Nakajima B5n Kate Dariusz Paduch,2022-01-31 When war broke out in the Pacific, the Japanese naval air force had the world's most advanced Nakajima B5N2 torpedo-bomber aircraft, which was far superior to the American Douglas TBD-1 Devastator and a generation ahead of the British Fairey Swordfish biplanes. The Japanese aircraft were faster, more maneuverable, and could drop torpedoes from a higher altitude. After a successful debut over Pearl Harbor, these machines were involved in every major naval battle until 1944, making a permanent mark on aviation history. It was not until 1943/1944 that this superb aircraft began to be replaced by the modern Nakajima B6N Tenzan. The road to the creation of B5N was not easy and was fraught with many failures.

Pacific Carrier War Mark Stille,2021-10-14 A detailed and comprehensive study of the carrier formations of the Pacific War, including their origins, development and key battles from the Coral Sea, through Midway and Guadalcanal to the battle of the Philippine Sea. The defining feature of the Pacific Theatre of World War II was the clash of carriers that ultimately decided the fate of nations. The names of these battles have become legendary as some of the most epic encounters in the history of naval warfare. Pre-war assumptions about the impact and effectiveness of carriers were comprehensively tested in early war battles such as Coral Sea, while US victories at Midway and in the waters around Guadalcanal established the supremacy of its carriers. The US Navy's ability to adapt and evolve to the changing conditions of war maintained and furthered their advantage, culminating in their comprehensive victory at the battle of the Philippine Sea, history's largest carrier battle, which destroyed almost the entire Japanese carrier force. Examining the ships, aircraft and doctrines of both the Japanese and US navies and how they changed during the war, Mark E. Stille shows how the domination of American carriers paved the way towards the Allied victory in the Pacific.

Tora! Tora! Tora! Mark Stille,2011-11-20 In the early hours of December 7, 1941, the Japanese First Air Fleet launched a massive air-strike against the American Pacific Fleet based at Pearl Harbor in Hawaii. Supported by a group of midget submarines, the attack gutted the American battleship fleet but, owing to a lack of intelligence, the American aircraft carriers they hoped to destroy were not present. In this new study of the raid, Mark Stille reexamines the political context of the attack and the intelligence operations of both sides, and gives a detailed analysis of all the major events during the battle. Backed with numerous photographs, diagrams, maps, and artwork, this book is a complete study of the Japanese attack that awoke 'the sleeping giant'.

Nakajima B5N 'Kate' and B6N 'Jill' Units Mark Chambers,Tony Holmes,2017-06-29 Entering service during the Sino-Japanese War, the Nakajima B5N (code-named 'Kate') excelled and went on to achieve surprising and dramatic successes in the Japanese attack on Pearl Harbor. It also contributed to the sinking of the US aircraft carriers USS Lexington at the Battle of the Coral Sea, USS Yorktown at the Battle of Midway, and USS Hornet at the Battle of the Santa Cruz Islands. Its replacement, the Nakajima B6N 'Jill', while a marked improvement over its illustrious predecessor, was never able to achieve its full potential in combat due to advances in Allied aircraft, finding itself relegated to the dreaded Kamikaze strikes in the latter part of the war. Using previously unpublished photographs as well as colour illustrations, this book will cover the history of the 'Kate' and 'Jill' torpedo/attack bombers, including their design and development, as well as the combat highs and lows of the Imperial Japanese Navy's premier torpedo-bombers.

Aircraft Carriers Norman Polmar,2006-09-01 Aircraft Carriers is the definitive history of world aircraft carrier development and operations. Norman Polmar's revised and updated, two-volume classic describes the political and technological factors that influenced aircraft carrier design and construction, meticulously records their operations, and explains their impact on modern warfare. Volume I provides a comprehensive analysis of carrier developments and warfare in the first half of the twentieth century, and examines the advances that allowed the carrier to replace the battleship as the dominant naval weapons system. Polmar gives particular emphasis to carrier operations from World War I, through the Japanese strikes against China in the 1930s, to World War II in the Atlantic, Mediterranean, Arctic, and Pacific theaters. It begins with French inventor Clément Ader's remarkably prescient 1909 description of an aircraft carrier. The book then explains how Britain led the world in the development of aircraft-carrying ships, soon to be followed by the United States and Japan. While ship-based aircraft operations in World War I had limited impact, they foreshadowed the aircraft carriers built in the 1920s and 1930s. The volume also describes the aircraft operating from those ships as well as the commanders who pioneered carrier aviation. Aircraft Carriers has benefited from the technical collaboration of senior carrier experts Captain Eric M. Brown and General Minoru Genda as well as noted historians Robert M. Langdon and Peter B. Mersky. Aircraft Carriers is heavily illustrated with more than 400 photographs—some never before published—and maps. Volume II, which is forthcoming from Potomac Books in the winter 2006-2007 (ISBN 978-1-57488-665-8), will cover the period 1946 to the present.

