

Battlecruiser

Robert Brown, Steve Backer

Battlecruiser Douglas Reeman,2003-09-01 It's 1943, and the seas are haunted by Hitler's deadly U-boats and cruisers. After the mysterious death of the Reliant's last captain, Guy Sherbrooke is given command of the legendary battlecruiser. A symbol of everything the Royal Navy stands for, the battlecruiser boasts the speed of a destroyer and the firepower of a battleship.

British Battlecruiser vs German Battlecruiser Mark Stille,2013-11-20 The rival battlecruisers first clashed in January 1915 at Dogger Bank in the North Sea and although the battle was a British tactical victory with neither side losing any of its battlecruisers, the differences in the designs of the British and German ships were already apparent. The two sides responded very differently to this first clash; while the Germans improved their ammunition-handling procedures to lessen the risk of disabling explosions, the British drew the opposite lesson and stockpiled ammunition in an effort to improve their rate of fire, rendering their battlecruisers more vulnerable. These differences were highlighted more starkly during the battle of Jutland in May 1916. Of the nine British battlecruisers committed, three were destroyed, all by their German counterparts. Five German battlecruisers were present, and of these, only one was sunk and the remainder damaged. Fully illustrated with specially commissioned artwork, this is the gripping story of the clash between the rival battlecruisers of the Royal Navy and the Kaiserliche Marine at the height of World War I.

German Battlecruisers of World War One Gary Staff,2014-11-29 The most comprehensive English-language study of the German Imperial Navy's WWI battlecruisers, fully illustrated with drawings, diagrams and photographs. In this in-depth study, naval historian and author of *Battle on the Seven Seas* Gary Staff presents a full analysis of Imperial Germany's battlecruisers. Known as Panzerkreuzer, the eight ships of this class were involved in several early North Sea skirmishes before their historic victory against the Royal Navy in the Battle of Jutland. Staff details the design and construction of these ships, and traces the full-service history of each one, recounting their actions, largely from first-hand German sources and official documents. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as well as in dock, where many aspects of their design—as well as damage sustained in action—can be viewed in close up. A superb series of full-color computer graphics show full length profiles and top-down views of each ship in precise and clear detail. *German Battle Cruisers of World War One* presents a major contribution to German naval history in the English language. It is a must-have volume for Great War historians and enthusiasts, as well as battlecruiser modelers.

British Battlecruisers, 1905-1920 John Roberts,2016-10-30 “A valuable stand-alone text . . . Contains large amounts of data on all of the vessels officially classified as battlecruisers in the Royal Navy.” —International Journal of Maritime History The brainchild of Admiral Sir John Fisher, battlecruisers combined heavy guns and high speed in the largest hulls of their era. Conceived as super-cruisers to hunt down and destroy commerce raiders, their size and gun-power led to their inclusion in the battlefleet as a fast squadron of capital ships. This book traces in detail the development of Fisher's original idea into first battlecruiser *Invincible* of 1908, through to the *Splendid* Cats of the *Lion* class, and culminating in *HMS Hood* in 1920, the largest warship in the world for the next twenty years. The origins of the unusual light battlecruisers of the *Courageous* type are also covered. “The author is still the foremost authority on battleships from *Dreadnought* and, although now retired, he continues to research the subject. This new edition of the definitive book on battlecruisers has been updated with the latest findings from his research. An outstanding review of the subject.” —Firetrench “It is good to see this book back in print with this improved edition.” —Warship, “Naval Books of the Year”

Battlecruisers John Roberts,1997 This second volume in the ShipShape series covers the development of one of the largest, fastest and most charismatic warship types. Combining the armament of a battleship with the speed of a cruiser in some of the largest hulls then built, these ships were the cutting edge of early 20th-century naval technology. The brainchild of Admiral Fisher, the concept of this class began as large, fast armoured cruisers for trade protection, but the last-minute decision to equip them with 12-inch guns led them to be seen as a high-speed element of the battle fleet. The British battlecruisers fought in numerous battles in World War I, such as the battles of the Falklands, Heligoland Bight and Dogger Bank. But it is for the battle of Jutland in 1916, when three battlecruisers exploded and sank in one day, that these ships are best remembered.

