*Lake Biwa: Interactions between Nature and People* Hiroya Kawanabe, Machiko Nishino, Masayoshi Maehata, 2020-08-25 Although, the first edition had a similar focus, more than five years have passed since its publication and the biological and social circumstances of the lake have drastically changed due to, for example, the further expansion of alien species, the decrease of indigenous species, the progress of integrated watershed management by the Union of the Kansai Government which was established in 2010, the legislation of the Conservation and Restoration Act of Lake Biwa in 2015 and more. The new edition will therefore feature updated and new information on the above and more topics as well as updated and revised data based on the latest research. Inventories of respective taxa, especially those of small animals, are also revised based on the latest studies. Furthermore, this volume covers the characteristics of the biota of this ancient lake, but at the same time, it will also approach it as a 'culture ancient lake'. Other topics also include water pollution, lakeshore development, the effects of global warming in the past and present, the influence of people, and countermeasures by local and national governments. Moreover, the volume also provides a comprehensive view on the future of Lake Biwa and that of its residents. Miraculously enough, this ancient lake has kept its water quality clear even until today despite the fact of more than 1.4 million people living on its shores. Finally, the book also gives indispensable information to those

engaged in improving and conserving water regimes of lakes and other water bodies all over the world and to those interested in the culture and history of Japan. Lake Biwa is not only one of the rarest ancient lakes of the world, but the people's involvement with the lake also goes back a long way. This is shown in the diverse culture developed in this area and in the various archaeological finds that date back as early as the Jomon Period, nearly 10.000 years ago. Today Lake Biwa fulfills an important role as a water resource by providing domestic, commercial, industrial, and agricultural water for over 14 million residents living around the Lake Biwa-Yodo River drainage basin. This updated volume focuses on the geological and biological features of the lake as well as on the long-term interactions between the people and the lake.

I'm Quitting Heroing□Chapter 24: Lake Ashinoko, Hakone in the year 2060  
Nori Kazato, After saving the world, the strongest hero Leo became someone who is not wanted in the peaceful human world. He was too strong. Exiled, he seeks a job at the Demon King's Army, which he had defeated and needs to be rebuilt. The Army had many problems: too much work, financial troubles, etc. Leo starts to make things better using his power. Leo encounters Echidna again, and asks her why she invaded the human world. There was an unexpected story---! This is the comic version of the Japanese novel which won one of the major online prizes for novels!

**Advancing Knowledge on Cyanobacterial Blooms in Freshwaters** Elisabeth (Savi) Vardaka ,Konstantinos Ar. Kormas,2020-11-13 Cyanobacterial blooms are a water quality problem that is widely acknowledged to have detrimental ecological and economic effects in drinking and recreational water supplies and fisheries. There is increasing evidence that cyanobacterial blooms have increased globally and are likely to expand in water resources as a result of climate change. Of most concern are cyanotoxins, along with the mechanisms

that induce their release and determine their fate in the aquatic environment. These secondary metabolites pose a potential hazard to human health and agricultural and aquaculture products that are intended for animal and human consumption; therefore, strict and reliable control of cyanotoxins is crucial for assessing risk. In this direction, a deeper understanding of the mechanisms that determine cyanobacterial bloom structure and toxin production has become the target of management practices. This Special Issue, entitled "Advancing Knowledge on Cyanobacterial Blooms in Freshwaters", aims to bring together recent multi- and interdisciplinary research, from the field to the laboratory and back again, driven by working hypotheses based on any aspect of mitigating cyanobacterial blooms, from ecological theory to applied research.

*Japan Extolled and Decried* C.P. Thunberg, 2012-11-12 This edition makes

available once again Thunberg's extraordinary writings on Japan, complete with illustrations, a full introduction and annotations. Carl Peter Thunberg, pupil and successor of Linnaeus – of the great fathers of modern science – spent eighteen fascinating months in the notoriously inaccessible Japan in 1775-1776, and this is his story. Thunberg studied at Uppsala University in Sweden where he was a favourite student of the great Linnaeus, father of modern scientific classification. He determined to travel the world and enlisted as a physician with the Dutch East India Company. He arrived in Japan in the summer of 1775 and stayed for eighteen months. He observed Japan widely, and travelled to Edo (modern Tokyo) where he became friends with the shogun's private physician, Katsuragawa Hoshû, a fine Scholar and a notorious rake. They maintained a correspondence even after Thunberg had returned to his homeland. Thunberg's 'Travels' appeared in English in 1795 and until now has never been reprinted. Fully annotated and introduced by Timon Screech.

*Through Japan with Brush & Ink* Chiura Obata,1990-07-15 This Japanese ink painting guide is presented by master painter, Chiura Obata, a well-known Japanese artist. Obata has traveled throughout Japan, recording with charm and insight the beauty of the country. Using the traditional brush-and-ink technique, he skillfully presents the varied aspects of Japan: a mountain landscape enveloped in mist, an intimate Japanese garden, the hustle of the busy city of Tokyo, the fleeting cherry blossoms, an ancient temple compound, a festive group of holiday sightseers. The artist captures with his deft sketches the special quality of Japan that attracts the visitor and resident alike. This is far more than a picture of Japan; it is rather a perceptive interpretation by one who knows and loves the country.

Fish biology in Japan: an anthology in honour of Hiroya Kawanabe Masahide Yuma, Izumi Nakamura, Kurt D. Fausch, 2013-04-17 This volume is a collection of papers assembled to honor Hiroya Kawanabe, an eminent Japanese ecologist who studied fishes and other organisms. Kawanabe retired from his position as Professor at Kyoto University in March 1996. In the first section of the volume his career is highlighted by a biography describing his life and work, a bibliography of his more than 750 lifetime publications, and a personal interview with a colleague who has been close to his work throughout his career. Papers in the second section of the volume include invited reviews of research on fish ecology in Japan, a historical overview of freshwater fishes of Japan, and recent studies on sex change among reef fishes. The 24 papers in the third section of the volume by Japanese fish biologists and their collaborators cover a wide variety of topics on fish biology. These include papers on evolution, genetics, systematics, reproductive biology, early life history, life history variation, behavior, physiology, ecology, and zoogeography. These papers address fishes from lentic, lotic, and marine ecosystems in Japan, Asia, Africa, North America, and in some cases worldwide. One of Hiroya Kawanabe's most brilliant and lasting contributions was to foster collaboration between Japanese ecologists and other scientists.

**Modeling in Computer Graphics** Bianca Falcidieno, Tosiya L.

Kunii, 2012-12-06 In the history of technology, many fields have passed from an initial stage of empirical recipes to a mature stage where work is based on formal theories and procedures. This transition is made possible through a process called modeling. Also Computer Graphics as a separate field of Computer Science makes extensive use of formal theories and procedures of modeling, often derived from related disciplines such as mathematics and physics. Modeling makes different application results consistent, unifying varieties of techniques and formal approaches into a smaller number of models by generalizing and abstracting the knowledge in Computer Graphics. This volume presents a selection of research papers submitted to the conference Modeling in Computer Graphics: Methods and Applications held at the Research Area of the National Research Council in Genoa, Italy, on June 28 -July 1, 1993. This meeting was the ideal continuation of a previous conference organized in Tokyo, Japan, in April 1991. The success and the variety of research themes discussed at that meeting suggested to promote a new working conference on methods and applications of modeling to be held in Italy two years later.
