**Cruisers and Battle Cruisers** Eric W. Osborne,2004-11-23 Fast cruisers, the eyes of the fleet, were the standard-bearers of empire, the ultimate warships of gunboat diplomacy—no other vessel class was so well equipped to serve as both a working war machine and a projection of national might. Cruisers and Battle Cruisers explores the pivotal importance of cruiser-class ships to naval warfare and, in a wider scope, world politics. In vivid but accessible detail, it describes the milestones of cruiser design and deployment from mid-19th century development of steam-propelled, ironclads to the World War I introduction of battle cruisers; from the decisive naval engagements of World War II and the addition of missiles and computerized systems to the most recent developments. Readers will see how specific technological changes progressively increased the destructive power of cruisers and altered their combat roles, how design innovations altered the quality of life aboard ship, and how cruisers came to be called upon to serve a variety of noncombat roles in war and peace.

*Battlecruiser* Douglas Reeman,2003-09-01 It's 1943, and the seas are haunted by Hitler's deadly U-boats and cruisers. After the mysterious death of the Reliant's last captain, Guy Sherbrooke is given command of the legendary battlecruiser. A symbol of everything the Royal Navy stands for, the battlecruiser boasts the speed of a destroyer and the firepower of a battleship.

The Battle Cruiser Hindenburg Michael Kirk,2021-11-16 It's 1918. The outcome of the First World War is still in the balance. Germany's submarines have failed to force Britain to the negotiation table. Something else must be tried. The 27,000 ton battle cruiser Hindenburg, Germany's latest and most powerful, is dispatched to attack the Allied convoys. Her Prussian captain, Rupprecht Körner, faces a daunting task. His lone ship must break out into the Atlantic, avoiding contact with the massive British fleet, and journey even as far as America to find her prey. As well as coping with the North Atlantic weather and enemy warships, Körner must keep his ship's coal bunkers replenished. Even if he is able to find targets for his big guns - no simple task in the vast ocean - he still has to get his ship and crew safely back to Germany. The odds seem stacked against him. He needs to succeed; Germany needs him to succeed.

**The Battle-Cruiser HMS Renown, 1916–48** Peter C. Smith,2008-10-30 “A successful book, giving a picture of life on a major warship, as well as a different view of some of the main naval actions of the Second World War.” —HistoryOfWar.org This is the story of the Royal Navy battle-cruiser HMS Renown, a famous ship with a long and distinguished operational career. Originally built for the First World War she subsequently served in the post-war fleet and took royalty around the world. Modernized just in time for World War Two, she re-joined the fleet in September, 1939 and for the first two years of the war her speed and heavy gun armament made her one of the most important ships of the fleet. She escorted the famous carrier Ark Royal for most of her illustrious career as flagship of Force “H” in the Mediterranean and took part in many stirring battles and convoy actions. Later she covered Russian convoys in the Arctic before going out to the Indian Ocean where she took part in attacks on Japanese targets in the Indian Ocean. Her final duties included the meeting of King George VI and President Truman in 1945. A host of fresh detail coupled with eyewitness memoirs from former crew members make this an outstanding warship biography. “If you like a thorough, detailed history of a famous, long lived fighting ship, this volume will give you just what you're looking for. It also provides an insightful look at some of the Royal Navy's more interesting naval leaders, including Admirals Cunningham and Somerville.” —IPMS/USA

Battleships and Battle-cruisers, 1884-1984 Myron J. Smith,1985

German Battlecruisers of World War One Gary Staff,2014-11-29 The most comprehensive English-language study of the German Imperial Navy's WWI battlecruisers, fully illustrated with drawings, diagrams and photographs. In this in-depth study, naval historian and author of Battle on the Seven Seas Gary Staff presents a full analysis of Imperial Germany's battlecruisers. Known as Panzerkreuzer, the eight ships of this class were involved in several early North Sea skirmishes before their historic victory against the Royal Navy in the Battle of Jutland. Staff details the design and construction of these ships, and traces the full-service history of each one, recounting their actions, largely from first-hand German sources and official documents. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as well as in dock, where many aspects of their design—as well as damage sustained in action—can be viewed in close up. A superb series of full-color computer graphics show full length profiles and top-down views of each ship in precise and clear detail. German Battle Cruisers of World War One presents a major contribution to German naval history in the English language. It is a must-have volume for Great War historians and enthusiasts, as well as battlecruiser modelers.

