Sinister Barrier Eric Frank Russell,2024-02-08 Charles Fort said, “I think we’re property.” And that is the plot of ‘Sinister Barrier.’ We are cattle, a source of psychic energy for beings that exist as pure energy. They feed off of our emotions and our strongest emotions are lust, hate, and fear. And so they manipulate us to display our strongest emotions for their psychic vampirism. Ghastly crimes are the everyday meal for these beings; wars are banquets for their delectations. One scientist discovers these invisible beings of energy and is able to warn others before he dies. And then, many die. One dogged investigator is pursued cross-country and back as he puts together a meeting of minds to free humanity from these invisible tyrants. Sinister Barrier was published in 1939 in the initial issue of Unknown. It was the cover story.

Breaking the Fear Barrier Tom Rieger,2011-08-23 A company’s worst enemy is not always the competition. Sometimes it’s the fear that lives within its own walls. The greatest threat to an organization’s success is not always the competition. Often, it is what a company does to itself. Because of fear, companies become plagued with barriers and bureaucracy that limit success, crush employees, and infuse frustration and a sense of futility across the enterprise. It starts with a narrowing of focus, which leads to the first level of bureaucracy: parochialism. Parochialism exists when managers and

departments begin to view the world through the filter of their own little silo and build walls made of rules and policies to protect their turf. As businesses grow and become more complex, the second level of bureaucracy is reached: territorialism. While parochialism is about protecting a department from outsiders, territorialism is about controlling those inside the silo. The third and final level of bureaucracy is empire building, which is a response to perceived threats to a department's ability to be self-sufficient. These barriers cost organizations a fortune in inefficiency, turnover, waste, and demoralization. Tearing down these barriers is difficult, but it can be done. Parochialism can be eliminated by resetting rules and policies and refocusing on the ultimate mission of the organization. Territorialism can be eliminated by creating true empowerment, along with appropriate levels of accountability. Empire building can be addressed through shared goals and a set of guiding principles that help act as a referee in decision making. But that's not enough. Managers must also create a culture of courage to enable employees to take advantage of these new freedoms and accountabilities. Courage killers must be rooted out and dealt with swiftly and strongly. Finally, leaders must refocus on mission success rather than just checking off their part of the process, manage reference points, and engage employees. By doing all these things, an organization can become fearless and unstoppable.

No Barrier Can Contain It Ariel Mae Lambe, 2019-10-10 Vividly recasting Cuba's politics in the 1930s as transnational, Ariel Mae Lambe has produced an unprecedented reimagining of Cuban activism during an era previously regarded as a lengthy, defeated lull. In this period, many Cuban activists began to look at their fight against strongman rule and neocolonial control at home as part of the international antifascism movement that exploded with the Spanish Civil War. Frustrated by multiple domestic setbacks, including Colonel Fulgencio Batista's violent crushing of a massive general strike, activists found strength in the face of repression by refusing to view their political goals as confined to the island. As individuals and in groups, Cubans from diverse backgrounds and political stances self-identified as antifascists and moved, both physically and symbolically, across

borders and oceans, cultivating networks and building solidarity for a New Spain and a New Cuba. They believed that it was through these ostensibly foreign fights that they would achieve economic and social progress for their nation. Indeed, Cuban antifascism was such a strong movement, Lambe argues, that it helps to explain the surprisingly progressive turn that Batista and the Cuban government took at the end of the decade, including the establishment of a new constitution and presidential elections.

Skin Barrier Function T. Agner,2016-02-04 Although a very fragile structure, the skin barrier is probably one of the most important organs of the body. Inward/out it is responsible for body integrity and outward/in for keeping microbes, chemicals, and allergens from penetrating the skin. Since the role of barrier integrity in atopic dermatitis and the relationship to filaggrin mutations was discovered a decade ago, research focus has been on the skin barrier, and numerous new publications have become available. This book is an interdisciplinary update offering a wide range of information on the subject. It covers new basic research on skin markers, including results on filaggrin and on methods for the assessment of the barrier function. Biological variation and aspects of skin barrier function restoration are discussed as well. Further sections are dedicated to clinical implications of skin barrier integrity, factors influencing the penetration of the skin, influence of wet work, and guidance for prevention and saving the barrier. Distinguished researchers have contributed to this book, providing a comprehensive and thorough overview of the skin barrier function. Researchers in the field, dermatologists, occupational physicians, and related industry will find this publication an essential source of information.

The Tight Junction and Its Proteins: More Than Just a Barrier Michael Fromm,Susanne M. Krug,2020-11-20 For a long time, the tight junction (TJ) was known to form and regulate the paracellular barrier between epithelia and endothelial cell sheets. Starting shortly after the discovery of the proteins forming the TJ—mainly the two families of claudins and TAMPs—several other functions have been discovered, a striking one being the surprising finding that some claudins form paracellular channels for small ions and/or water. This Special Issue includes 43 articles covering numerous dedicated topics including pathogens affecting the TJ barrier, TJ regulation via immune cells, the TJ as a therapeutic target, TJ and cell polarity, function and regulation by proteins of the tricellular TJ, TJ as a regulator of cellular processes, organ- and tissue-specific functions, TJ as sensors and reacting to environmental conditions, and last but not least, TJ proteins and cancer.
