Advances in Production Management Systems. Initiatives for a Sustainable World Irenilza Nääs,Oduvaldo Vendrametto,João Mendes Reis,Rodrigo Franco Gonçalves,Márcia Terra Silva,Gregor von Cieminski,Dimitris Kiritsis,2017-03-15 This book constitutes the refereed post-conference proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2016, held in Iguassu Falls, Brazil, in September 2016. The 117 revised full papers were carefully reviewed and selected from 164 submissions. They are organized in the following topical sections: computational intelligence in production management; intelligent manufacturing systems; knowledge-based PLM; modelling of business and operational processes; virtual, digital and smart factory; flexible, sustainable supply chains; large-scale supply chains; sustainable manufacturing; quality in production management; collaborative systems; innovation and collaborative networks; agrifood supply chains; production economics; lean manufacturing; cyber-physical technology deployments in smart manufacturing systems; smart manufacturing system characterization; knowledge management in production systems; service-oriented architecture for smart manufacturing systems; advances in cleaner production; sustainable production management; and operations management in engineer-to-order manufacturing.

Elvanger Richard S. Tuttle,2004 Thousands of years ago, humans attacked Elvanger, the land of the elves. The elves responded with a devastating attack, which ended with the sealing of the human city of Angragar. Sealed by the hand of Kaltara and hidden in an impenetrable jungle, Angragar has remained dormant waiting for the prophesized Astor to arrive and reopen the gates. Now that the Time of Calling has arrived, Angragar has awakened, and the elves of Elvanger prepare for a human invasion. Caught in the middle are four elves who have escaped from the Island of Darkness. Eltor, Caldal, Mistake, and MistyTrail tread carefully in both lands as the world prepares for a war unlike any other in history.

A Dictionary of Moroccan Arabic Richard Slade Harrell,Harvey Sobelman,Thomas Fox,2004 This classic volume presents the core vocabulary of everyday life in Morocco--from the kitchen to the mosque, from the hardware store to the natural world of plants and animals. It contains myriad examples of usage, including formulaic phrases and idiomatic expressions. Understandable throughout the nation, it is based primarily on the standard dialect of Moroccans from the cities of Fez, Rabat, and Casablanca. All Arabic citations are in an English transcription, making it invaluable to English-speaking non-Arabists, travelers, and tourists--as well as being an important resource tool for students and scholars in the Arabic language-learning field.

3D Interconnect Architectures for Heterogeneous Technologies Lennart Bamberg,Jan Moritz Joseph,Alberto García-Ortiz,Thilo Pionteck,2022-06-27 This book describes the first comprehensive approach to the optimization of interconnect architectures in 3D systems on chips (SoCs), specially addressing the challenges and opportunities arising from heterogeneous integration. Readers learn about the physical implications of using heterogeneous 3D technologies for SoC integration, while also learning to maximize the 3D-technology gains, through a physical-effect-aware architecture design. The book provides a deep theoretical background covering all abstraction-levels needed to research and architect tomorrow's 3D-integrated circuits, an extensive set of optimization methods (for power, performance, area, and yield), as well as an open-source optimization and simulation framework for fast exploration of novel designs.

Flandry's Legacy Poul Anderson,2011-04-05 Sir Dominic Flandry is now an Admiral, but takes little joy in his new rank. He sees the rot in the Terran Empire on every hand and knows that the Long Night will inevitably fall upon the galaxy. His consolation is that measures he has taken while doing what he can to postpone the Empire's final collapse may shorten the coming galactic dark age and hasten the rise of a new interstellar civilization. In the meantime, he'll enjoy the comforts of a decadent civilization-and he'll always be ready for one more battle against the Empire's enemies. This concluding volume of the Technic Civilization saga, one of the milestones of modern science fiction includes two full-length novels: A Stone in Heaven - When the daughter of Flandry's mentor asks for help, he intervenes, and finds he must thwart a would-be dictator's plans to seize control of the Empire.The Game of Empire -The Merseians, alien enemies of the Empire, have put into motion an insidious plan to bring the Terran Empire down. Flandry's daughter, Diana, and her feline-like alien friend have discovered the conspiracy, but can they stop it in time? Plus three novellas and a novelette set in the time of the Long Night and the renaissance of civilization which followed it, concluding one of the grandest adventure sagas in science fiction. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Superconductors Alexander Gabovich,2012-10-17 The book includes 17 chapters written by noted scientists and young researchers and dealing with various aspects of superconductivity, both theoretical and experimental. The authors tried to demonstrate their original vision and give an insight into the examined problems. A balance between theory and experiment was preserved at least from the formal viewpoint (9 and 8, respectively). The readers should be warned that many of the problems studied here are far from being solved and are treated on the basis of competing viewpoints. The reason is that such is the state of the art! Science of superconductivity develops rapidly and new unexpected discoveries are expected in the nearest future.

Dwell ,2008-06 At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Multi-Level Bayesian Models for Environment Perception Csaba Benedek,2022-04-18 This book deals with selected problems of machine perception, using various 2D and 3D imaging sensors. It proposes several new original methods, and also provides a detailed state-of-the-art overview of existing techniques for automated, multi-level interpretation of the observed static or dynamic environment. To ensure a sound theoretical basis of the new models, the surveys and algorithmic developments are performed in well-established Bayesian frameworks. Low level scene understanding functions are formulated as various image segmentation problems, where the advantages of probabilistic inference techniques such as Markov Random Fields (MRF) or Mixed Markov Models are considered. For the object level scene analysis, the book mainly relies on the literature of Marked Point Process (MPP) approaches, which consider strong geometric and prior interaction constraints in object population modeling. In particular, key developments are introduced in the spatial hierarchical decomposition of the observed scenarios, and in the temporal extension of complex MRF and MPP models. Apart from utilizing conventional optical sensors, case studies are provided on passive radar (ISAR) and Lidar-based Bayesian environment perception tasks. It is shown, via several experiments, that the proposed contributions embedded into a strict mathematical toolkit can significantly improve the results in real world 2D/3D test images and videos, for applications in video surveillance, smart city monitoring, autonomous driving, remote sensing, and optical industrial inspection.