With the Battle Cruisers Filson Young,1921

Attila and the Battle Cruiser Peter Chestnut,2011-07-07 A high-tension sea chase set in early 1941 that pits the warships of the British against the German battle cruisers Scharnhorst and Gneisenau which have been able to escape trap after trap. What makes the British most frustrated is the fact that their enemy has on board a large Siamese cat named Attila, who provides his shipmates with extraordinary accomplishments that has enabled the Germans to escape time and time again. The Germans are wrecking havoc on British shipping and Winston Churchill has demanded that they be sunk before their toll on merchant shipping brings England to the brink of disaster.

**The Battlecruiser HMS Hood** Bruce Taylor,2008-04-30 “A wonderfully illustrated biography” of one of history's greatest warships whose sinking “signaled the end of the surety that Britannia ruled the waves” (War History Online). Unmatched for beauty, unequalled for size, for twenty years the HMS Hood was the glory ship of the Royal Navy, flying the flag across the world in the twilight years of the British Empire. Here, in words, photos and color illustrations, is the story of her life, her work and her people from keel-laying on the Clyde in 1916 to destruction at the hands of the Bismarck in 1941. Among the eye-catching strengths of the book is a unique gallery of photos, including stills from a recently discovered piece of color footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art—a man who worked with the film director James Cameron (of Titanic fame). A wealth of new information on Hood's structure and operation make it essential reading for the enthusiast, modeler and historian alike. Hugely successful from its first publication, this is the third printing of the ultimate book on the ultimate ship of the pre-war era. “The most comprehensive study of a modern warship ever undertaken.”—Warship World

**British Battlecruiser vs German Battlecruiser** Mark Stille,2013-11-20 The rival battlecruisers first clashed in January 1915 at Dogger Bank in the North Sea and although the battle was a British tactical victory with neither side losing any of its battlecruisers, the differences in the designs of the British and German ships were already apparent. The two sides responded very differently to this first clash; while the Germans improved their ammunition-handling procedures to lessen the risk of disabling explosions, the British drew the opposite lesson and stockpiled ammunition in an effort to improve their rate of fire, rendering their battlecruisers more vulnerable. These differences were highlighted more starkly during the battle of Jutland in May 1916. Of the nine British battlecruisers committed, three were destroyed, all by their German counterparts. Five German battlecruisers were present, and of these, only one was sunk and the remainder damaged. Fully illustrated with specially commissioned artwork, this is the gripping story of the clash between the rival battlecruisers of the Royal Navy and the Kaiserliche Marine at the height of World War I.

**Battle-cruisers** Ronald Bassett,1981

**British Battlecruisers, 1905–1920** John Roberts,2016-10-30 “A valuable stand-alone text . . . Contains large amounts of data on all of the vessels officially classified as battlecruisers in the Royal Navy.” —International Journal of Maritime History The brainchild of Admiral Sir John Fisher, battlecruisers combined heavy guns and high speed in the largest hulls of their era. Conceived as super-cruisers to hunt down and destroy commerce raiders, their size and gun-power led to their inclusion in the battlefleet as a fast squadron of capital ships. This book traces in detail the development of Fisher’s original idea into first battlecruiser Invincible of 1908, through to the Splendid Cats of the Lion class, and culminating in HMS Hood in 1920, the largest warship in the world for the next twenty years. The origins of the unusual light battlecruisers of the Courageous type are also covered. “The author is still the foremost authority on battleships from Dreadnought and, although now retired, he continues to research the subject. This new edition of the definitive book on battlecruisers has been updated with the latest findings from his research. An outstanding review of the subject.” —Firetrench “It is good to see this book back in print with this improved edition.” —Warship, “Naval Books of the Year”

**Battlecruisers** John Roberts,1997 This second volume in the ShipShape series covers the development of one of the largest, fastest and most charismatic warship types. Combining the armament of a battleship with the speed of a cruiser in some of the largest hulls then built, these ships were the cutting edge of early 20th-century naval technology. The brainchild of Admiral Fisher, the concept of this class began as large, fast armoured cruisers for trade protection, but the last-minute decision to equip them with 12-inch guns led them to be seen as a high-speed element of the battle fleet. The British battlecruisers fought in numerous battles in World War I, such as the battles of the Falklands, Heligoland Bight and Dogger Bank. But it is for the battle of Jutland in 1916, when three battlecruisers exploded and sank in one day, that these ships are best remembered.

