**Avia B-35, B-135** Miroslav Bílý, Denés Bernád, Pavel Kučera, 2003 Beskriver jagerflytyperne B-35 og B-135 bygget på Avia-fabrikken i Tjekkoslaviet

*Slovakian and Bulgarian Aces of World War 2* Jiri Rajlich, 2012-12-20 In 1939, Slovakia signed a protection agreement with the German Reich and joined the attack on Poland, where its Avia B-534-equipped fighter squadrons claimed their first kills. In October 1942, having made do with obsolete aircraft, the Slovaks were equipped with Bf 109Es and eventually acquired 43 Messerschmitt fighters. The Slovaks would claim over 215 kills. Although it supported German efforts in Yugoslavia and Greece, Bulgaria did not declare war on Russia. First seeing action in August 1943, Bulgarian fighter pilots used their Bf 109Gs to good effect. From late 1943 through to mid-1944, the Bulgarian pilots attempted to defend the country from American bombers, and Stoyanov and Bochev made ace during this period.

*Enemy at the Gates* Justo Miranda, 2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters,

as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherland, Poland, Romania, Sweden and Switzerland.

**The Axis Air Forces** Frank Joseph, 2011-11-29 This comprehensive volume tells the rarely recounted stories of the numerous foreign air forces that supported the German Luftwaffe as part of the Axis' quest to dominate the European and Pacific theaters—a highly compelling and often overlooked chapter of World War II history. The Axis Air Forces: Flying in Support of the German Luftwaffe presents an untold history of that global conflict's little-known combatants, who nonetheless contributed significantly to the war's outcome. While most other books only attempt to address this subject in passing, author Frank Joseph provides not only an extremely comprehensive account of the unsung heroes of the Axis fliers, but also describes the efforts of Axis air forces such as those of the Iraqi, Manchurian, Thai or Chinese—specific groups of wartime aviators that have never been discussed before at length. This book examines the distinct but allied Axis air forces of Western Europe, Eastern Europe, the Middle East, and Asia. An extensive introduction provides coverage of Luftwaffe volunteers from Greece, Lithuania, Holland, Denmark, Norway and even the United States. Detailed descriptions of the personnel themselves and the aircraft they operated are portrayed against the broader scope of combat missions,

field operations, and military campaigns, supplying invaluable historical perspective on the importance of their sorties.

**German Aircraft Industry and Production, 1933-1945** Ferenc A. Vajda, Peter Dancey, 1998 Beskriver den tyske flyindustri i perioden 1933-45, herunder de særlige forhold under 2. verdenskrig.

**Magyar Warriors** Dénes Bernád, Charles K. Kliment, 2015-02-19 The first book in the comprehensive, two-volume reference covering all aspects of the Hungarian military from the interwar period through WWII. During the First World War, Hungary lost territories containing sizable Magyar ethnic populations. In the years following the war—and especially in the 1930s—the country attempted to regain portions of these territories through a series of border wars. The corresponding buildup of armed forces, with assistance from Italy and Germany, positioned Hungary as a valuable, if secondary, member of the Axis powers. This comprehensive reference provides a complete picture of the Hungarian armed forces between the years 1919–1945. It starts with a brief history of the Magyars, describes the political situation in Hungary before and during WWII, the building of the armed forces, the growth of domestic arms manufacturers, the organization of the armed forces units, and how they changed during the war. The various campaigns of the war are described in great detail, illustrated with more than 500 photographs, as well as numerous tables and maps.

**Aircraft of WWII** Stewart Wilson, 1998 A comprehensive directory of the aircraft that saw service during World War II with over 300 entries covering the fighters, bombers, aircraft, transport built in some 15 nations around the world.

**The Global Commercial Aviation Industry** Sören Eriksson,Harm-Jan Steenhuis,2015-07-16 This book provides a state-of-the-art overview of the changes and development of the civil international aircraft/aviation industry. It offers a fully up-to-date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives, which include economic, geographical, political and technological points of view. The aircraft industry is characterized by very complex, high technology products produced in relatively small quantities. The high-technology requirements necessitate a high level of R&D. In no other industry is it more of inter-dependence and cross-fertilisation of advanced technology. Consequently, most of the world's large aircraft companies and technology leaders have been located in Europe and North America. During the last few decades many developing countries have tried to build up an internationally

competitive aircraft industry. The authors study a number of important issues including the political economy of the aircraft industry, globalization in this industry, innovation, newly industrializing economies and the aircraft industry. This book also explores regional and large aircraft, transformation of the aviation industry in Central and Eastern Europe, including engines, airlines, airports and airline safety. It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions.

*Edvard Beneš* Jan Kučera, Postava druhého československého prezidenta, Edvarda Beneše, dodnes vzbuzuje značné emoce. Mnozí mu vyčítají, že nevyužil odhodlání našeho národa bránit zemi proti nacistické agresi a podvolil se Mnichovskému diktátu. Bylo jeho rozhodnutí opravdu zradou národa, jak říkají jeho kritici, nebo záchranou statisíců životů, které by byly v případě konfliktu zbytečně ztraceny? Autor na základě ověřených faktů seznamuje veřejnost s naší vojenskou a politickou situací před Mnichovem v roce 1938. Na závěr nabízí čtenáři, aby si udělal svůj vlastní názor o rozhodnutí prezidenta Beneše v onom osudném roce.
