Traveling through Video Games Tom van Nuenen,2023-10-25 This book unlocks an understanding of video games as virtual travel. It explains how video game design increasingly takes cues from the promotional language of tourism, and how this connection raises issues of power and commodification. Bridging the disciplinary gap between game and tourism studies, the book offers a comprehensive account of touristic gazing in games such as The Legend of Zelda: Breath of the Wild, Minecraft, and Microsoft Flight Simulator 2020. Traveling through video games involves a mythological promise of open-ended opportunity, summarized in the slogan you can go there. Van Nuenen discusses the scale of game worlds, the elusive nature of freedom and control, and the pivotal role of work in creating a sense of belonging. The logic of tourism is fundamentally consumptive—but through design choices, players can also be invited to approach their travels more critically. This is the difference between moving through a game world, and being moved by it. This interdisciplinary and innovative study will interest students and scholars of digital media studies, game studies, tourism and technology, and the Digital Humanities.

Practical Musicology Simon Zagorski-Thomas,2022-07-14 Practical Musicology outlines a theoretical framework for studying a broad range of current musical practices and aims to provoke discussion about key issues in the rapidly expanding area of practical musicology: the study of how music is made. The book explores various forms of practice ranging from performance and composition to listening and dancing, from historically informed performances of Bach in the USA to Indonesian Dubstep or Australian musical theatre, and from Irish traditional music played by French musicians from Toulouse to Brazilian thrash metal or K-Pop. Drawing on neuroscience, cognitive psychology, ecological approaches in anthropology, and the social construction of technology and creativity, Zagorski-Thomas uses a series of case studies and examples to investigate how practice is already being studied and to suggest a principle for how it might continue to develop, based around the assertion that musicking cannot be treated as a culturally or ideologically neutral phenomenon.