*The Battlecruiser* Haley Marchal,2021-04-16 The battlecruiser was a type of capital ship of the first half of the 20th century. They were similar in displacement, armament and cost to battleships, but differed slightly in form and balance of attributes. Combining meticulous research with a novelist's flair for storytelling, this book vividly describes the life and times of the sixteen battle-cruisers built for the Royal Navy and Royal Australian Navy.

Battlecruiser Invincible V. E. Tarrant,1986

*U.S. Cruisers* Norman Friedman,1984 This fully illustrated series offers detailed descriptions of the evolution of all classes of the principle U.S. combatant types, as well as plans, profiles, and numerous detailed photographs.

**The Battle-Cruiser HMS Renown 1916-1948** Peter Charles Smith,2008 This is the story of the Royal Navy battle-cruiser H.M.S. Renown, a famous ship with a long and distinguished operational career. Originally built for the First World War she subsequently served in the post-war fleet and took royalty around the world. Modernized just in time for World War Two, she re-joined the fleet in September, 1939 and for the first two years of the war her speed and heavy gun armament made her one of the most important ships of the fleet. She escorted the famous carrier Ark Royal for most of her illustrious career as flagship of Force 'H' in the Mediterranean and took part in many stirring battles and convoy actions. Later she covered Russian convoys in the Arctic before going out to the Indian Ocean where she took part in attacks on Japanese targets in the Indian Ocean. Her final duties included the meeting of King George VI and President Truman in 1945. A host of fresh detail coupled with eyewitness memoirs from former crew members make this an outstanding warship biography.

**Before the Battlecruiser** Aidan Dobson,2018 The battlecruiser is perceived by many as the most glamorous of warships, remembered for its triumphs and tragedies in both world wars. Often forgotten are its lineal ancestors, the big cruisers that were constructed as capital ships for distant waters, as commerce raiders, and as fast scouts for the battle fleet during the last decades of the nineteenth century and the first years of the twentieth. In this new book by bestselling author Aidan Dobson, the 200 or so big cruisers that were built for the world's navies from 1865 are described and analyzed in detail.

**Battleships and Battlecruisers** Richard Humble,1983 Traces the history of the battleship from the nineteenth century to the 1980s and examines the modern uses of battleships and cruisers

With the Battle Cruisers Filson Young,2011-05 The single best work of reportage about the battlecruiser, ever, by a war correspondent who was with Beatty's Battlecruiser Squadron at Jutland. Filson Young: the Bob Woodward of battlecruisers. An excerpt: Here, then, was the ideal type for which Lord Fisher in our conversations had so often sighed; and I was secretly disappointed when, on my mentioning Fisher's name, Beatty merely smiled. And I was still more crestfallen when, a few days later, I spoke of Beatty enthusiastically to Lord Fisher, he gave me a blank, sour look and said: Really? Never met him. I did not know the Navy as well in those days as I know it now, or I would have been less surprised than I was that the obviously ablest men in control of naval affairs were far from seeing eye to eye with one another, and even (what was more remarkable) neglected to make any real study of one another's aims and potentialities. Naval thought, where it existed, was divided into camps, each one regarding victory over the others as essential to victory over the Germans. Thus Lord Charles Beresford, whose best work in his retirement was his untiring public advocacy of naval efficiency, gave one in private a most alarming impression that the Navy was already practically in German control; and one of his mildest views of Lord Fisher was that he was a madman who, on the eve of war, had deliberately scrapped the majority of our cruisers. Winston Churchill was at one time probably one of the men most disliked by the Navy at large; but when one tried to discuss his administration seriously, one was told stories of his bad manners: as, for example, of his going on board a ship, entering the wardroom, ringing the bell and sending for the Commander - a solecism the gravity of which one must have lived in a wardroom to appreciate. And yet, one felt, it was not quite an argument against his efficiency as an administrator. But all the naval officer saw was a man to whose power our sacred naval traditions were committed, and who apparently knew or cared so little for the smallest of them that the greatest might well be in peril at his hands. The anti-Churchill camp was a very strong one. He, on the other hand, seemed to regard Lord Fisher as a dangerous genius to be caught, chained, tamed, and made careful use of; Lord Fisher regarded him (I am speaking of the two years before the war) as a politician to be fought or flattered, made or destroyed, according to his degree of adaptability to the great purpose.
