

Bell Ah 1 Cobra

Hugh L. Mills, Jr.

The Bell AH-1 Cobra Alexander Lüdeke,2018-02-20 The Bell AH-1 was the first helicopter designed and built exclusively for combat. First flown in 1965, the AH-1, with its characteristic streamlined silhouette and stub wings, quickly became an indispensable asset and feared opponent. Development continued over the years and even today much improved and higher performance versions are still in service around the world. Design, development, and construction are discussed, as well as modifications made during production and the addition of night combat capabilities. Operational use in Vietnam, Operations Desert Shield/Storm, as well as current day combat are extensively covered. AH-1 use by other armed forces around the world such as Spain, Israel, Japan, Taiwan, Turkey, and others is described as well.

Bell AH-1 Cobra Mike Verier,1990

US Army AH-1 Cobra Units in Vietnam Jonathan Bernstein,2012-11-20 Bell's AH-1 Cobra was the first dedicated helicopter gunship to reach frontline service anywhere in the world. Developed as a private venture by the manufacturer, and based on the mechanics of the ubiquitous UH-1 Huey, the Cobra proved a huge success once introduced into combat with the US Army in 1966. Built as a key weapon in the Advanced Aerial Fire Support System concept of 1965, the AH-1 was one of the few aircraft to reach the combat zone after actual combat experience went into its design. The AH-1 helped reduce the losses being suffered by vulnerable troop transport helicopters by providing effective fire suppression during airmobile operations. This book explores its history, technology and crew.

AH-1 Cobra Wayne Mutza,Don Greer,Richard S. Dann,John Lowe,Richard Hudson,2002-05 Born out of a need for an armed escort for US Airmobile forces in Vietnam, the Bell AH-1 Cobra went on to become the US Army's premier attack helicopter from Vietnam to the 1980s, when the Army began replacing the Cobra with the new AH-64 Apache (The Cobra is still in use with the USMC). In this title the AH-1 is presented in meticulous detail. Includes cockpits, engines, weapons, airframe and more. Also covers US Marine Corps version. Illustrated with 112 b/w and 96 color photos, 12 color drawings, and 9 b/w drawings.

Cobra! The Attack Helicopter Mike Verier,2014-02-10 The history of the Cobra helicopter is a long and varied one, characterised by extensive deployment in some of the most dynamic theatres of war. Designed in 1965, we are fast approaching the 50th Anniversary of the craft's inception into the world of combat flight, so it seems timely that we should be presented with this, a comprehensive historical account of the various landmarks of the Cobra's service history. This heavily illustrated volume relays the story of the Cobra from the days of early development and concept dissection right through to modern day uses, in both combat and civil contexts. Details of the early trials at Rucker are detailed, as is the birth of air mobile deployment, offering an illuminating insight into a most eventful period of developmental expansion. A full account of the Cobra's service history during the Vietnam campaign is also on display, describing the various tactics and weapons employed. The development of iconic variants such as the King Cobra and Supercobra is outlined, their individual histories set alongside those of

lesser known and under-sung types, one off designs and oddities that add yet more colour to this fascinating history. Included alongside the authors text are first hand accounts that supplement the history, enlivening the facts with accounts of authentic pilot experience, the handling and flying characteristics that can perhaps only truly be described by those in command of such machinery. The work is brought thoroughly up to date with details of current deployment and uses in both combat and civil capacities. The employment of the Cobra by NASA and USCS illustrates its usefulness in a variety of fields, proving that the craft is so much more than a mere component part of the machinery of war. This book is sure to appeal to helicopter and aviation enthusiasts keen to enhance their understanding of this iconic type. It has been long defined, and with good reason, as 'the Spitfire of the helicopter world' here it is granted the platform it deserves in order to be appreciated by a wider audience.

Snake Pilot Randy R. Zahn, 2003 Flies the reader into combat with the same elite air cavalry unit portrayed in the film *Apocalypse Now*

Super Cobra Attack Helicopters Michael Green, Gladys Green, 2005 Describes the AH-1W Super Cobra helicopter, including its history, equipment, weapons, tactics, and future use. Includes photo diagram.

Ah-1 Cobra Attack Helicopter Pilot's Flight Operating Instructions Headquarters Department of the Army, 2011-05 During the Vietnam War fleets of transport helicopters provided U.S. forces with an unprecedented level of mobility and proved the concept of air cavalry. But without adequate support, helicopters such as the Bell UH-1 proved vulnerable to enemy ground fire. The solution was to develop a helicopter gunship. Bell's first foray into the category was rejected by the Army, but after Lockheed's AH-56 failed to meet critical goals, Bell answered the call with a new design. Equipped with a tandem cockpit, stub wings for weapons and a chin-mounted gun turret, Bell's Model 209 prototype was smaller and lighter than the AH-56, and used proven components from the UH-1. Developed in less than nine months, the 209 performed well and easily won the Army competition. In April 1966 the Army placed its first order for 110 aircraft, now designated the AH-1 Cobra or HueyCobra (but also widely known by the nickname Snake). Over 1100 would eventually be built, including twin-engine SeaCobra and SuperCobra versions for the Marine Corps. After entering service in June of 1967, Cobras provided extensive support in Vietnam as fire support platforms, and achieved over a million operational hours. Cobras also flew in Operation Desert Shield, Desert Storm and in Somalia before being retired in the late 1990s. They continue to fly for the Marine Corps, NATO allies and elsewhere. They also serve in a civil role as fire fighting helicopters. Created by Bell and the U.S. Army, this pilot's flight operating manual profiles the AH-1F Cobra. Over 300 pages long, this unclassified document is reprinted here in its entirety.

