPherson, 2000 Explores the functions, attributes, and applications of BGP-4 (Border Gateway Protocol Version 4), the de facto interdomain routing protocol, through practical scenarios and configuration examples.

Using R for Modelling and Quantitative Methods in Fisheries Malcolm Haddon, 2020-08-27 Using R for Modelling and Quantitative Methods in Fisheries has evolved and been adapted from an earlier book by the same author and provides a detailed introduction to analytical methods commonly used by fishery scientists, ecologists, and advanced students using the open-source software R as a programming tool. Some knowledge of R is assumed, as this is a book about using R, but an introduction to the development and working of functions, and how one can explore the contents of R functions and packages, is provided. The example analyses proceed step-by-step using code listed in the book and from the book's companion R package, MQMF, available from GitHub and the standard archive, CRAN. The examples are designed to be simple to modify so the reader can quickly adapt the methods described to use with their own data. A primary aim of the book is to be a useful resource to natural resource practitioners and students. Featured Chapters: Model Parameter Estimation provides a detailed explanation of the requirements and steps involved in fitting models to data, using R and, mainly, maximum likelihood methods. On Uncertainty uses R to implement bootstrapping, likelihood profiles, asymptotic errors, and Bayesian posteriors to characterize any uncertainty in an analysis. The use of the Monte Carlo Markov Chain methodology is examined in some detail. Surplus Production Models applies all the methods examined in the earlier parts of the book to conducting a stock

assessment. This included fitting alternative models to the available data, characterizing the uncertainty in different ways, and projecting the optimum models forward in time as the basis for providing useful management advice.

ICPC-3 International Classification of Primary Care Kees van Boven,Huib Ten Napel,2021-12-27 This third edition of the International Classification of Primary Care (ICPC-3) is indispensable for anyone wishing to use the international classification system for classification of morbidity data in a primary care setting. Distilling the many standards that are applied internationally in primary & community care and public health to offer a telescopic view, the classification has been completely rewritten to reflect the continued shift in the health paradigm of primary care and public health towards the person rather than the disease or provider. The content of ICPC-3 remains closely 'linked' to relevant related international classifications. The ICPC-3 also contributes to the United Nations' Sustainable Development Goals, specifically to Goal 3 and its target of ensuring healthy lives and promoting well-being for all at all ages.

World Scientific Reference Of Amorphous Materials, The: Structure, Properties, Modeling And Main Applications (In 3 Volumes) ,2020-12-28 Amorphous solids (including glassy and non-crystalline solids) are ubiquitous since the vast majority of solids naturally occurring in our world are amorphous. Although the field is diverse and complex, this three-volume set covers the vast majority of the important concepts needed to understand these materials and their principal practical applications. One volume discusses the most important subset of amorphous insulators, namely oxide glasses; the other two volumes discuss the most important subsets of amorphous semiconductors, namely tetrahedrally coordinated amorphous semiconductors and amorphous and glassy chalcogenides. Together these three volumes provide a comprehensive set of theoretical concepts and practical information needed to become conversant in the field of amorphous materials. They are suitable for advanced graduate students, postdoctoral research associates, and researchers wishing to change fields or sub-fields. The topics covered in these three volumes include (1) concepts for understanding the structures of amorphous materials, (2) techniques to characterize the structural, electronic, and optical properties of amorphous materials, (3) the roles of defects in affecting the electronic and optical properties of amorphous materials, and (4) the concepts for understanding practical devices and other applications of amorphous materials. Applications discussed in these volumes include transistors, solar cells, displays, bolometers, fibers, non-volatile memories, vidicons, photoresists, and optical disks.

Dead End Kenn Gordon,2020-12-23 I grew up in the Highlands of Scotland and I became a musician while still at School. Then I made my first musical instrument at the age of just 13 years, an Appalachian Dulcimer. I joined the Royal Air Force at the age of 18. I served for 9 years and worked at many of our secret establishments. Even during my military career, I continued to play in bands as well as to write music. When time would allow, I made guitars for myself, although most of these ended up in my friend's hands. With the bands that I formed and played in; I have been fortunate enough to have recorded 32 albums. I later formed my own company making bespoke guitars (Gordon Guitars UK) The pressure of running so many ventures simultaneously eventually took its toll and a series of heart attacks followed. So, I looked for a new and more sedate way to direct my creative juices and writing thrillers fitted that bill perfectly.

Environmental Arsenic in a Changing World Yongguan Zhu,Huaming Guo,Prosun Bhattacharya,Arslan Ahmad,Jochen Bundschuh,Ravi Naidu,2019-08-23 The Congress Arsenic in the Environment offers an international, multi- and interdisciplinary discussion platform for research and innovation aimed towards a holistic solution to the problem posed by the environmental toxin arsenic, with significant societal impact. The Congress has focused on cutting edge and breakthrough research in physical, chemical, toxicological, medical, agricultural and other specific issues on arsenic across a broader environmental realm. The Biennial Congress Arsenic in the Environment was first organized in Mexico City (As2006) followed by As2008 in Valencia (Spain), As2010 in Tainan (Chinese Taiwan), As2012 in Cairns (Australia), As2014 in Buenos Aires (Argentina) and As2016 in Stockholm (Sweden). The 7th International Congress As2018 was held July 1-6, 2018, in Beijing, P. R. China and was entitled Environmental Arsenic in a Changing World. The Congress addressed the broader context of arsenic research aligned on the following themes: Theme 1: Arsenic Behaviour in Changing Environmental Media Theme 2: Arsenic in a Changing Agricultural Ecosystem Theme 3: Health Impacts of Environmental Arsenic Theme 4: Technologies for Arsenic Immobilization and Clean Water Blueprints Theme 5: Sustainable Mitigation and Management Arsenic in drinking water (mainly groundwater) has emerged as an issue of global health concern. During last decade, the presence of arsenic in rice, possibly also other food of plant origins, has attained increasing attention. This is particularly true

in the Asian countries, where the use of high arsenic groundwater as source of irrigation water and drinking water has been flagged as severe health concern. This has been accentuated by elevating arsenic concentrations in deep groundwater recharged from shallow high arsenic groundwater, which may have further detrimental effects on public health. Notably, China has been in the forefront of research on arsenic biogeochemical cycling, health effects of arsenic, technologies for arsenic removal, and sustainable mitigation measures. The Congress has attracted professionals involved in different segments of interdisciplinary research on arsenic in an open forum, and strengthened relations between academia, research institutions, government and non-governmental agencies, industries, and civil society organizations to share an optimal ambience for exchange of knowledge.
