Fractal Analysis of the Binding and Dissociation Kinetics for Different Analytes on Biosensor Surfaces Ajit Sadana, Neeti Sadana, 2007-12-20 Biosensors are finding increasing applications in different areas. Over the last few years the areas where biosensors may be used effectively has increased dramatically. This book like the previous four books on analyte-receptor binding and dissociation kinetics by this author addresses the often neglected area. The kinetics of binding and dissociation in solution to appropriate receptors immobilized on biosensor surfaces occurs under diffusional limitations on structured surfaces. The receptors immobilized on the biosensor surface contribute to the degree of heterogeneity on the sensor chip surface. The fractal analysis examples presented throughout the book provide a convenient means to make quantitative the degree of heterogeneity present on the sensor surface, and relates it to the binding and dissociation rate coefficients. The fractal dimension is a quantitative measure of the degree of heterogeneity present on the biosensor surface. The book emphasizes medically-oriented examples. The detection of disease-related analytes is also emphasized. The intent being that if intractable and insidious diseases are detected earlier, they will be controlled better, eventually leading to a better prognosis. Chapter 3 is a new chapter that emphasizes enhancing the relevant biosensor performance parameters such as sensitivity, stability, selectivity, response time, etc. As usual, as done in previous books by this author, the last chapter provides an update of the economics involved in biosensors, and the difficulties encountered in starting-up a biosensor company. - Modelling of binding and dissociation kinetics of analyte-receptor reactions on biosensor surfaces: provides physical insights into these reactions occurring on biosensor surfaces. Very few researchers even attempt to analyze the kinetics of these types of reactions. - Fractal analysis used to model the binding and dissociation kinetics: original and unique approach. - Economic analysis provided in the last chapter: helps balance the book; besides providing much-needed information not available in the open literature. - Emphasis on improving biosensor performance parameters: helps make biosensors better. - Emphasis on medically-related analytes: helps in prognosis of diseases.

Eyvilnar Colin Cage, 2016-01-20 Hion, a city near the border of New Mexico, is home to many unearthly and marvelous happenings, but it also carries the darkest of mystics: the battle between good and evil. For years, Sasha has lived in secret with his abilities, known only to his father and himself, believing to be the only one like him in the cosmos. But one day, unusual things start to happen. He always feels being watched and is being attacked by vampires, werewolves, and magical beings. What's going on here? There's a rumor that Sasha may perhaps be possessed by the evil god, Eyvilnar. Sasha is then pulled into a world of magic and fairy tales. As secrets are revealed, Sasha has to battle on his own for his friends prefer to remain cryptic. Who is he? What is he? Where is he from? As if all the excitement isn't enough, Cupid shoots his arrows, and Sasha finds his heart torn between a gorgeous yet quirky witch, Kaylee, and his equally beautiful neighbor, Tania. Where will destiny take him? And to whom will fate entrust his heart?

Female Entrepreneurship and the New Venture Creation Dafna Kariv, 2013-05-07 Women represent the fastest growing group of entrepreneurs today. Despite the enormous economic contributions of this group, female entrepreneurship remains under-explored and inadequately covered in academic literature. Female Entrepreneurship and New Venture Creation aims to address this gap by shedding light on the unique aspects of female entrepreneurship. Tracing women's journey along the venture creation process, Kariv's book: highlights the creatively different ways in which women approach the entrepreneurial

enterprise; takes into account different environmental and cultural constraints that impact female entrepreneurship; provides a theoretical framework for the venture creation process that is practical and broadly applicable; includes in-depth case studies drawn from contributors around the world. This book captures the diversity of female entrepreneurship and provides a valuable synthesis of the insights that emerge from the stories of women entrepreneurs around the world. It will be a valuable resource for students of entrepreneurship, as well as professionals.

Momonaf Ed Fire, 2017-02-18 Welcome to the second edition of Momonaf! This new edition contains many different graphics and now it also has its original alphabet. With this new edition you will be able to read Momonaf in its original version. I have added new words, sentences with many new pictures and illustrations. The dictionary is also renewed and has almost 10,000 words now. The total words are over 44,000 and the mistakes that were in the first book are now corrected. This new edition will give you a satisfaction of learning. While doing that you will also find many quotes of famous people translated in every chapter. The book has now 74 chapters and it is 244 pages in A4 format. The entire book is colorful. You will love this new version. As traditionally I will add what Momonaf means and why you should learn this language. There is more information about where this language comes from and why it is important to learn it. You will see it all in the book. But let's make a short introduction and let you know what you are going to buy. Momonafe and Momonaf Momonafe ue Momonaf Mom+mona+afe, Mom – blue Mona – star Afe – land The concept of Momonaf comes from Momonafe. Momonafe is a lovely planet in the orbit of a blue star named Momona. It is the seventh biggest planet in the solar system of the Momona Star System –MMA, (memea)- Momona Mona Aloa. Momonafe has a good climate with some special sub climates. There are four big oceans on the planet. One divides the total continents vertically. There are six continents and five big islands that are big as Germany, UK, and Turkey. There are three continents that have borders with each other along some big rivers. The other three continents are giant islands on the oceans. The planet's oceans are mostly blue but the big ocean that is named Memaio has an ice surface in the north that is mostly turquoise. The white glaciers are as high as mountains in the north. There is no land in the north but the swimming giant ice glaciers. They are so big that if one sees them for the first time in his life he will think that they are actually frozen lands. In this planet the air is totally clean. There is no pollution on the planet. The inhabitants of the planet are human like living beings. They are mostly taller than humans of the planet Earth. And they are very peaceful explorer people. They have a very high-level technology. They have created sea fields along the continents that provide energy from their sun to make efficient energies for their daily lives. In Momonafe one can travel freely everywhere on the planet. To travel in space is also free but one needs to have an educational space program. It is actually not difficult. Because they have evolved in technology long ago. Momonef is the general name of the people of Momonafe. They came to this planet from another planet of the same solar system. Since they have colonized the planet they created amazing things. One of them is Momonaf. As you can see this language is from a different place in this universe. I hope you enjoy it while learning. Let's get started!

Housepital Hwarien, 2020-04-29 Berkisah tentang seorang Nanda yang mengidap Odapus yang mana 90% pengidapnya adalah wanita. Nanda yang sudah sering bulak-balik dirawat di Rumah Sakit, sangat bangga dengan predikat senior bahkan ia memasang tulisan 'Area Penghuni Senior, Gunakan Adab dan Sopan

Butterfly Crush Hwarien,2024-02-07 “Dasar psikopat!” Caroline sudah terbiasa dengan umpatan itu, padahal ia yakin 99% bahwa ia hanya gadis biasa yang kebetulan mempunyai hobi yang tergolong unik, yakni menonton film dengan tokoh utama lelaki penyakitan. Ia bahkan masuk jurusan ilmu komunikasi untuk memenuhi obsesinya sebagai kreator film. Seumur hidup, Caroline juga berdoa agar bisa bertemu dan memiliki pacar yang sakit-sakitan, lalu menjaganya seperti film yang ditonton. Hingga pada hari pertama OSPEK, Tuhan mempertemukannya dengan penderita lupus bernama Nanda. Ia pun mengejar lelaki itu dari diklat sampai mengikuti kegiatan komunitas odapus.
