Explaining Post-Soviet Patchworks Klaus Segbers,2017-10-05 This title was first published in 2001: Based on extensive research, this trilogy provides new insights into Post-Soviet transformations without taking refuge in the traditional assumption that Russia is unique. Using powerful analytical tools, this trilogy marks the re-integration of the Former Soviet Union (FSU) into the main current of political science. An invaluable resource for all those interested in Russia and the Post-Soviet states. This first volume focuses on state, sectoral, and transnational actors from a predominantly rational choice perspective. The book includes an extensive introduction by the editor which uses additional material gathered by the project team on two polls, 1999 and 2000, which, in addition to the individual studies, provide sufficient data to obtain unprecedented insights into the basic preferences and the logic of action of the main players in Russia. The outcomes of this research will be particularly relevant for students, researchers, journalists and decision-makers interested in Russia and the Post-Soviet states' politics, international relations, economics, social policy and sociology.

Enterprise Restructuring and the Role of Managers in Russia Gary Krueger, 2015-07-17

This book tells the story of what might have been considered an unlikely source of dynamic change in Russia - formerly state-owned manufacturing enterprises and their managers. Based on interviews conducted over a six-year span with managers at 47 manufacturing, light industry, consumer durable, and food processing firms in four Russian cities, the study documents the real world challenge of turning hidebound, often dysfunctional manufacturing operations into thriving companies. With analytical rigor and theoretical creativity, this work will dispel some common misconceptions about the Russian economy and make a contribution to the literature about management, company strategies, and corporate governance.

A Dictionary of Modern Design Jonathan Woodham, 2016-05-19 Over 950 entries From the Arts and Crafts Movement to Postmodernism, Apple to Frank Lloyd Wright, this fascinating dictionary covers the past 160 years of international design, with accessible entries on branding, graphics, industrial design, functionalism, and fashion. New entries on digital design and sustainable design bring the coverage up to date. The dictionary's international focus takes in major movements, key concepts, design terminology, and important design institutions, museums, and heritage sites. The new edition reflects the growing global importance of design, with coverage of India, China, the countries of the Pacific Rim, Eastern Europe and East Asia, and demonstrates how developments in the design of technology influence everyday life, with new entries on fonts, games developers

such as Gunpei Yokoi of Nintendo, Android, Samsung, and Blackberry, and a fully revised entry on Apple. The A-Z entries are complemented by an extensive bibliography and a timeline.

The East European Automotive Sector Edward Pincheson, Michael Wooller, Economist Intelligence Unit, 1994

The Workers' Movement in Russia Simon Clarke, Peter Fairbrother, Vadim Borisov, 1995
This major new book surveys the development of the new workers' movement in Russia under perestroika to understand how it connected with the workers at shop floor level and the national and local political authorities to whom it addressed its demands, and whose development it sought to influence. Drawing on a unique programme of collaborative research on Russian industrial relations from 1987 to 1995, the authors use a series of case studies to explain the gulf between the thousands of tiny independent groups, often based in a single enterprise or even a single shop, and regional and national organizations without a grassroots base. Extensive interviews with participants, tape and video recordings, as well as substantial documentary material are used in case studies of the 1989 miners' strike in Kuzbass, the Kuzbass regional council of workers' committees, the independent miners' union in Kuzbass, Sotsprof in Moscow and the Federation of Air Traffic Controllers' Unions. An extensive introduction puts these studies into context.

A Crate of Vodka Al'fred Kokh,Igor' Svinarenko,2009 Brezhnev died in 1982, and in 2001 terrorists bombed New York and Washington. In between, in 1991, a great empire collapsed. All those events fit into our slice of time, exactly twenty years, like vodka bottles in a crate. In the course of a series of conversations, the authors revisit, in an original give-and-take, the last twenty years of Russia's history since the end of communism. From the death of Leonid Brezhnev in 1982 to September 11, 2001, Russia lived through monumental changes: economic transformation, where Alfred Kokh was in charge of privatization and Igor Svinarenko covered the scandal as a journalist; Kokh went to Chechnya as a diplomat to negotiate peace while Svinarenko was there to cover the war, placing his life at risk; Kokh was hired to take over NTV television station owned by Gasprom Media, while Svinarenko obtained the Soros Foundation Award for Reporter of the Year. These are just some of the issues covered in this lively overview of Russia's recent history that reads at times like *My Dinner with Andre*. Both writers exaggerate their positions to provoke the other (and the reader). It makes for sharp intellectual fun. Their topics include sex and Russia's faltering demographics, religion, marriage, crime, government, and politics--almost every subject that comes up among friends. They give an inside story of Russia, a backstage tour of oligarch turf battles--in politics and commerce--and a look into the hearts of two people who are passionate about their country and its

future.
