Heart Attack Paul Michael Fazio,2020-07-28 John McCord's last chance to win a championship is fading away as his Rockets play sub 500 ball for the first two months of the baseball season. The team has a powerful lineup, yet they cannot win with any consistency due to their lack of pitching. John's grandson is saved in a near-miss car accident when a stranger risks his own life before disappearing from the scene. John searches and finally finds the stranger, Brian Shane. He offers to do anything to thank him for saving his grandson, but all of John's suggestions are rejected by Brian. Brian then states the one thing that he will accept, a chance to pitch for the Rockets. John realizes this middle-aged man with no baseball experience has no chance of helping his team win, but the thought of finally repaying him is overwhelming. He agrees on a one-dollar contract, where Brian pitches until he loses one game. Brian quickly gets a nick name, Heart Attack, because he constantly has the fans, his teammates, and their manager on the edge of

their seats every time he takes the mound. Margaret, a sportswriter, becomes very fond of Brian and believes he is somehow angelic and threatens to expose him. Brian insists that it's not true and begs her to drop that thought. The question becomes, Is John repaying Brian, or is it Brian helping the McCords again? Has Brian been sent to save the season by an unknown force, or is luck the defining power, or perhaps something else? Either way, it is the best dollar ever spent.

TPS Frequency Dictionary of Mandarin Chinese Michael Burkhardt, 2010-05-20

The TPS Frequency Dictionary of Mandarin Chinese is not just another character frequency based dictionary. It has been designed to provide students with a guide for learning new characters, words, and phrases gradually, building upon characters already familiar. The entries have been arranged according to a Triple Progression System in which words are grouped first by character frequency, then by word frequency, and filtered so that new words and phrases appear only after all of their component characters have been introduced.

AI 2003: Advances in Artificial Intelligence Tamas D. Gedeon,Lance C.C. Fung,2003-12-01 Consider the problem of a robot (algorithm, learning mechanism) moving along the real line attempting to locate a particular point ? . To assist the mechanism, we assume that it can communicate with an Environment ("Oracle") which guides it with information regarding the direction in which it should go. If the Environment is deterministic the

problem is the “Deterministic Point - cation Problem” which has been studied rather thoroughly [1]. In its pioneering version [1] the problem was presented in the setting that the Environment could charge the robot a cost which was proportional to the distance it was from the point sought for. The question of having multiple communicating robots locate a point on the line has also been studied [1, 2]. In the stochastic version of this problem, we consider the scenario when the learning mechanism attempts to locate a point in an interval with stochastic (i. e. , possibly erroneous) instead of deterministic responses from the environment. Thus when it should really be moving to the “right” it may be advised to move to the “left” and vice versa. Apart from the problem being of importance in its own right, the stochastic pointlocationproblemalsohas potentialapplications insolvingoptimization problems.