The Battlecruiser HMS Hood Bruce Taylor,2008-04-30 “A wonderfully illustrated biography” of one of history's greatest warships whose sinking “signaled the end of the surety that Britannia ruled the waves” (War History Online). Unmatched for beauty, unequalled for size, for twenty years the *HMS Hood* was the glory ship of the Royal Navy, flying the flag across the world in the twilight years of the British Empire. Here, in words, photos and color illustrations, is the story of her life, her work and her people from keel-laying on the Clyde in 1916 to destruction at the hands of the *Bismarck* in 1941. Among the eye-catching strengths of the book is a unique gallery of photos, including stills from a recently discovered piece of color footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art—a man who worked with the film director James Cameron (of *Titanic* fame). A wealth of new information on *Hood*'s structure and operation make it essential reading for the enthusiast, modeler and historian alike. Hugely successful from its first publication, this is the third printing of the ultimate book on the ultimate ship of the pre-war era. “The most comprehensive study of a modern warship ever undertaken.” —Warship World

Before the Battlecruiser Aidan Dobson,2018 The battlecruiser is perceived by many as the most glamorous of warships, remembered for its triumphs and tragedies in both world wars. Often forgotten are its lineal ancestors, the big cruisers that were constructed as capital ships for distant waters, as commerce raiders, and as fast scouts for the battle fleet during the last decades of the nineteenth century and the first years of the twentieth. In this new book by bestselling author Aidan Dobson, the 200 or so big cruisers that were built for the world's navies from 1865 are described and analyzed in detail.

Battlecruiser Repulse John Roberts,2019-06-30 An outstanding illustrated reference revealing the painstaking work of draftsmen in recording every detail of the famed British warship. The technical details of British warships were recorded in a set of plans produced by the builders on completion of every ship. Known as the “as fitted” general arrangements, these drawings represented the exact appearance and fitting of the ship as it entered service. Intended to provide a permanent reference for the Admiralty and the dockyards, these highly detailed plans were drawn with exquisite skill in multi-colored inks and washes that represent the acme of the draftsman's art. Today they form part of the incomparable collection of the National Maritime Museum at Greenwich, which is using the latest scanning technology to make digital copies of the highest quality. This book is one of a series based entirely on these drafts which depict famous warships in an unprecedented degree of detail—complete sets in full color, with many close-ups and enlargements that make every aspect clear and comprehensible. Extensive captions point the reader to important features to be found in the plans, and an introduction covers the background to the design. The subject of this volume was one of the last battlecruisers, elegant ships that combined a powerful armament with high speed, but were much criticized for their light protection. Throughout their existence, they were controversial—three were sunk at Jutland—and *Repulse* herself was famously lost to Japanese air attack at the outset of the Pacific War. Nevertheless, the type was highly prized: *Repulse* and her sister *Renown* were the only capital ships given sufficient priority to be designed, built, and completed during the course of the First World War, and substantial sums were spent on large-scale reconstruction during the 1930s. Both of these phases of the ship's life are fully documented in two separate sets of plans, which allow this novel form of anatomy to cover the whole life of the ship.

Battlecruiser Repulse John Roberts,2019-06 The subject of this volume was one of the last battlecruisers, elegant ships that combined a powerful armament with high speed but much criticized for their light protection.

Battlecruiser Invincible V. E. Tarrant,1986

German Battlecruisers 1914-18 Gary Staff,2012-01-20 The task of Germany's new Große Kreuzer at the beginning of the 20th century was to form an independent reconnaissance division that was able to perform special tasks. With a speed superiority of at least 3 knots, they should also be capable of fighting in the line, and would thus require heavy armour and good defensive qualities. The battlecruisers that were built did indeed have a remarkable ability to withstand battle damage, as demonstrated by the Goeben, which suffered five mine hits on one occasion. This title details all the classes of German battlecruiser, with particular emphasis on each individual ship's battle experience and deployment in conflict.

