Going Bananas in Space Cabbage Patch Young Storytellers,L. S. V. Baker,2015-07-13 *Going Bananas in Space* is the story of two intrepid Cabbage Patch Explorer Club members who successfully trade their phenomenal bananas for out-of-this-world brainberries, all while avoiding conflict with the aliens they encounter. The book includes fun facts about space travel, along with math and craft activities, following Baxter's Corner successful formula for combining a story with a variety of educational activities to create a rich, beyond the story book experience for readers. Authors of the story are 10 Louisville, Ky., youth ages 8 - 13, who collaborated on the project as part of a Young Storytellers Camp at the Cabbage Patch Settlement House. Baxter's Corner founders Mary Ellen Stottmann and Linda Villwock Baker led the camp and proposed developing the story into a published book, the first in a new series of books by Cabbage Patch campers. Proceeds from sales of the book will benefit youth services at Cabbage Patch Settlement House.

Banana Physics Adnan Contractor, 2019-02-22 In an attempt to make theoretical physics fun, Banana Physics explains eleven concepts in the context of quirky banana analogies. It introduces the curious (and resilient) reader to quantum mechanics, the Standard Model of Particle Physics, general relativity, loop quantum gravity, and other ideas using monkeys, banana trees, monkey-banana-baseball, bananas shot out of banana launchers, and banana smoothie spills. Intended for high school or middle school readers interested in scientific discoveries and history, Banana Physics could illuminate principles and hypotheses to budding scientists, writers, engineers, or anyone interested in interpreting science through a different lens. This resolute, accessible framework assumes no prior knowledge of physics; instead it provides a humorous, playful perspective on sophisticated concepts that may delight a broader audience. By reading Banana Physics, you'll learn: Behavioral observations of light and explanations that have been written to account for these observations. How experiments of quantum mechanics have been explained in the context of probability. The central contributions of Albert Einstein and how they conflict(ed) with preexisting ideas of space and time held since Newton's time. The role of particle physics and electromagnetism in Einstein's research. Critical clashes between ideas of modern physics