Huey Cobra Gunships Chris Bishop, 2006-08-29 The Bell Huey Cobra was the very first purpose-designed helicopter gunship to become operational and to see combat. Designed in the mid-1960s as an interim solution for an armed escort and close-support weapon to support the US Army in the Vietnam War, it is still being manufactured and improved in the 21st century, making it a success far beyond the wildest dreams of its creators. In this title Chris Bishop discusses the origins of the Huey Cobra, the innovations to its design throughout the years and its major combat uses in numerous theatres, including Vietnam, the Iran-Iraq War in the 1980s, US Persian Gulf escort operations, Lebanon 1983, Panama 1989, the Gulf War 1991 and in the current conflict in Iraq.

Low Level Hell Hugh L. Mills, Jr., 2009-01-16 The aeroscouts of the 1st Infantry Division had three words emblazoned on their unit patch: Low Level Hell. It was then and continues today as the perfect concise definition of what these intrepid aviators experienced as they ranged the skies of Vietnam from the Cambodian border to the Iron Triangle. The Outcasts, as they were known, flew low and slow, aerial eyes of the division in search of the enemy. Too often for longevity's sake they found the Viet Cong and the fight was on. These young pilots (19-22 years old) "invented" the book as they went along. Praise for Low Level Hell "An absolutely splendid and engrossing book. The most compelling part is the accounts of his many air-to-ground engagements. There were moments when I literally held my breath."—Dr. Charles H. Cureton, Chief Historian, U.S. Army Training and Doctrine (TRADOC) Command "Low Level Hell is the best 'bird's eye view' of the helicopter war in Vietnam in print today. No volume better describes the feelings from the cockpit. Mills has captured the realities of a select group of aviators who shot craps with death on every mission."—R.S. Maxham, Director, U.S. Army Aviation Museum

Apache - Boeing AH-64 Mantelli - Brown - Kittel - Graf, 2015-06-23 The Boeing AH-64 Apache is an attack helicopter developed in the United States of America since the early seventies. Use a main rotor and one tail, both with four blades. The helicopter is designed as a twin-engine two-seater in tandem, for use in anti-tank missions, assault, escort and fighter anti-helicopter, to be carried out in all weather conditions and light. The main armament consists of an automatic cannon M230 chain gun caliber 30 mm. It can be equipped with a combination of anti-tank missiles, rockets and air-to-air attached to the side flaps. The Apache is the primary attack helicopter of the US Army and the successor to the Bell AH-1 Cobra. It was designed by Hughes Helicopters to meet the requirements of the program Helicopter Attack Advanced (AAH) launched by the US Army in 1972. Later, the

McDonnell Douglas acquired Hughes Helicopters and continued the development of the AH-64, AH-64D Apache getting the Longbow. After various corporate events, the project was awarded to Boeing Defense, Space & Security that continued production for the US requirements and for export to other countries. Apaches saw the first operational deployment in battle during the commitment of the US Army during the invasion of Panama in 1989. Other uses of war helicopter from the US Army were the 1991 Gulf War, the Kosovo war in 1999, the war in Afghanistan in 2001 and the war in Iraq 2003. The AH-64 Israelis have participated in all major military operations in his country since the nineties.

Matthew Brannon: Concerning Vietnam Matthew Brannon, 2019-07-23 Brannon offers us a different perspective and, just maybe, a higher level of understanding when it comes to this great American disaster story. -Clive Martin, CNN New York-based artist Matthew Brannon (born 1971) has spent the past five years exhaustively researching the Vietnam/American War, seeking his own understanding of one of the most pivotal confrontations of the 20th century and translating that research into intricate silkscreen works that collage military documents, maps, logos, memoranda and contemporaneous ephemera. Concerning Vietnam distills a picture of the war and its ongoing effects in vivid, densely packed images that employ the bold graphic design for which the artist is known. Alongside these works are Brannon's notes on the objects and situations they depict, constructing a detailed chronology of the war and a complex overview of the consequences of US intervention in Southeast Asia. Designed by Studio LH00Q in close collaboration with the artist, Concerning Vietnam collects the entire series of prints and texts, with a new essay on the work by curator Veronica Roberts and a conversation between the artist and Vietnam historian Mark Atwood Lawrence.

The Huey in Vietnam David Doyle, 2021-10-28 Few implements of war are as representative of the US presence in Vietnam as the Bell Huey UH-1-series helicopters. Whether serving in the role of troop transport for airborne assault, supply transports, aerial gunships, or medical evacuation, the Huey was seemingly everywhere. The versatile aircraft, officially the Iroquois, was affectionately known to all as the Huey, a name derived from its early model designation of HU-1A. The Huey, later redesignated UH-1, was a mainstay during America's presence in Vietnam, and 11 Huey crewmen earned the Medal of Honor. Through carefully researched archival documents and photographs, the history of this iconic helicopter, and the men who flew it, is told in this illustrated volume.