The Battlecruiser New Zealand Matthew Wright,2021-08-31 This book tells the story of HMS New Zealand, a battlecruiser paid for by the government of New Zealand at the height of its pro-Imperial 'jingo' era in 1909, when Britain's ally Japan was perceived as a threat in Australasia and the Pacific. Born of the collision between New Zealand's patriotic dreams and European politics, the tale of HMS New Zealand is further wrapped in the turbulent power-plays at the Admiralty in the years leading up to the First World War. The ship went on to have a distinguished First World War career, when she was present in all three major naval battles - Heligoland, Dogger Bank and Jutland - in the North Sea. The book 'busts' many of the myths associated with the ship and her construction, including the intent of the gift, New Zealand's ability to pay, deployment, and the story behind the piupiu (skirt) and tiki (pendant) that, the crew believed, bestowed special protection upon the vessel. All is inter-woven with the human and social context to create a 'biography' of the ship as an expression of human endeavour, in significantly more detail than any of the summaries available in prior accounts. Extensively illustrated, this is a book with appeal to a wide audience, from naval enthusiasts and historians to the general reader with a wider interest in the story of Empire. The use of archival material available only in New Zealand, including the Ship's Book, adds a dimension and novelty not previously included in histories of this great battlecruiser.

British Battlecruiser vs German Battlecruiser Mark Stille,2013-11-19 Battles at Dogger Bank and Jutland revealed critical firepower, armor, and speed differences in Royal Navy and Kaiserliche Marine (Imperial German Navy) Battlecruiser designs. Fast-moving and formidably armed, the battlecruisers of the British and German navies first encountered one another in 1915 at Dogger Bank and in the following year clashed near Jutland in the biggest battleship action of all time. In the decade before World War I Britain and Germany were locked in a naval arms race that saw the advent of first the revolutionary dreadnought, the powerful, fast-moving battleship that rendered earlier designs obsolete, and then an entirely new kind of vessel - the battlecruiser. The brainchild of the visionary British admiral John 'Jacky' Fisher, the battlecruiser was designed to operate at long range in 'flying squadrons', using its superior speed and powerful armament to hunt, outmanoeuvre and destroy any opponent. The penalty paid to reach higher speeds was a relative lack of armour, but Fisher believed that 'speed equals protection'. By 1914 the British had ten battlecruisers in service and they proved their worth when two battlecruisers, Invincible and Inflexible, sank the German armoured cruisers Scharnhorst and Gneisenau off the Falklands in December 1914. Based on a divergent design philosophy that emphasised protection over firepower, the Germans' battlecruisers numbered six by January 1915, when the rival battlecruisers first clashed at Dogger Bank in the North Sea. By this time the British battlecruisers had been given a new role - to locate the enemy fleet. Five British battlecruisers accompanied by other vessels intercepted and pursued a German force including three battlecruisers; although the battle was a British tactical victory with neither side losing any of its battlecruisers, the differences in the designs of the British and German ships were already apparent. The two sides responded very differently to this first clash; while the Germans improved their ammunition-handling procedures to lessen the risk of disabling explosions, the British drew the opposite lesson and stockpiled ammunition in an effort to improve their rate of fire, rendering their battlecruisers more vulnerable. The British also failed to improve the quality of their ammunition, which had often failed to penetrate the German ships' armour. These differences were highlighted more starkly during the battle of Jutland in May 1916. Of the nine British battlecruisers committed, three were destroyed, all by their German counterparts. Five German battlecruisers were present, and of these, only one was sunk and the remainder damaged. The limitations of some of the British battlecruisers' fire-control systems, range-finders and ammunition quality were made clear; the Germans not only found the range more quickly, but spread their fire more effectively, and the German battlecruisers' superior protection meant that despite being severely mauled, all but one were able to evade the British fleet at the close of the battle. British communication was poor, with British crews relying on ship-to-ship flag and lamp signals even though wireless communication was available. Even so, both sides claimed victory and the controversy continues to this day.

Grand Fleet Battlecruisers Steve Backer,2011-04-30 The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant websites.rnrnThis volume follows the format of the highly successful Flower Class where the extent has been doubled to include far more illustrations of the many different designs, from the Invincible of 1906 to the Renowns of 1915, and including the hybrid 'large light cruisers' Courageous, Glorious and Furious.

