*The Making of the Modern Chinese Navy* Bruce A. Elleman,2019-08-31 ‘The Making of the Modern Chinese Navy’ includes 14 historical case studies that help to illuminate a number of special characteristics of the modern-day Chinese navy most Chinese naval officers perhaps take for granted, including a belief in the Mandate of Heaven, tributary system and the fear of ‘losing face’ either in a diplomatic setting or by risking valuable equipment in battle. Ethnic and language differences, regional loyalties and political mistrust potentially exacerbate these problems. Special peculiarities include the Mongol dual-officer diarchy that led to the political commissar system utilized by the People’s Liberation Army. Outside influences, such as blockade, sanctions or embargoes, can exert a profound impact on China, just as foreign intervention or, equally important, a decision not to intervene, can often determine the outcome of major maritime events. [NP] The 14 case studies discuss many of these characteristics, while the Conclusion examines all case studies together and places them in a historical perspective. ‘The Making of the Modern Chinese Navy’assesses which of these historical characteristics and peculiarities are still present in full force in China and which ones may no longer have as great an impact on the contemporary Chinese navy.

*Chinese Battleship vs Japanese Cruiser* Benjamin Lai,2019-02-21 The 1894–95 war between China and Japan, known in the West as the First Sino-Japanese War, lasted only nine months, but its impact resonates today. The Chinese Beiyang (Northern) Fleet was led by her flagship, Dingyuan, and her sister ship, Zhenyuan, which were the biggest in Asia; German-built armoured turret ships, they were armed with four 12in guns and two 6in guns, plus six smaller guns and three torpedo tubes. For their part the Japanese fleet, including the Matsushima and her sister ships Itsukushima and Hashidate, were each armed with a single 12.6in Canet gun and 11 or 12 4.7in guns, plus smaller guns and four torpedo tubes. The scene was set for a bloody confrontation that would stun the world and transform the relationship between China and Japan. Fully illustrated with stunning artwork, this is the engrossing story of the Yalu River campaign, where Chinese and Japanese ironclads fought for control of Korea.

*A History of the Modern Chinese Navy, 1840–2020* Bruce A. Elleman,2021-05-09 This book provides a comprehensive history of the modern Chinese navy from 1840 to the present. Beginning with a survey of naval developments in earlier imperial times, the book goes on to show how China has since the mid-19th century four times built or rebuilt its navy: after the Opium Wars, a navy which was sunk or captured by the Japanese in the war of 1894–1895; during the 1920s and 1930s, a navy again sunk or lost to Japan, in the war of 1937–1945; in the 1950s, a navy built with Soviet help, which stagnated following the Sino-Soviet split in the early 1960s; and finally the present navy which absorbed its predecessor, but with the most modern sections dating from the 1990s—a navy which continues to grow and prosper. The book also shows how the underlying strategic imperative for the Chinese navy has been the defense of China’s coasts and major rivers; how naval mutiny was a key factor in the overthrow of the Qing and the Nationalist regimes; and how successive Chinese governments, aware of the potent threat of naval mutiny, have restricted the growth, independence, and capabilities of the navy. Overall, the book provides—at a time when many people in the West view China and its navy as a threat—a rich, detailed, and realistic assessment of the true nature of the Chinese navy and the contemporary factors that affect its development.

*China's Maritime Power and Strategy* Hailong Ju,2015-04-08 This book conducts a comprehensive study on China's maritime strategy. It discusses the lessons of maritime power history that must be learnt by Chinese today, the relations between China's maritime strategy and domestic developing problems of China, the status and influence of maritime strategy from China's overall development strategy perspective, and the geopolitical targets of Chinese navy in 2050. China's maritime strategy is one of the most important academic and realistic subjects in the present and future. This book is the first book to discuss China's maritime strategy comprehensively in and outside China. It will give readers a better sense of why China has to develop its sea power, why it lays so much emphasis on Taiwan and the South China sea, why the country can make friends with India but not Japan, and why China's maritime strategy will never challenge America but has to face the pressure from America's maritime hegemony, and so on. Contents:Historical Lessons of Dealing with the Maritime Offensive Strategy in a Defensive WayLearn from the Sea Power Theory and Geopolitical TheoryThe Domestic Motivation of China's Maritime Power StrategyThe International Environment of China's Maritime Power StrategyThe Competitors of China's Maritime Power StrategyThe Geopolitical Watershed of China's Maritime PowersSurrounding Environment of China's Maritime Power StrategyThe Strategic Design for China's Maritime Power in Asia-Pacific Readership: Academics, undergraduate and graduate students, policymakers and professionals interested in China's maritime strategy and geopolitics. **Armies of the First Sino-Japanese War 1894–95** Gabriele Esposito,2022-10-27 Describes how newly modernized Japan waged war against China in its first overseas campaign, marking its rapid transition into Asia's leading military power only 30 years after emerging from centuries of feudalism. After the Meiji restoration of the Japanese imperial regime in 1868–77, modernization along Western lines of Japan's industry, communications and land and naval forces advanced with remarkable speed and, by the 1890s, the rejuvenated nation was ready to flex its muscles overseas. The obvious opponent was the huge but medieval Chinese Empire, and the obvious arena for war was Korea, a nearby Chinese protectorate that Japan had long coveted. (A secondary campaign would be fought on Formosa/Taiwan, an autonomous Chinese island protectorate.) In this study, author Gabriele Esposito describes the bloodthirsty course of the Japanese campaign in China, using colour illustrations and photos to showcase the organization, equipment and appearance of the various Chinese forces (China had no true national army), the Imperial Japanese Army and Navy, and, for the first time in English, the Korean and Formosan participants. Japan's victory left it confident enough to challenge Imperial Russia and, nine years later, it defeated it at the Battle of Tsushima where two-thirds of the Russian fleet was destroyed by the Japanese Navy. This victory confirmed Japan's place as Asia's leading military power, soon to become a realistic rival to the West.

