*Cars of Legend* Jorge Lucendo,2019-07-29 The origins of the automobile date back to the seventeenth century, specifically to the year 1678, in that year the French Jesuit Ferdinand Verbiest created the first rolling machine, as it was called in his time. Later in 1769 a French engineer named Cugnot created what for many is the beginning of the history of the automobile, although previously in the fifteenth century, and according to some historians there was a German watchmaker, who invented a wooden car that moved like a device of watchmaking of the time. Also some historians affirm that the inventor and man of the Renaissance, Leonardo da Vinci, had created the first car-mobile of history. In this book *Autos de Leyenda*, we will review the history of the automobile, from its beginning until the mid-nineteenth century, (1769-1897), we will see the progression of the car through the ages, locomotives land, locomobiles, steam cars, electric vehicles , with wheels of wood, iron, rubber and all the technical advances that were emerging in each era. This book talks about the top 120 brands in history, with stories, events and anecdotes from its manufacturers and creators.

Automobile Manufacturers Worldwide Registry ,2015-11-17 This one-of-a-kind reference work provides essential data on some 10,700 manufacturers of automobiles, beginning with the earliest vehicle that might be so termed

(Frenchman Nicolas Cugnot's steam carriage, in 1770) and covering all nations in which automobiles have been built--67 in all. Not an encyclopedia or collection of histories, this is instead a very complete registry providing essential facts about the manufacturers: complete name, location, years active, type(s) of vehicles built, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger-carrying vehicles on at least two but no more than eight wheels, of any design, either mass produced or built as one-off specials, experimental cars, prototypes, or kit cars, is included. Builders of internal combustion, steam and electric powered vehicles are all covered; companies that built only trucks, buses, racing cars, or motorcycles are not included. From A.A.A. to Zzipper and Argentina to Yugoslavia, this is an astonishingly comprehensive resource.
