Proceedings of the International Symposium Southeast Asia Vegetable 2021 (SEAVEG 2021) Irham Irham,Muhammad Firdaus,Stefaan De Neve,2023-02-10 This is an open access book. International Symposium – SEAVEG 2021 as a medium for educators, researchers, practitioners and students to convey the results of research, insights, knowledge, and innovations that have been carried out and compile them into a concrete, implementable formula. SEAVEG 2021 could be a discussion forum that encourages and accelerates agricultural development in Indonesia, especially horticultural commodities. The symposium welcomes papers that explore but not limited to the topic of Vegetables for Resilience and Healthy Diets. The range of the topics covered by SEAVEG 2021 includes: Hunger and MalnutritionStarvation occurs when a person does not get enough food, and in the long run, it can lead to malnutrition. Malnutrition can also occur when a person lacks essential nutrients as a result of not eating sufficiently.The horticultural sub-sector, especially vegetables, is a rich source of nutrients. As a food ingredient that contains many nutrients including vitamins and minerals, proper consumption of vegetables is important. It includes breeding, seed quality, production, and related aspects. Food and Nutrition Security Food as basic human need plays a significant role to create a good life. The availability of safe and nutritious food must be fulfilled. Food deficiency can create instability. >In order to achieve food stability, each country has different concepts and methods depending on their respective conditions, such as economic, geographic, technological, regional dan socio-cultural conditions. It includes breeding, seed quality, production, and related aspects. Food Supply Chain and Agribusiness In developing countries, the food supply chain has not been efficient because of the many actors involved. The supply chain describes the process of food, in this case from horticulture commodities, from production, processing, distribution, consumption, and disposal. Each step of the supply chain requires human resources that will reduce the farmer's margin. The length of the supply chain also affects people's purchasing power. Food Supply Chain is one of the many aspects from agribusiness system. To make an environmental that is leaning towards farmer's prosperity, we need to make an agribusiness system that is efficient. Digital marketing system, such as marketplace, can shorten the supply chain and support better agribusiness system. Young Agripreneur in Horticulture Currently, young people around the world are not much interested in the agricultural sector. Agriculture, especially horticulture sub-sector, is very prospective to increase income and economic value. Farming vegetable commodity from upstream to downstream is very challenging for the millennial generation to develop. The demand in the horticultural sector, especially vegetable products, is increasing during the covid-19 pandemic. It is a business opportunity in itself, especially for young agricultural entrepreneurs. Millennial characteristics, adaptive to technology, full of innovation, make young agricultural entrepreneurs have the potential to increase the income and develop their business in horticultural commodities. Covid-19: Issues and Challenges in Vegetables for Resilience during PandemicThe Covid-19 pandemic is a momentum for the revival of the horticultural sub-sector. A balanced nutritional intake, especially vegetables, is highly recommended. People are increasingly aware that vegetables accompanied by a proper and healthy diet are beneficial for increasing body immunity. People are also encouraged to practice a healthier lifestyle to maintain endurance. Therefore, they will get infected by the disease. This change in mindset has influenced people's interest in finding healthy food sources, such as vegetables that are good for health.

The Routledge Companion to International Children's Literature John Stephens,2017-09-11 Demonstrating the aesthetic, cultural, political and intellectual diversity of children's literature across the globe, The Routledge Companion to International Children's Literature is the first volume of its kind to focus on the undervisited regions of the world. With particular focus on Asia, Africa and Latin America, the collection raises awareness of

children's literature and related media as they exist in large regions of the world to which 'mainstream' European and North American scholarship pays very little attention. Sections cover: • Concepts and theories • Historical contexts and national identity • Cultural forms and children's texts • Traditional story and adaptation • Picture books across the majority world • Trends in children's and young adult literatures. Exposition of the literary, cultural and historical contexts in which children's literature is produced, together with an exploration of intersections between these literatures and more extensively researched areas, will enhance access and understanding for a large range of international readers. The essays offer an ideal introduction for those newly approaching literature for children in specific areas, looking for new insights and interdisciplinary perspectives, or interested in directions for future scholarship.

Cultivated vegetables of the world: a multilingual onomasticon Stanley J. Kays, 2011-10-03 Vegetables make up a major portion of the diet of humans and are critical for good health. With the world population predicted to reach 9 billion people by 2050, they will play an increasingly important role in food availability. The purpose of this book is to facilitate accuracy in communication among individuals working in agriculture and a better understand of the extent and diversity of vegetable production and utilization worldwide. Increasing global economic interdependence and trade in agricultural products makes precise communication among individuals utilizing different languages essential. The text provides up-to-date scientific names, synonyms, and common names for the commercially cultivated vegetable crops grown worldwide (404 crops), in addition to information on the plant parts utilized and their method of preparation. Common names from 370 languages are presented along with information on each of the languages. The text represents an essential reference source with the information presented in a concise and readily accessible format. It allows indentifying a crop from the common name in a diverse cross-section of languages and is therefore of use to university and government researchers, libraries worldwide, agricultural organizations, agricultural scientists, embassies, international travelers, vegetable growers, shippers, packers, produce buyers, grocery store managers, gourmet restaurants, chefs, and gardeners.

**For My Children...What I Cooked for You** B Bot,2013-03-19 For My Children . . . What I Cooked For You, in two volumes, is her third publication. The book is the result of a request by her children who wanted some record of all that had been cooked for them. Many friends had also asked for her to record her recipes, which some had enjoyed trying out. The book is a different cook book in that it is full of advice, tips, and notes on how to go about cooking using her recipes. The main idea had been to help the children pick up the way she had cooked their favorite dishes. However, the book should also be useful for anyone learning to cook and for anyone else trying to understand how to cook Malay or Malaysian cuisine.