US Navy Ships vs Japanese Attack Aircraft Mark Stille,2020-09-17 The striking power of the Imperial Japanese Navy's carrier-based attack aircraft was established at Pearl Harbor, and the IJN's carrier-based torpedo and dive-bombers showed their prowess again at the Battle of Coral Sea when they sank the US Navy carrier USS Lexington and damaged the carrier USS Yorktown. Even at the disastrous Battle of Midway, the relatively small number of IJNAF attack- and torpedo-bombers that were launched against the US fleet proved that they remained a potent force by heavily damaging Yorktown again, which allowed an IJN submarine to sink the carrier. At Guadalcanal, IJNAF carrier-based aircraft sank the carrier USS Hornet and badly damaged USS Enterprise twice. However, throughout 1942, US Navy ship defences brought down an increasing number of attacking IJNAF aircraft. The final major battle of the year, the Battle of Santa Cruz, exacted crippling losses on the IJN, setting the stage for the eclipse of the IJNAF's highly trained and effective aviation attack forces. Packed with illustrations and contemporary photographs, this engrossing volume details the design, tactics, and operational records of both the US Navy ships and the IJNAF aircraft which attacked them over the year following Pearl Harbor.

Pearl Harbor Spencer C. Tucker,2015-10-13 This book provides students with an understanding of the motives behind the Japanese attack on Pearl Harbor and the consequences of this action on Japan, on the United States, and on the outcome of World War II. This essential reference guide is devoted to one of the most important military events in American history: the Pearl Harbor attack of December 7, 1941, the day of infamy. Distinguished military historian Spencer C. Tucker is the editor of this thorough study of the Japanese attack that contains reference entries as well as primary documents and oral histories describing the circumstances that led up to the attack, the event itself, and its immediate aftermath and consequences, thereby providing readers with the necessary context to understand all aspects of the attack on Pearl Harbor. Readers will understand why Japanese leaders decided to go to war with the United States, what they expected to accomplish in attacking Pearl Harbor, why this key American base was not better defended, and what the aftereffects of the attack were for the outcome of the war. Biographies on major players in the crisis such as Franklin Roosevelt, Chester Nimitz, Isoroku Yamamoto, and Hideki Tojo will provide insight into the individuals who played key roles in the events before, during, and after December 7, 1941.

Major Fleet-Versus-Fleet Operations in the Pacific War, 1941-1945 Milan N. Vego,2016 A detailed study of three major naval operations of World War II. These three, initiated by imperial Japan, took place in the Pacific and resulted in the battles of the Coral Sea, Midway/Aleutians, and the Philippine Sea. All the cases provide ample background on the geographic and strategic context of the operations, as well as an account of the unfolding of the action utilizing much primary source material in, especially, American and Japanese archives--Provided by publisher.

Midway 1942 Mark Stille,2012-06-20 In less than one day, the might of the Imperial Japanese Navy was destroyed and four of her great aircraft carriers sank burning into the dark depths of the Pacific. Utilizing the latest research and detailed combat maps, this book tells the dramatic story of the Japanese assault on Midway Island and the American ambush that changed the face of the Pacific war. With sections on commanders, opposing forces, and a blow-by-blow account of the action, this volume gives a complete understanding of the strategy, the tactics, and the human drama that made up the Midway campaign, and its place as the turning point in the Pacific war.

The Rise and Fall of the Japanese Imperial Naval Air Service Peter J. Edwards,2010-11-20 This book describes in considerable detail the people, events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945. The formative years began when a

British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes. After the first successful flights of fixed-wing aircraft in the USA and Europe, the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate. During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans. However, in the international naval treaties that followed they felt betrayed, since the number of capital ships, battleships and cruisers, that they were allowed was below those of the USA and the UK. Aircraft carriers were not included, so a program of carrier building was started and continued until World War Two. At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable, and in some instances superior, to those of the British and Americans. Much prewar experience was gained during Japan's invasion of China, but their continued anger with America festered and resulted in their becoming allied with Germany, Italy and the Vichy France during World War Two. There followed massive successful attacks on Pearl Harbor, the Philippines, the Southern Islands, Port Darwin and New Guinea. The British were decimated and the USA recoiled at the onslaught, taking over a year to regroup and take the war to the Imperial Japanese forces. Throughout the conflict many sea battles were fought and the name Zero became legendary. When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded.

