Modelling British World War II Armoured Vehicles Tom Cole, 2019-03-25 This new book will be an essential reference for modellers and wargamers who build and paint World War II British armoured fighting vehicles. It provides extensive information on different types of vehicles, describing when they were used, by whom and for what purpose. In addition, the many modifications made to vehicles during the war are included, with guidance on how to create these for models. The step-by-step building and painting guides illustrate vehicles in 1/35, 1/72 and 1/76 scale. This book features models, often with a comparison of models from different manufacturers, for the following: M3 Grant Mk1, including a North African version; Cromwell Mk IV; Royal Marine Centaur; Cavalier Observation Post; Sherman M4A1 and Crab; Crusader III AA Mk 1; Matilda; Morris and Guy Quads; Bedford QLs; Scammell Pioneer Heavy Artillery tractor conversion; Anti-tank guns, e.g. the 'Pheasant', field guns, anti-aircraft guns, etc and, finally, figures which include uniform painting guides. The author has been a keen military modeller for many years and has a particular passion for British & Commonwealth forces of WWII. It is superbly illustrated with 335 colour photographs.

Unlocking Social Theory with Popular Culture Naomi Barnes, Alison Bedford, 2021-08-26 This book demonstrates how pop culture examples can be used to demystify complex social theory. It provides tangible, metaphorical examples that shows how it is possible to do philosophy rather than subscribe to a theorist by showing that each theorist intersects and overlaps with others. The book is embedded in the literary theory that tapping into background knowledge is a key step in helping people engage

with new and difficult texts. It also acknowledges the important role of popular culture in developing comprehension. Using a choose your own adventure structure, this book not only shows students of social theory how various theories can be applied but also reveals the multitude of possible pathways theory provides for comprehending society.

Cruising the Queensland Coast: Third Edition Greg Luck, 2023-11-22 Cruising the Queensland Coast is a cruising guide for yachts cruising the Queensland coast. Each of the 13 coasts, from the Gold Coast to the Cooktown Coast, is covered in detail, including marinas, anchorages, passages, wind and wave averages, public pontoons and quick reference information and links for vital weather, search and rescue, notices to mariners and other vital information. It features hundreds of chartlets and high-resolution aerial photos of anchorages to take the guesswork out of anchoring. Each anchorage has

information on depth, bottom, mobile reception, marine park zone and recommended wind directions and strengths. The book is also integrated with Navionics and C-Map. Anchorages and passages can be imported into Navionics and C-Map via GPX link □ icons throughout the book. The book also provides an extensive reference of useful information for the Queensland Coast such as skills and experience, recommended apps, charts and books, equipping the yacht for cruising, cruising logistics, climate and weather systems, marine hazards and the three major marine parks and their rules. This book will help get the first-time cruiser of the Queensland coast started. For those familiar with the coast, the wealth of information, data and links all pulled together into one place and organised in a systematic way will prove invaluable. For both, the more than one thousand external reference links make it easier to cruise the coast safely and simplify many of the everyday tasks of living on a cruising yacht such as finding and entering a marina and restocking once there.

Sixty Years of Airfix Models Jeremy Brook,2015-06-30 The best-known and most

important manufacturer of plastic model kits in the UK, Airfix has been at the forefront of the industry since 1955 when the first Airfix aircraft kit appeared in UK branches of Woolworth's. The kits were made to a constant scale and covered a wide variety of subjects, from aircraft to birds and from tanks to dinosaurs. In 1981 the famous London-based company closed down and only the kits survived intact. For the next twenty-five years Airfix was run by Palitoy and later Humbrol, but suffered from a lack of investment. In 2006, Hornby Hobbies Ltd, the train and Scalextric manufacturer, bought the ailing company and transformed it. Money and resources were ploughed into the range, and today Airfix releases around twenty new kits per year, designed to an incredibly high standard. The old kits of the 1950s and 1960s are gradually being replaced by new state-of-the-art tooling, all bearing that most prestigious name - Airfix. Published to coincide with the sixtieth anniversary of the first Airfix aircraft kit, *Sixty Years of Airfix Models*, tells the full story, year by year, of the company and its products. Illustrated throughout with colour photographs of kits, box art and completed models.

Australian Coastal Systems Andrew D. Short, 2019-08-29 This book describes the entire coast and beaches and barrier systems of Australia. It covers the coastal processes and systems that form and impact Australia's 30,000 km coast, 12,000 beaches and 2750 barrier systems. These processes include geology, geomorphology, climate, waves, tides, currents, sediment supply, as well as coastal ecosystems. The coast is divided into tropical northern and southern temperate provinces, within which are seven divisions, 23 regions and 354 coastal sediment compartments each of which is described in detail in the 34 chapters. Within these systems are the full range of wave through tide-dominated beaches

and barriers ranging from cheniers to massive transgressive dune systems together with a range of onshore and longshore sand transport systems. This is an up to date reference for the entire coast, its present condition and likely responses to the impacts of climate change.

