Audi R8 30 Years of Quattro AWD Alan Crawford,2014-03-05 On a small assembly line in Neckarsulm, Germany, no more than twenty exotic Audi R8 sports cars are built daily. The entire process is overseen by small teams of specialists that oversee every step of production. Every single part is inspected carefully, and nothing goes unchecked. It is a level of hand-built quality one might expect to find in a Ferrari Enzo or the Vector W8A of the 1980s, but almost unheard of from a manufacturer the size of Audi AG. The Turbo Quattro Coupe (or Urquattro) of the early 1980s was largely assembled by hand much in the same way, but Audi has refined the process for the R8 and has introduced one of the most spectacular sports cars ever. I hope this book will provide a better insight into the design, development, and production of this magnificent automobile.

Organizational Cultures of Remembrance Daniel Mai,2015-05-19 In a business world predominantly oriented toward the future, it has paradoxically become ever more common that companies turn towards their pasts. This book empirically explores the phenomenon of organizational remembrance from a holistic cultural perspective. Based on a twelve-month ethnographic case study conducted at the headquarters of the German automobile company, AUDI AG, this study dissects the relationships between memory, identity, and image in a corporate setting. The greater aim in doing so is twofold: First, this study examines exactly why and how a company officially manages its past in terms of 'history' and 'tradition.' And second, this study scrutinizes what effect organizational remembrance has on the workforce – how it impacts their collective identification with a corporate community and influences their understanding of their daily working life. By investigating the interplay between different stakeholder groups, as well as their practices, media, mental models, and other vehicles of remembrance, an integrated account is offered which makes sense of the complex cultural forces at work in the corporate handling of the past, the present, and the future.

Getting the Bugs Out David Kiley, 2002-04-08 The fascinating story of Volkswagen's raging success and near collapse in America After a wild ride of ups and downs for almost three decades, Volkswagen has regained its stature as one of America's most beloved auto makers. In Getting the Bugs Out, journalist and auto industry expert David Kiley tells the complete story of the rise, fall, and comeback of Volkswagen. Kiley traces the company's rise from Ferdinand Porsche's original design for the Beetle, through the Nazi era, and up to the Beetle's ascendancy during the flower-power 1960s. He explores the reasons for VW's downward spiral through the 1970s and 1980s, including the devastating management blunders that led to such failed efforts as the Rabbit, Dasher, Thing, and Scirocco, and equally catastrophic marketing initiatives, culminating in the notorious Fahrfeignugen series of ads. Finally, drawing upon his unique access to company insiders, Kiley tells the story of how Volkswagen achieved its phenomenal comeback beginning in the late 1990s through a combination of visionary management, cutting-edge product development, and brilliant marketing and advertising strategies. David Kiley (Anne Arbor, MI), the Detroit Bureau Chief at USA Today, is a journalist with fifteen years of experience, ten of which have been devoted to covering the auto industry. He has written extensively for Adweek and Brandweek magazines.

Retrofuturism Brooke Hodge, Museum of Contemporary Art (Los Angeles, Calif.), 2002 The concept originator behind the New Beetle, J Mays is among the most influential designers in the history of the automobile. Mays's approach has revolutionized the industry by integrating branding and identity with the design process. Also at the foundation of his philosophy is a belief that the innovations of the past should inform future solutions. His cars intrigue us like no others because they respond to underlying emotional and cultural associations. This first book on Mays's work tracks his meteoric career from his start at Volkswagen-Audi to his current tenure at Ford, where he designs for eight lines (Ford, Mercury, Lincoln, Mazda, Volvo, Land Rover, Jaguar, and Aston Martin). Illustrated with more than eighty-five photographs, freehand sketches, and computer renderings, Retrofuturism reveals new ways of thinking about design that have the potential to greatly change the way we live in the twenty-first century.

Computer Vision - ECCV 2004 Tomas Pajdla,Jiri Matas,2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer - sion! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong – 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the n- ber of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, thereports,thereviews,andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not re?ected in the ?nal decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestRFIA conference software. We thank Jan-Olof Eklundh and Andrew
