Facts and Figures of the Automobile Industry ,1920

Elcar and Pratt Automobiles William S. Locke,2000-01-01 A surprisingly little-known marque today, Elcar once ranked among the finest vehicles on American roads. Built to exacting standards in Elkhart, Indiana, an Elcar could compete head-to-head on the basis of performance, quality, or price with the products of much larger manufacturers. Ultimately done in by weak distribution and the ravages of the Depression, Elcar today stands as an example of an ambitious company that transformed itself, successfully if temporarily, from a maker of buggies and harnesses into a respected car manufacturer in the early days of the automotive age. This remarkably exhaustive history, researched over several decades from all available sources, including interviews with former Elcar employees, details every Elcar model and the Pratt vehicles that preceded them, as well as the personalities behind the cars. Extensive appendices provide a complete model history, with specifications; a full corporate chronology; an illustrated accounting of all Elcars and Pratts known to survive whole or in part today; a roster of company employees; a descriptive list of all ads and brochures ever produced by the company; and a wealth of other data that can be found nowhere else. Lavishly illustrated and surpassingly thorough, this book is a well of information on a significant but forgotten line of automobiles.

Driving Around the USA Martin W. Sandler,2003-12-04 Capturing the excitement of a nation as it became a driving force -- in more ways than one -- *Driving Around America* is the story of how America's romantic, restless spirit found its counterpart in the automobile. With Henry Ford's assembly lines lowering the price of cars, ordinary people began to travel where and when they pleased with a freedom never before known -- and the nation would never be the same. People moved farther from their work, creating suburbs; the demand for gasoline increased, spurring the growth of the petroleum industry; and individual members of families moved far from each other, changing the social fabric of the nation. From the auto's early beginnings to the commonplace use of cars in all aspects of life today, *Driving Around America* is a fascinating portrait of how America transformed as its citizens were on the move more and more.

The Small Independents Michael J Kollins,2002-02-01 *Pioneers of the U.S. Automobile Industry* uses four separate volumes to explore the essential components that helped build the American automobile industry - the people, the companies and the designs. This volume uses more than 450 photos to help weave the story of the risk-takers who helped shape the automotive industry from the very beginning. Pioneers and companies covered in this edition include: Charles and Frank Duryea Studebaker The Pratt Family and the Elcar Motor Car Company Joseph Moon Russell Gardner Louis Clarke George Pierce and Charles Clifton Packard/Joy/Macauley and the Packard Motor Car Company Edwin Thomas Ransom Olds Peerless Fred and August Duesenberg Kissel Brothers Hupp / Drake / Hastings / Young and the Hupp Motor Car Corporation Walter Flanders Chapin / Coffin / Bezner / Jackson / Hudson / McAneeny and The Hudson Motor Car Company Harry Stutz Harry Ford Graham Brothers Charles Nash

The Automobile Robert Thompson Sloss,1910

America and the Automobile Peter J. Ling,1992 This interdisciplinary study of the early history of the automobile in the USA explores how the motorcar was accepted by an affluent class of society and interpreted as a means of achieving progressive, middle-class objectives.

The Automobile Clay McShane,1997-11-25 Chronologies can be very useful reference sources, showing the progression of events in relation to time. This chronology on the automobile provides a listing of events related to the automobile from c.8000 B.C.E. (the domestication of animals) to 1994, when Volvo introduced the side impact air bag. Between these two dates are listed all the expected automobile events covering inventions, manufacturing, and production as well as many events related to other vehicles, such as bicycles, trains, buses, military vehicles, and airplanes. Also included are events that have influenced or been influenced by the automobile, such as the appearance of the first U.S. golf course in 1889; the construction of the earliest example of a theriomorphic building (animal-shaped) in 1882, which later influenced the design of American roadside strips; the opening of the first shopping center mall in Raleigh, North Carolina, in 1949; and the peak year for drive-in movie theaters (1958). Even things that are only marginal to automotive history, such as 'Kenneth Grahame's novel, *The Wind in the Willows*, parodies the car culture for children' (1908), help put the automobile in a larger social and cultural context. The book is divided into seven chapters, from 'Prelude to 1885' to 'Revival: 1981-1994.' Entries, which are arranged year by year, are concise but informative. One appendix contains 14 tables that provide such information as Ford and Cadillac prices for the years 1900-1990; U.S. gasoline prices for the years 1925-88; and persons per car in the U.S. for the years 1925-90. A second appendix is a directory of North American car museums. The index provides name and subject access. All in all, this is a useful book that will provide some quick answers to questions about automobiles at the reference desk in high-school, public, and academic libraries. It is also an interesting book to browse. The only failings are the lack of a general bibliography and citations to source material where readers could find more detailed information.