Darwin 1942 Bob Alford, 2017-02-23 Following the devastating raids on Pearl Harbor on 7 December 1941, lightning advances by Japanese forces throughout the Pacific and the Far East, and a desperate battle by the Allied command in the Dutch East Indies, it became evident that an attack on Australia was more a matter of 'when' and not 'if'. On 19 February, just eleven weeks after the attacks on Pearl Harbor and two weeks after the fall of Singapore, the same Japanese battle group that had attacked Hawaii was ordered to attack the ill-prepared and under-defended Australian port of Darwin. Publishing 75 years after this little-known yet devastating attack, this fully illustrated study details what happened on that dramatic day in 1942 with the help of contemporary photographs, maps, and profiles of the commanders and machines involved in the assault.

Knife's Edge Robert C. Stern, 2023-02-15 While the resounding American victory at Midway in June 1942 blunted Japanese momentum to a great extent, it left the opposing forces precariously balanced, particularly in the South Pacific. In *Knife's Edge* Robert C. Stern provides an account of the Battles of the Eastern Solomons and the Santa Cruz Islands, the two pivotal carrier air battles that followed the initial engagements at the Coral Sea and Midway between the U.S. Navy and the Imperial Japanese Navy. Three U.S. aircraft carriers were sunk or badly damaged over the two months following Midway, including USS Enterprise at the Battle of the Eastern Solomons. Had it not been for the fortuitous arrival of USS Hornet at the end of August, the Americans would have been without an aircraft carrier in the South Pacific until Enterprise returned from repairs on 24 October. At that moment, another major Japanese offensive was afoot, again led by two large carriers, this time supported by another light carrier and a mid-sized merchant-hull conversion. The resulting Battle of the Santa Cruz Islands on 26 October 1942 was a solid tactical victory for the Japanese, who managed to sink Hornet and once again damage Enterprise. Stern has written a history of the two final early carrier battles fought between the U.S. Navy and Imperial Japan. These pivotal battles, coming after the triumph of the U.S. at Midway, illustrate lessons learned from these earlier battles of the Pacific War. Readers already familiar with the history of World War II at sea should find this account a riveting new look at a chapter of the Pacific War rarely covered until now.

The Coral Sea 1942 Mark Stille, 2012-06-20 The Battle of the Coral Sea is unique in the annals of naval history. It is the first battle in which enemy fleets never came within sight of one another. Instead, aircraft launched from carrier decks were sent out to attack the enemy with bombs and torpedoes. In May of 1942, the Japanese fleet moved on Port Moresby, the last Allied base between Australia and Japan. Forced to respond, the Americans sent two aircraft carriers to protect the base. In the ensuing battle, one American carrier was destroyed and the other severely damaged. However, the Japanese also lost a carrier and decided to withdraw. Although bloody, it proved to be an important strategic victory for the Allies as the Japanese were forced to attempt future attacks on Port Moresby over land. Using the latest research and numerous period photographs, retired USN Commander Mark O Stille tells the story of this important and unique battle in the Pacific War.

Carrier Operations in World War II J. D. Brown, 2009-05-21 Between 1939 and 1945 the Royal Navy's Fleet Air Arm grew from a small force into a powerful strategic weapon. British carrier-based aircraft fought throughout the world and David Brown here describes their activities in the Home, Mediterranean, Eastern and British Pacific Fleets, together with Forces created for specific operations, listing aircraft and units embarked during the various phases. He goes on to describe carrier operations in the Pacific between 1941 and 1945, the greatest maritime war in history. Both the United States and Imperial Japanese Navies watched the Royal Navy's early carrier operations in the European Theatre and benefited from the lessons. American aircrews and sailors learnt quickly in action until, by March 1945, the United States Fifth Fleet with its associated Marine Corps formations was probably the most efficient and effective instrument of war deployed in the pre-nuclear age. This new work contains material from two volumes, first published in 1968 and 1974, merged with notes for a third which David Brown prepared but never published before his death. They appear for the first time together, providing the most detailed single-volume account currently available of the operation of British, American and Japanese aircraft carriers in World War II.

