**Economic Adjustment and Reform in Eastern Europe and the Soviet Union** Franklyn D. Holzman, 1988 Economic reform, structural adjustment, macroeconomic stabilization, and participation in the world economy are interconnected aspects of the same issue: the long-term economic viability of centrally planned economies in the rapidly changing economic environment of the modern world. Any economic strategy that focuses on only one or two of these aspects at the expense of the others is likely to fail; yet even strategies that build on all of these bases may well fail unless political leaders can muster exceptional skill, garner international support, and enjoy some good luck. The contributions to this volume reflect the recent research on this issue by various specialists on the economies of the Soviet Union and Eastern Europe. Each author emphasizes macroeconomic stabilization, structural adjustment, participation in the larger world economy, or economic reform.

*Innovations and Entrepreneurs in Socialist and Post-Socialist Societies* Jouko Nikula,Ivan Tchalakov,2014-09-18 This volume is composed of interviews with entrepreneurs from Bulgaria, Estonia, Macedonia, Latvia, Lithuania, and Russian Karelia, and reveals both unique patterns and striking similarities in entrepreneurial activities during the administrative economy of socialism and the period of post-socialism. The book challenges simultaneously the common way of conceptualizing entrepreneurship, the commonly held belief that there were no entrepreneurs under socialism, and the commonly held idea of post-socialism as an antidote to socialist order. The stories of start-up entrepreneurs of the post-socialist transition also challenge some of the key neo-liberal principles. The book is theoretically inspired by the recent studies of economic historians, critical reading of the classical ideas of Joseph Schumpeter on innovations in non-market economies, and the original model of the communist 'Sacred and Profane', developed by Markku Kivinen.
