AERONCA C 2 Jay P. Spenser,1978-11-17

Dreams of Flight Janet R. Daly Bednarek,Michael H. Bednarek,2003-04-24 General aviation encompasses all the ways aircraft are used beyond commercial and military flying: private flights, barnstormers, cropdusters, and so on. Authors Janet and Michael Bednarek have taken on the formidable task of discussing the hundred-year history of this broad and diverse field by focusing on the most important figures and organizations in general aviation and the major producers of general aviation aircraft and engines. This history examines the many airplanes used in general aviation, from early Wright and Curtiss aircraft to the Piper Cub and the Lear Jet. The authors trace the careers of birdmen, birdwomen, barnstormers, and others who shaped general aviation—from Clyde Cessna and the Stinson family of San Antonio to Olive Ann Beech and Paul Poberezny of Milwaukee. They explain how the development of engines influenced the development of aircraft, from the E-107 that powered the 1929 Aeronca C-2, the first affordable personal aircraft, to the Continental A-40 that powered the Piper Cub, and the Pratt and Whitney PT-6 turboprop used on many aircraft after World War II. In addition, the authors chart the boom and bust cycle of general aviation manufacturers, the rising costs and increased regulations that have accompanied a decline in pilots, the creation of an influential general aviation lobby in Washington, and the growing popularity of “type” clubs, created to maintain aircraft whose average age is twenty-eight years. This book provides readers with a sense of the scope and richness of the history of general aviation in the United States. An epilogue examining the consequences of the terrorist attacks on September 11, 2001, provides a cautionary note.

Aeronca's Golden Age Alan Abel,Drina Welch Abel,Paul R. Matt,2001 Aeronca's Golden Ageprogressively details the events leading to the Aeronautical Corporation of America, from the early 1920s, through the Great Depression, the disastrous flood of 1937, World War II and beyond. Book includes biographical information on the founders of Aeronca, and details the people, facilities and manufacturing operations of Aeronca Aircraft Corporation, Middletown, Ohio, during the Golden Years of Aviation. Emphasis is given to the Aeronca Aircraft Corporation's models: Aeronca C-2, C-3, Model K, Model L, Aeronca 7AC Champ and Aeronca 11AC Chief. ALL Aeronca's models are discussed.

Industry and Air Power Sebastian Ritchie,1997 The author examines the relationship between industry and the state during the period immediately before the Second World War when increasing tension resulted in large government contracts.

United States Civil Aircraft Register ,1964

Industry and Air Power Noel Sebastian Ritchie,Sebastian Ritchie,2013-09-13 The author begins with a general survey of British aircraft manufacturing in the inter-war period. Policy, production, finance and contracts are examined, and the final chapter is concerned with the mobilization of the aircraft industry in 1939, and the emergency measures of 1940.

Flight Patterns Roger E. Bilstein,Roger Bilstein,2008-12-01 From 1918 to 1929 American aviation progressed through the pioneering era, establishing the pattern of its impact on national security, commerce and industry, communication, travel, geography, and international relations. In America, as well as on a global basis, society experienced a dramatic transformation from a two-dimensional world to a three-dimensional one. By 1929 aviation was poised at the threshold of a new epoch. Covering both military and civil aviation trends, Roger Bilstein's study highlights these developments, explaining how the pattern of aviation activities in the 1920s is reflected through succeeding decades. At the same time, the author discusses the social, economic, and political ramifications of this robust new technology. Aviation histories usually pay little attention to aeronautical images as an aspect of popular culture. Thoughtful observers of the 1920s such as Stuart Chase and Heywood Broun considered aircraft to be an encouraging example of the new technology-workmanlike, efficient, and graceful, perhaps representing a new spirit of international good will. Flight Patterns is particularly useful for its discussion of both economic and cultural factors, treating them as integrated elements of the evolving air age.
