Camels For Kids Table of Contents Introduction What is a camel? What kinds of camels are there? Where do camels live? The history of camels and humans What are camelids? What do camels eat? Camelops Dromedary camel Bactrian camel Hybrid camels Conclusion Author Bio Publisher Introduction Camels have long been the cars of the desert. In areas with little water, and where technology such as cars either didn't exist or aren't accessible even today, the camel was the main means of moving people and things. Great caravans would go through deserts, relying heavily on camels to carry everything. For the longest time, camels have been associated even with the Magi, the three kings who are said to have visited Jesus as a baby. The camel is also in the charming tale by Rudyard Kipling, where the story of how the camel got its hump is playfully explained. Without camels, and their ability to survive in arid environments, many places would have been left without transportation (using things to move people and items). With their great hump or humps, and their tendency to spit, a camel probably strikes most people as a strange looking creature. But the camel is just one more example of an animal adapted to a less than easy environment.

**The Lost Camels Of Tartary** John Hare,2015-04-02 John Hare has made three expeditions to the Mongolian and Chinese Gobi deserts, the first in 1993 with Russian scientists and the second and third with Chinese scientists in 1995 and 1996. The book records the amazing adventures he has experienced on those expeditions and will record details of the 30-day walk on foot in the formidable Kum Tagh sand dunes in the spring of 1997. He is the first recorded foreigner to have crossed the

Gashun Gobi from north to south. The expeditions were primarily concerned with tracking down the mysterious wild Bactrian camel 'camelus bactrianus ferus' which lives in the heartland of the desert and is the ancestor of all domestic Bactrian stock. There are under a thousand left in the world and the wild Bactrian camel is more endangered than the giant Panda. This is John Hare's magnificent account of a formidable feat of modern exploration.