*Encyclopedia of Chinese History* Michael Dillon,2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study, for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China’s history has also been evolving. The study of history in the People’s Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China Proper and

will also include material on Taiwan, and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.

**Poseidon** Steven R. Schwankert, 2013-10-01 Royal Navy submarine HMS Poseidon sank in collision with a freighter during routine exercises in 1931 off the Chinese coast. Thirty of its fifty-six-man crew scrambled out of the hatches as it went down. Of the twenty-six who remained inside, eight attempted to surface using an early form of diving equipment: five of them made it safely to the surface in the first escape of this kind in submarine history and became heroes. The incident was then forgotten, eclipsed by the greater drama that followed in World War II, until news emerged that, for obscure reasons, the Chinese government had salvaged the wrecked submarine in 1972. This lively account of the Poseidon incident tells the story of the accident and its aftermath, and of the author's own quest to discover the shipwreck and its hidden history.

**Historical Dictionary of Modern China (1800-1949)** James Z. Gao, 2009-06-16 The Historical Dictionary of Modern China (1800-1949) offers a concise but comprehensive examination of the political, military, economic, social, and cultural development of modern China. Instead of focusing merely on the political elites of China, this reference covers a variety of significant persons, including women and ethnic minorities; new historical concepts; cultural and educational institutions; and economic activities. Drawing on newly-available records, including a large mass of governmental and family archives, the narratives presented reveal new facts, offer a new interpretation in accordance with China's modernization process during the late Qing period, and a revisionist perspective on the Republican history. The chronology records not only political and military events but also other experiences of the Chinese people. The bibliography gives prominence to current literature on China's drive towards modernization and appendixes provide the reader with detailed information on China's cultural and economic transformation.

**Japan's First Modern War** S. Lone, 1994-08-30 This is the first ever English-language study of the war which established Japan's image as a warrior nation, an image which in many ways persists today. Using extensive Japanese materials, including the letters of frontline troops and provincial newspapers, it presents the diverse experience both of soldiers and civilians and reveals how war accelerated the modernization of Japanese society. Included are such topics as the soldiers' impressions of duty, nation, and their 'fellow' Asians; the role of the emperor as commander-in-chief; the use of the war in schools; as well as the activities of small business, institutional religion, and patriotic societies.

**Military History of the Qing Dynasty** Li Shi, The book is the volume of "Military History of the Qing Dynasty" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600-1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070-1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046-256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC - 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644-1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood - the most recent being the Chinese Civil War (1927-1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

**Naval Blockades and Seapower** Bruce A. Elleman, S.C.M. Paine, 2007-04-11 This new collection of scholarly, readable, and up-to-date essays covers the most significant naval blockades of the nineteenth and twentieth centuries. Here the reader can find Napoleon's Continental Blockade of England, the Anglo-American War of 1812, the Crimean War, the American Civil War, the first Sino-Japanese War 1894-95, the Spanish-American War, the First World War, the second Sino-Japanese War 1937-45, the Second World War in Europe and Asia, the Nationalist attempt to blockade the PRC, the Korean War, the Cuban Missile Crisis, the Vietnam War, the British blockade of Rhodesia, the Falklands War, the Persian Gulf interdiction program, the PRC missile blockade of Taiwan in 1996, and finally Australia's recent reverse blockade to keep illegal aliens out of the country. The authors of each chapter address the causes of the blockade in question, its long and short-term repercussions, and the course of the blockade itself. More generally, they address the state of the literature, taking advantage of new research and new methodologies to provide something of value to both the specialist and non-specialist reader. Taken as a whole, this volume presents fresh insights into issues such as what a blockade is, why countries might choose them, which navies can and cannot make use of them, what responses lead to satisfactory or unsatisfactory conclusions, and how far-reaching their consequences tend to be. This book will be of great interest to all students and scholars of strategic studies, military history and maritime studies in particular.

