Alberto Ginastera Deborah Schwartz-Kates,2011-05-03 Alberto Ginastera: A Research and Information Guide is the first bio-bibliographic study of the composer and the only published book on the subject in English. This work fills a critical gap in contemporary music studies by enriching our knowledge of one of the most compelling creative voices of the Americas. Given the lack of prior systematic attention to Ginastera, this book establishes a firm foundation for future scholarship. It includes a detailed biographical sketch of the composer that quotes extensively from his letters. It summarizes the defining features of his style and encompasses his infrequently explored late works. It offers the most comprehensive catalogue of Ginastera's music to date and provides an annotated list of his published writings. This book contains over 400 annotated bibliographic entries that refer to critically selected sources in English, Spanish, French, German, and Italian. The last chapter offers new information about archival holdings and internet resources that facilitates research on this composer. An appendix featuring a detailed chronology of Ginastera's career completes this work.

The Haram of Jerusalem, 324-1099 Andreas Kaplony,2002 From the Muslims' to the Crusaders' conquest Jerusalem is among the world's best known cities. Its most outstanding and constant feature is its shared holiness by three major confessions (Muslim, Jewish and Christian). Covering the Marwanid, the Abbasid, and the Faimid phase, this study describes not only the emergence of conceptions with which the three major confessions share this city, but also their interactions as well as the political circumstances and religious axioms which give each conception its specific shape. Looking for these conceptions of the holy area of the city the Haram has been chosen. This area of the former temple was highly significant to all three confessions. The analysis is based on a careful description of the Haram (focusing on topics like names and traditions, architecture, rituals and customs, visions and dreams), and on the establishment of as many parallels as possible. The result is a volume of astonishing depth and comprehensiveness [1] As a compendium of sources it is unrivalled. Journal of Palestine Studies The excellent graphics added to each section, culminating in 103 figures, deserve special mention. Also impressive is Kaplony's generous handling of space; it seems that he was aiming for the display of all the texts available to him. [2] taking into account Kaplony's treatment of the subject, one is tempted to compare it with that of the precision and care of Swiss watchmakers. Unless new sources come to light, which is not very likely, this book will be the standard work [3] for many years to come. Jerusalem Studies in Arabic and Islam This book is an excellent contribution to the growing literature on Islamic Jerusalem, and it will indubitably be of interest to scholars and students of medieval Islamic history. International Journal of Middle East Studies.

A Gravity's Rainbow Companion Steven C. Weisenburger,2011-03-15 Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's indispensable guide to Thomas Pynchon's Gravity's Rainbow. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such subdialects of English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of Gravity's Rainbow--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal American editions of Gravity's Rainbow: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty Great Books of the

Twentieth Century.

Handbook of Biotransformations of Aromatic Compounds B.L. Goodwin,2004-11-10 Understanding the biotransformations of aromatic compounds and how they metabolize in animals, plants, and microbes, is central to the applications in a wide range of industries, such as the design and testing of natural and synthetic pharmaceuticals, oil refining, the development of agrochemicals, bioremediation, and for use in functional genomics and xenobiotics. Presenting the most complete resource of its kind, the Handbook of Biotransformations of Aromatic Compounds examines 20,000 aromatic compounds researched since 1972, and assembled from all the major, relevant journals. The author focuses his coverage on the biotransformation in animals, plants, and microbes while remaining within the scope of aromatic compounds that contain, or are fused with, at least one aromatic C6 ring. Part One lists each compound alphabetically along with the forward and reverse mechanisms of its metabolism in specific organisms. Part Two characterizes the different types of organic reactions that have been identified - including formation and degradation, oxidations and reductions, substitution, and transfer reactions - and the enzymes associated with those reactions. The author cites selected references for enzymes that are well documented while filling in the details for those with little research literature. This book also contains a searchable CD-ROM of the author's previous work covering aromatic compounds researched from 1900 through 1972. Presenting the most complete resource of its kind, this well-established author draws on his firsthand knowledge to organize a large body of information into a user-friendly and indispensable handbook for professionals, policymakers, and researchers alike.