Battlecruiser David Hitchcock,2017-08-06 The battlecruiser concept involves putting the large guns of a battleship on a vessel the size and speed of a cruiser. The idea was that a battlecruiser could outgun any other ship its size and outrun the more heavily armored battleships. This concept was put to a dramatic test during World War I in what would become known as the battle of Jutland. The ensuing conflict was the largest surface naval battle ever fought between battleships and battlecruisers and yet, a movie has not been made about this cataclysmic event that cost the lives of thousands and shaped the course of the First World War. Now that movie exists in illustrated screenplay format. Battlecruiser is the story of an extraordinary historical event that deserves its place in film history. Perhaps, you can help make that happen? Spread the word...

The Battlecruiser Hood John Roberts,2001 The year 2001 witnesses the sixtieth anniversary of one of the most shocking and tragic episodes in the history of the Royal Navy; the loss of HMS Hood. Built during the First World War, the Hood was the largest, fastest and one of the most handsome capital ships in the world. This revised edition features a full and detailed description of every aspect of HMS Hood, analysing the genesis of the design and its contemporary significance

British Battlecruisers 1905-1920 John Roberts,2016-12-15 The brainchild of Admiral Sir John Fisher, battlecruisers combined heavy guns and high speed in the largest hulls of their era. Conceived as super-cruisers whose job it was to hunt down and destroy commerce raiders, their size and gun-power led to their inclusion in the battlefleet as a fast squadron of capital ships. This book traces in detail the development of Fisher's original idea into the first battlecruiser Invincible of 1908, through to the Splendid Cats of the Lion class, and culminating in HMS Hood in 1920, the largest warship in the world for the next twenty years. The origins of the unusual light battlecruisers of the Courageous type are also covered. The well-publicized problems of British battlecruisers are examined, including the latest research throwing light on the catastrophic loss of three of the ships at the Battle of Jutland. The developmental history is backed by chapters covering machinery, armament, and armor, with a full listing of important technical data. The comprehensive collection of illustrations includes the author's superb drawings and original Admiralty plans reproduced in full color. This revised and updated edition of the classic work first published in 1997 will be welcomed by anyone with

an interest in the most charismatic and controversial warships of the dreadnought era.

This is followed by an extensive photographic survey of selected high-quality models in a variety of scales, and the book concludes with a section on research references—books, monographs, large-scale plans and relevant websites.This volume is devoted to the famous ships of Admiral Hipper's First Scouting Group. Slower but more robust than their British equivalents, German battlecruisers enjoyed a reputation for absorbing punishment, and although Lutzow was sunk at Jutland, Seydlitz and the rest of the Scouting Group survived heavy damage. This book concentrates on the seven completed ships but coverage extends to the 'proto-battlecruiser' Blucher and the ships building or designed by the end of the war.

Years of Endurance John Muir,2021-09-30 This memoir is perhaps one of the most immediate and vivid recollections of life in a Royal Navy battlecruiser to come out of the First World War. John Muir, a surgeon, was the senior medical officer aboard HMS Tiger from her commissioning in October 1914 until his departure in the autumn of 1916 when she was then undergoing repairs at Rosyth to the damage incurred at the battle of Jutland in June that year. Vivid, authoritative, empathetic and beautifully written, this memoir takes the reader right to the center of the action in the first years of the War. The book begins with a stirring account of a night in the wild North Sea with Tiger, head to wind in a gale, steaming at a reduced speed of 10 knots, her purpose to intimidate the German fleet ‘by the mere terror of our presence’. The scene set, Muir’s narrative then describes his experiences from the early days of mobilization, when he was the Senior Medical Officer of the barracks at Chatham, to his arrival aboard Tiger on the Clyde, her commissioning and the drilling of fifteen hundred officers and ratings as she put out to sea for the first time. In the first months of her career she was involved in intercepting the German raid on Scarborough before fighting the battlecruisers Derfflinger, Moltke, and Seydlitz at Dogger Bank. In May 1916 she found herself in line just astern of the doomed Queen Mary at Jutland. Muir had a ringside seat at these critical and decisive clashes and brings remarkable perception and clarity in the telling of his experiences. But more than a narrative of events, his story is also one about the officers and men who were his comrades in those years; about their qualities, their anxieties and the emotional dimension of their experiences. His insights are those of a man trained to understand the human heart, and they bring vividly to life a generation of men who fought at sea more than one hundred years ago. This is a spellbinding and gripping memoir, brought to a new audience in a handsome collectors’ edition for the first time since its publication in 1936.
