**Red Snapper Biology in a Changing World** Stephen T. Szedlmayer, Stephen A. Bortone, 2019-11-27 Red Snapper *Lutjanus campechanus*, is an important commercial and recreational fish species and there has been much interest in maintaining its status among a variety of scientific, social and economic levels. Stocks are influenced by varying environmental conditions, changing fishing effort and efficiency, anthropogenic effects, inter- and intraspecific interactions, bycatch from other fisheries, and habitat alterations. *Red Snapper Biology in a Changing World* explores these changing factors and their potential effects on Red Snapper in the Eastern Atlantic region including the Gulf of Mexico and Southeastern U.S. The book will provide a better understanding of Red Snapper population fluctuations that will subsequently allow for better management decisions and more informed user groups in their efforts to maintain a sustainable fishery. It explores the responses Red Snapper have made, and are making, relative to their life history attributes such as early life history and adult ecology, especially attributes associated with population distribution and abundance, movement patterns, fish health issues and management success. A compendium of many papers presented at the 147th annual meeting of the American Fisheries Society in Tampa, Florida, this volume also includes additional research completed as a result of the symposium. It will be essential reading for fisheries scientists and managers, ichthyologists, resource and environmental managers, and policymakers who are involved with coastal fisheries.

**Tank Battles of the Cold War, 1948-1991** Anthony Tucker-Jones, 2021-06-30 As Anthony Tucker-Jones shows in this highly illustrated, wide-ranging history, for most of the Cold War the tank retained its pre-eminence on the battlefield. The Arab-Israeli wars witnessed some of the biggest tank battles of all time, and tanks played key roles in conflicts in Korea, Vietnam and Afghanistan as well as in the Iran-Iraq War and the wars fought between India and Pakistan. But then in the mid-1960s anti-tank weapons became ever deadlier and the Mechanised Infantry Fighting Vehicle (MIFV), which was designed to support infantry and fight tanks, emerged and the heyday of the tank was over. Chapters cover each major phase in the

evolution of the tank and of tank warfare during the period, from the battles fought in the late 1940s and 1950s with Second World War armoured vehicles like the T-34 and the Sherman, through to the designs common in the 1960s and 1970s like the T-55, Centurion, Challenger and M60 Patton, to the confrontation between the M1 Abrams and the T-72 during the Gulf War in 1991. Technical and design developments are important elements throughout the story, but so are dramatic changes in tactics and armaments which mean the tank has an increasingly uncertain role in modern warfare.