Operation Ro-Go 1943 Michael John Claringbould, 2023-11-23 A compelling account of the failure of Imperial Japan's Operation Ro-Go, intended to take the offensive in the Solomons theater of the Pacific War, but which became Japan's first line of defense against the Allies' Rabaul raids and Bougainville landings. By the midpoint of World War II in the Pacific, Japan was on the defensive. At the end of 1943, after a year of tumultuous air combat around Rabaul and the Solomons, 173 Japanese aircraft were sent to Rabaul. The plan was for them to participate in Ro-Go Sakusen (known as Operation Ro, Ro-Go, or B) to strike Allied air power and shipping in the Solomons and to slow the American advance by severing Allied supply chains. However, instead of challenging Allied air and sea power on their own terms, the operation became unexpectedly embroiled in defensive combat and counterattacks, first to defend Rabaul from Allied air raids, and then to challenge the Allied landings at Bougainville. In one fell swoop, Operation Ro-Go was turned on its head, and transformed into a defensive battle for the Japanese. In this book, the first in English to focus on Operation Ro-Go, Michael John Claringbould uses rare Japanese primary source material to explain how the Japanese planned and fought the campaign, and corrects enduring myths often found in books that rely only on Western sources. He traces the unexpected and tremendous pressures placed on the operation's units at Rabaul as the Japanese dealt with massive, surprise raids from Fifth Air Force bombers, and later US Navy carrier aircraft, concluding with the strategic upset of the Bougainville landings. Packed with previously unpublished photos, spectacular original illustrations, 3D recreations of specific missions, maps and explanatory diagrams, this study tells the previously untold but significant story of Japan's air war in the Solomons.

I Will Run Wild Thomas McKelvey Cleaver, 2020-09-17 This fascinating volume - now available in paperback offers a vivid narrative history of the early stages of the Pacific War, as US and Allied forces desperately tried to slow the Japanese onslaught that began with the sudden attack on Pearl Harbor in December 1941. In many popular histories of the Pacific War, the period from the Japanese attack at Pearl Harbor to the US victory at Midway is often passed over because it is seen as a period of darkness. Indeed, it is easy to see the period as one of unmitigated disaster for the Allies, with the fall of the Philippines, Malaya, Burma and the Dutch East Indies, and the wholesale retreat and humiliation at the hands of Japan throughout Southeast Asia. However, there are also stories of courage and determination in the face of overwhelming odds: the stand of the Marines at Wake Island; the fighting retreat in the Philippines that forced the Japanese to take 140 days to accomplish what they had expected would take 50; the fight against the odds at Singapore and over Java; the stirring tale of the American Volunteer Group in China; and the beginnings of resistance to

further Japanese expansion. In these events, there are many individual stories that have either not been told or not been told widely which are every bit as gripping as the stories associated with the turning tide after Midway. I Will Run Wild draws on extensive first-hand accounts and fascinating new analysis to tell the story of Americans, British, Dutch, Australians and New Zealanders taken by surprise from Pearl Harbor to Singapore that first Sunday of December 1941, who went on to fight with what they had at hand against a stronger and better-prepared foe, and in so doing built the basis for a reversal of fortune and an eventual victory.

Fighting Forces of World War II in the Air John C. Miles,2019-08 How did the forces that fought in the air affect the outcome of World War II? This book explores the units who battled it out to win supremacy in the skies during World War II, from the Luftwaffe and RAF, to the Japanese Kamikaze squadrons. Along the way, readers will discover the key battles, tactics, and weapons that helped propel the Allies to victory.

Yamato Daniel Knowles,2021-01-28 • Relive the dramatic final days of the world’s largest battleship as she embarked on her final and doomed kamikaze mission • Unveil the cloak of secrecy that surrounded Japan’s ultimate warships and what American intelligence knew and when • Beautifully illustrated with many rare and unpublished photographs • A must-have for military and historians, enthusiasts, modellers, gamers, and those interested in the complexities of naval warfare during the Second World War The Yamato and her sistership Musashi represented the ultimate development in the battleship during the Second World War and were the heaviest and most powerfully armed battleships ever constructed. Named after the Yamato Province, Yamato was designed to counter the numerically superior fleet of the US Navy. Built amongst a shroud of secrecy and deception – and commissioned shortly after the outbreak of the war in the Pacific – she was present at a number of engagements, including the Battle of Midway and the Battle of the Philippine Sea. Despite having been designed to engage and sink enemy surface vessels, the Yamato would only fire her unrivalled 18.1-inch guns at an enemy surface target on one occasion in October 1944 during the Battle of Leyte Gulf. In the final months of the war, as kamikaze aircraft targeted American landing fleets off Okinawa, the Yamato embarked on a one-way mission of ultimate sacrifice. In a last desperate roll of the dice in an attempt to wreak havoc on the landing forces around Okinawa, the last stepping stone prior to an invasion of the Japanese home islands, the Yamato finally succumbed to a mass aerial attack by carrier-based bombers and torpedo bombers. Despite being antiquated products of war from the moment of their construction, the Yamato and Musashi enjoy an iconic figure of Japanese might in mainstream consciousness such as films and anime.