**Dictionary of Contemporary Chinese Military History** Larry M. Wortzel, 1999-09-30 Tracking the evolution of the Red Army through the war against Japan and the Chinese civil war, Wortzel's book provides a comprehensive basic reference focusing on the major events, people, and issues that have produced the historical legacy of the People's Liberation Army. Placing contemporary Chinese military history in the context of China's 19th century clashes with the West and Japan, Wortzel illustrates how the imposition of unequal treaties by foreign powers conditioned China's 20th century defense forces and actions and explains how the Communist military forces developed. It also shows how fractionalization in the Communist military leadership led to the Cultural Revolution and Mao Zedong's purges. Drawing on a substantial number of sources available only in Chinese as well as on English-language secondary sources, the book provides a basic reference aimed at orienting the nonspecialist to the significant events and people in China's recent military history. The book will also provide a quick reference for the specialist in Chinese history.

**Modern Chinese Warfare, 1795-1989** Bruce A. Elleman, 2005-07-28 Why did the Chinese empire collapse and why did it take so long for a new government to reunite China? Modern Chinese Warfare, 1795-1989 seeks to answer these questions by exploring the most important domestic and international conflicts over the past two hundred years, from the last half of the Qing empire through to modern day China. It reveals how most of China's wars during this period were fought to preserve unity in China, and examines their distinctly cyclical pattern of imperial decline,

domestic chaos and finally the creation of a new unifying dynasty. By 1989 this cycle appeared complete, but the author asks how long this government will be able to hold power. Exposing China as an imperialist country, and one which has often manipulated western powers in its favour, Bruce Elleman seeks to redress the views of China as a victimised nation.

***Wars That Changed History*** Spencer C. Tucker,2015-09-22 A thorough study of significant wars throughout history and their influence on world affairs-from the Egyptian Pharaoh Thutmose III's Campaigns during 479-459 BCE through the Iraq War of 2003-2011. For hundreds of years, wars have played a determining role in history and have decided the rise and fall of civilizations. Many believe that understanding the causes and consequences of warfare may move humankind towards world peace. This selection of the 50 most consequential wars, compiled by award-winning military historian Spencer C. Tucker, presents each conflict in chronological order and discusses its causes, its course, and its significance in world history. Through thoughtful essays and supporting visual evidence, this reference work examines the types of weapons systems employed and their effects in the field; the roles played by individual leaders such as Alexander the Great, Julius Caesar, Abraham Lincoln, and Adolf Hitler; and the impact of geography and economics on the battlefield. The work includes fascinating information about warfare, addressing subjects such as how transportation and logistics changed the face of war over time, what invention marked the ascendancy of infantry over cavalry, why World War I remains the most important war in the 20th century, and which war killed nearly half of the population of Germany. Each essay includes the latest interpretations of strategy, agendas, and consequences of the featured event.

**Heritage Tourism in China** Hongliang Yan,2017-01-25 This book offers new approaches and insights into the relationships between heritage tourism and notions of modernity, identity building and sustainable development in China. It demonstrates that the role of the state, politics, institutional arrangements and tradition have a considerable impact on perceptions of these notions. The volume contributes to current debates on tradition and modernity; the study of heritage tourism; the negotiated power between stakeholders in tourism planning and policy-making and the study of China's society. The approach and findings of the book are of value to those interested in the continuities and changes in Chinese society and to graduate students and researchers in tourism, cultural studies and China studies.

**China's Wars** Philip Jowett,2013-11-20 China is one of the great powers of the modern world. Yet in the late 19th century China was a ramshackle and isolated medieval empire upon whom the European colonial powers could impose their wishes at will. China's Wars describes the series of conflicts from 1894 to 1949 that forged modern China, from colonial clashes such as the Boxer Rebellion, through the chaotic years of warlord domination to the Japanese invasion, the Second World War and the bitter Civil War that followed. Previously unpublished photographs, contemporary pictures and specially-commissioned maps illustrate these tumultuous events and the men who fought them, events that would end with the eventual triumph of the Communist Party and the rise of modern China.

**The Other Great Game** Sheila Miyoshi Jager,2023-05-16 Sheila Miyoshi Jager returns to the three-cornered contest among imperial Russia, China, and Japan over the Korean Peninsula. The battle to colonize Korea upended East Asian geopolitics, set great-power conflicts of the twentieth century in motion, and seeded internal rivalries that persist in the peninsula's division between North and South.

**Imperial Wars 1815-1914** Professor Dennis Showalter,2013-09-16 The Imperial Wars volume in the Encyclopedia of Warfare Series describes the wars and battles that took place during the height of European imperialism. A chronological guide to conflict on every continent in the century after the fall of Napoleon, the book covers from the South American Wars of Independence to the Mexican Revolution.
