Quests Jeff Howard,2022-04-24 Combining theory and practice, this updated new edition provides a complete overview of how to create deep and meaningful quests for games. It uses the Unity game engine in conjunction with Fungus and other free plugins to provide an accessible entry into quest design. The book begins with an introduction to the theory and history of quests in games, before covering four theoretical components of quests: their spaces, objects, actors, and challenges. Each chapter also includes a practical section, with accompanying exercises and suggestions for the use of specific technologies for four crucial aspects of quest design: • level design • quest item creation • NPC and dialogue construction • scripting This book will be of great interest to all game designers looking to create new, innovative quests in their games. It will also appeal to new media researchers, as well as humanities scholars in the fields of mythology and depth-psychology that want to bring computer-assisted instruction into their classroom in an innovative way. Azura Ghost Essa Hansen,2022-02-01 One man and his sentient starship are all that stands between the multiverse and its total destruction in the second book of Essa Hansen’s brilliant, mind-bending space opera trilogy perfect for fans of The Expanse and A Long Way to a Small Angry Planet. Caiden has been on the run for ten years in order to keep his Graven ship out of the hands of his old adversary, Threi. But when a childhood friend he once thought dead reappears to take it, he is lured into a game of hunter and hunted with the one person whose powers rival Threi’s; his sister, Abriss. Now to have a fighting chance against the most influential siblings in the multiverse, Caiden is left with no choice. He must unlock the Azura's true potential—which means finally confronting his own mysterious genetic origins. Unpredictable and strikingly unique, Azura Ghost is science fiction without any limits to its imagination. Genre-breaking brilliance!--David Dalglish, USA Today bestselling author A blistering crash through bubble universes, seas of the luminous dead, and sleeping alien cities. Liquid-crystal star ships, living machines, reality-cleaving swordplay, and a dynasty whose words command your synapses and cells. Heart-heavy, astonishingly inventive, with language that burns like plasma. A biomechanical sucker punch of a book. The space opera you’ve been waiting for.--Micah Dean Hicks, author of Break the Bodies, Haunt the Bones Essa Hansen is one of the most imaginative authors in science fiction today, and in AZURA GHOST she delivers a thrill ride of a story.--Michale Mammay, author of Planetside Azura Ghost is a magnificent achievement. Hansen juggles multiple universes as if they were fireballs, without ever dropping a single one. Like the best of science fiction, Azura Ghost asks the questions that we often fear to ask ourselves: about the extent of our responsibility in this world, what it means to choose, the limits of empathy, and the inevitability of loss; and like the best of science fiction, it asks them both at the scale of the cosmos, and at the level of a single human heart. The novel's ambition is upheld by soaring prose, which does full justice to the scope of Hansen's imagination. An instant classic. -- Gautam Bhatia, co-ordinating editor of Strange Horizons and author of The Wall and The Horizon

Any Kind of Danger Dr. Rowan Blogg,2012-08-01 Know the animals, respect the planet, love thy neighbor. Rowan Blogg is an Australian veterinarian of the highest distinction and I greatly admire his professionalism, which I observed for years at close range. In Any Kind of Danger he has extended his work into the environment and moral philosophy by tackling the complex issue of how we exploit animals. In the 19th Century William Wilberforce and other pioneers argued that our treatment of animals is a measure of our humanity. Peter Singer’s Animal Liberation (1975) stimulated international interest in the subject. Dr Blogg’s book should do the same. Rowan Blogg examines the role of wildlife on the planet, millions of years before our species became dominant, but how much habitat do we reserve for their natural life? How many species are under threat? The world’s population will stabilise at about nine billion in 2050 – and this raises the fundamental issues of how much land, water and energy we will devote to raising animals for food. Is grazing an efficient or humane way of feeding our species? Industrial farming – out of sight and out of mind – involves inescapable cruelty. Chickens are raised on an A4 size of smaller ‘scratching area’, confined in multi-layered cages. Do animals have a right of access to sunlight and paddock for at least the great part of their lives? How does a cow giving birth cope with a crowded cattle truck? Do we turn our eyes away from the inevitable suffering involved in animal transport, especially life sheep exports? There are profound moral lessons to be learned from observing how we treat animals – and yet the issue will not be on the agenda for the next Federal or State elections. We are in Dr Blogg’s debt for this thoughtful, passionate book. -Barry Jones, AO, FAA, FAHA. FTSE, FASSA Australian Minister for Science 1983-90

AZURA Julia Cuttler,2011-10-20 The universe and all it contains is nothing but theory, whether it is scientific or religious in nature. Every theory is open to debate, and with proof can ultimately change a belief, alter the solar system, or help change the future for the children of tomorrow. Step backwards and forwards in time and experience the beginning with Azura. Learn as she does through her magical and mystical journey the tales and legends, myths and theories of the planet we call Earth. Experience the wonder and beauty of love and also the pain that love can impose upon each and every one of us, when we meet our twin flame, or soul mate. For in this world and beyond there is only one true twin flame. As you read you may come up with your own theories, never discard them and never ever stop believing and dreaming, for without our beliefs in who we are and where we came from, and without our dreams of better things, we will become nothing but particles within the universe, and like those particles become lost in time forever.....