European Discovery and Exploration of Australia Erwin Feeken, 2019-06-21 The map of Australia abounds with fascinating geographical place-names, the origins of which have, for long, been hidden in the journals of our early explorers. Now after nine years of research, Erwin Feeken, a highly qualified cartographer, and his wife, Gerda, have finalised the first complete record of Australian geographical place-names and the most comprehensive general reference work on Australian exploration ever published. In *European Discovery and Exploration of Australia*, there are twenty-three beautifully drawn four-colour maps plus index showing the routes of more than 120 explorers with the locality of their named features numbered to accord with a Key to the Maps. The place-names in the Key have been numbered approximately in chronological order of their naming, though places found during a single expedition have been grouped together. There is also a gazetteer containing over four thousand place-names alphabetically arranged with notes on their origins. The map reference numbers (in brackets) form a cross-reference with the Key to the Maps. The work is introduced by a foreword from Lord Casey and an essay on the nature of Australian exploration by Professor O. H. K. Spate, director of the Research School of Pacific Studies, Australian National University. The text, comprising a survey of Australian exploration, is arranged in the form of biographies of the explorers (describing, for the first time, several almost unknown figures) with

emphasis on their expeditions and under the following headings: “The Approach to Australia”; “Exploration before Settlement, 1606–1788”; “From Botany Bay to the Blue Mountains, 1788–1813”; “Land and Sea Expeditions, 1813–1901.” This section of the book is very fully illustrated with 18 full-colour plates and some 150 black-and-white photographs, mostly reproductions of early prints. Concluding the book are bibliographies of sources and references, a list of illustrations, and an index of explorers and ships. The comprehensive nature of this work will ensure that it becomes a valuable reference book for students, while the text and illustrations will appeal to all who are interested in our history. Collectors of Australiana will welcome this most attractive addition to the ever-increasing number of available publications.

A History of Abortion and Contraception in Queensland, Australia, 1960–1989

Cassandra Byrnes, 2024-06-03 This book looks at the recent history of sex, contraception, and abortion in Australia’s most conservative state, Queensland. In western nations, there has largely been a consistent increase in available contraception and access to abortion from the 1960s onwards, yet there are a few geographical exceptions that resisted this trend, including Queensland. Cassandra Byrnes highlights the multifarious ways sexuality and reproduction were continually constructed and challenged during the second half of the twentieth century and follows the responses of key groups to changing laws and attitudes in a time of local and global sexual and social revolutions. She explores interactions between identities of gender, sexuality, class, age, marital status, and geography to illustrate how specific sexed bodies became liminal sites for legal and medical debate. This Queensland case study is contextualised within international debates

concerning women's reproductive rights and will be of interest to students and scholars interested in the history of reproductive rights, gender, and sexuality.

Cyber Knights 1.1 Harold Coyle, Jennifer Ellis, 2015-10-27 Cyber Knights 1.1 is the second part in a stunning two-part collection of stories based on true-life cyber vulnerabilities, by Harold Coyle and Jennifer Ellis Here be Dragons. In the Age of Discovery, unexplored areas of a map were often marked with this warning. Today, such a warning could easily be applied to the internet. Hackers and cyber assassins present a

constant threat to individuals, companies, and institutions. Protecting these targets requires a new kind of warrior, a cyber knight armed with the skills, weapons, and savvy needed to slay today's dragons. One such digital warrior is Andy Webb, a former British Army officer. Together with Karen Spencer, a shy, twenty-something American who is a wizard when it comes to software, and Tommy Tyler, a rough and ready ex-soldier and hardware expert, Webb forms Century Consultants. The cyber security firm must work to defend its clients from the hackers, criminals and hired cyber assassins who seek out victims on the world wide web. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Army options are almost limitless, allowing you to build the kind of army that most appeals to your style of play, from heavily armored tank forces to lightly armed, but highly skilled infantry. The choice is yours.

Aeolian Sediments Kenneth Pye,N. Lancaster,2009-04-06 Studies of aeolian sediments,

both ancient and modern, have exhibited a number of important conceptual advances in recent years. In particular, there has been a move away from descriptions of sediments, bedforms and sedimentary environments toward a new emphasis on the dynamics of aeolian depositional systems at different temporal and spatial scales, and their response to external changes in sea levels, regional and global climates and tectonics. This Special Publication contains a selection of papers that were presented at the Symposium Aeolian Sediments: Ancient and Modern held in 1990. It also includes a number of contributions from authors who were not able to attend the meeting, but whose work reflects important aspects of contemporary research in aeolian sedimentology. State-of-the-art research papers in aeolian sedimentology International, expert authorship Of relevance to modern concerns about global climate change If you are a member of the International Association of Sedimentologists, for purchasing details, please see:
