My Girlfriend's a Geek, Vol. 2 (light novel) Pentabu,2012-04-03 It was two years ago that I met Y-ko. She was my boss at the job I was working at the time. I was a student, and I had no idea what I was doing. After a time, we ended up becoming boyfriend and girlfriend. It turned out she was a fujoshi. Not only that, but a hidden fujoshi, one who didn't show any inkling of the sort around other people... But as a general rule, she never hides it around me. In fact... It seems more like she's intent on dragging me down that path with her. ...And I'll be honest. It's slowly but surely seeping into me.

Petroleum Geology of Libya Don Hallett,2002-02-26 Libya has the largest petroleum reserves of any country in Africa and since production began in 1961 over 20 billion barrels of oil have been produced. Libya is scheduled to reach the mid-point of depletion of reserves in 2001 and this provides a timely point at which to review the state of petroleum exploration in Libya. A large amount of data has been published on the geology of Libya, but it is scattered through the literature; much of the older data has been superceded, and several of the key publications, especially those published in Libya, are difficult to find. This book represents the first attempt to produce a comprehensive synthesis of the petroleum geology of Libya. It is based exclusively on published data, supplemented by the author's experience gained during ten years work in Libya. The aim of the book is to systematically review the plate tectonics, structural evolution, stratigraphy, geochemistry, and petroleum systems of Libya, and provides valuable new data on fields, production, and reserves. This volume will provide a ready source of reference to individuals and companies who wish to obtain an overview of the petroleum geology of Libya, and will save them the laborious task of sifting through hundreds of publications to find the data they require. The book includes 148 newly drawn figures.

Sayonara Zetsubou-Sensei Koji Kumeta,2013-07-16 THE INCONVENIENCE OF CONVENIENCE ? Zetsubou-sensei is angry again, and this time he's turned his sights on Inconvenience. Modern-day inventions are supposed to make our lives more efficient, but the sensei sure doesn't see it that way. TV remote controls are meant to save us time and energy, but how much time do we waste just trying to find the remote? Our cellphones are supposed to keep us connected no matter where we are, but we spend half our time walking around trying to find a signal. Zetsubou-sensei has had it with so-called conveniences! Luckily, he's come up with the perfect solution: Convenience Through Cloning. Because what the world needs now is another Zetsubou-sensei, and another, and another and . . .

In Pursuit of Ancient Cyrenaica... Monika Rekowska,2016-03-31 This work examines travellers' accounts of their journeys to Cyrenaica, focusing in the main on an analysis of these accounts within the context of their significance to topographic surveys of the region.

Crying Stars E G Athrun,2021-11-07 All the greatest adventures of mankind emerge from the dreams of brave hearts, and are doomed to be bribed by the fatuous desires of the sinister souls. All the marvelous designs of God echoed the eternal rhythm of life and death, and are rendered meanings by the briefness of their sparks. All the glorious songs of the past sang of a heaven of towers of gold and crowns, and are forgotten by the rims of time and tides. When the heaven's blazes rain down from the sky; when all the technologies transformed the dreams into monsters, what is there left for us to find in the unknown? Power, desires, dignity, and unanimity. The ship of Theseus is now the hand of the false God, opening our path to wealth and power. 2068, ten years after the War of Freedom, peace, and prosperity seemed to have returned to daily life. Fusion energy, advanced robotics, genetic engineering, and upcoming space exploration had pushed humans' ambition to an unprecedented level. Anna and Kyle, two of the lead scientists from the UCOG--the biggest tech corporation in the entire world, found themselves entangled in the brewing storms between the corporation and the government. Politics flared from the hungering mouths, snarling to consume the wealth and the power; science paled before the decades of deteriorated ethics, succumbing to be the tools of the desires; lost civilizations emerged from the darkness, trembling the whole world with the revelations of mankind's creators. After Anna's research project in Antarctica, which had uncovered the first wreckage of an extraterrestrial spaceship, she was called to a meeting with the executives of the UCOG. The meeting was not at all what she had expected. Shortly after, the Pentagon of the United States was destroyed by a terrorist attack, and the UCOG was accused of being behind it. Suddenly, chaos returned once again and stirred the whole world... Anna and Kyle found themselves on the brink of death as they realized a horrifying truth--what if all these events were connected somehow? A strange masked man saved Anna from a desperate situation, but why? There was someone in the dark pulling the triggers of everything, and Anna decided to bring him/her to justice. As the ambitions and projects of genetic engineering were slowly unveiled, they found out even their own births were not that simple. The debuting novel of E.G. Athrun. An astounding beginning of an epic journey.--Kevin Martie We are witnessing perhaps the next Game of Thrones.--Tyler Nowell

Geology of North Africa Edward Tawadros,2011-11-02 A reference volume on the geology of North Africa, this volume deals with Egypt, Libya, Algeria, Tunisia and Morocco. In great detail the geology, tectonic elements, the geology of the Pan-African Shield, the Phanerozoic geological evolution and most of the lithostratigraphic units of the five countries are described. Moreover, the petroleum geolog

Atlas Anthony Rwaka,2014-09-16 Earth is a legend amongst legends; it survived the meteors that decimated the dinosaurs, it survived the coming of the great comet half its size and most importantly it survived humans, its greatest threat. In time humans realized that they could not survive without the Earth and peace emerged and with that came great civilizations. These civilizations prospered and grew; the earth was no longer enough, they needed more, more than just the moon, sun and the stars. They expanded past their moon, at first they found nothing but as their minds developed so did their technology. Finally they found it, they were scared at first but in time they embraced it and finally came to terms with the fact that they were not alone and as time would allow it, the Earth grew with the rest of the seven great planets in the solar system. There was no more need for exploration, no more room for questions, this is was an era of solutions. Solutions that brought great nations together, continents became countries and race; became a thing of the past. Peace was no longer a distant reality but as time would have it, nothing lasts forever; Earth became part of a solution, a solution that would cost it all its inhabitants, will the Earth survive once more?

Gundam Seed Destiny Hajime Yodate,Masatsugu Iwase,Yoshiyuki Tomino,2007 WAR WITHOUT END Shinn Asuka is the ZAFT Empire’s ace pilot. And it’s not just his elite combat skills that make him such a fearsome soldier. He has a burning hatred for the Earth Alliance, the Empire’s enemy in a long and terrible war. But then Shinn meets someone who makes him question everything he believes. Stella Loussier is beautiful and innocent—and a pilot for the Earth Alliance. She also might be the victim of a horrifying military research experiment, one that shocks even the battle-hardened Shinn. Now Shinn is determined to give her a new life, away from war, destruction, and death. But as Shinn risks his life to return Stellar to her friends at the Alliance, he may be headed for heartbreak.

Adopting the Beat of Expression: An Mental Symphony within **Athrun**

In some sort of eaten by screens and the ceaseless chatter of instantaneous connection, the melodic elegance and emotional symphony created by the prepared word often disappear into the backdrop, eclipsed by the constant sound and disturbances that permeate our lives. Nevertheless, located within the pages of **Athrun** a wonderful literary value overflowing with fresh thoughts, lies an immersive symphony waiting to be embraced. Constructed by a wonderful musician of language, this charming masterpiece conducts viewers on a psychological journey, skillfully unraveling the concealed melodies and profound affect resonating within each cautiously constructed phrase. Within the depths of this moving assessment, we can explore the book is main harmonies, analyze its enthralling writing type, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
