Martin D. Maisel

Bell/Boeing V-22 Osprey Bill Norton,2004 This joint Bell and Boeing project was established in 1982 in response to the Joint Services Advanced Vertical Lift Program covering a wide performance envelope and multiple tasks. The answer came in the form of the V-22 tilt-rotor, a concept tested earlier by Bell with their 1977 XV-15. The transport aircraft style fuselage of the V-22, able to carry 24 troops, is topped by a wing with a complex flap/aileron system and two swivelling pods housing Rolls-Royce turboshaft engines, each driving enormous three-bladed prop-rotors. The intention was that the USAF would receive the CV-22B for special missions work, the US Marine Corps the MV-22B assault transports and the US Navy the HV-22B CSAR/fleet logistics version, but the technologically challenging program has been set back by fatal accidents and an 18 month grounding while flight safety issues were addressed. However, it is set to recommence a restricted development program with the intention that the production aircraft will begin to be delivered at the end of 2003 and gain initial operating capability by 2005, making this comprehensive new book a timely in-depth coverage of the aircraft.

The Dream Machine Richard Whittle,2010-04-27 WHEN THE MARINES decided to buy a helicopter-airplane hybrid "tiltrotor" called the V-22 Osprey, they saw it as their dream machine. The tiltrotor was the aviation equivalent of finding the Northwest Passage: an aircraft able to take off, land, and hover with the agility of a helicopter yet fly as fast and as far as an airplane. Many predicted it would reshape civilian aviation. The Marines saw it as key to their very survival. By 2000, the Osprey was nine years late and billions over budget, bedeviled by technological hurdles, business rivalries, and an epic political battle over whether to build it at all. Opponents called it one of the worst boondoggles in Pentagon history. The Marines were eager to put it into service anyway. Then two crashes killed twenty- three Marines. They still refused to abandon the Osprey, even after the Corps' own proud reputation was tarnished by a national scandal over accusations that a commander had ordered subordinates to lie about the aircraft's problems. Based on in-depth research and hundreds of interviews, *The Dream Machine* recounts the Marines' quarter-century struggle to get the Osprey into combat. Whittle takes the reader from the halls of the Pentagon and Congress to the war zone of Iraq, from the engineer's drafting table to the cockpits of the civilian and Marine pilots who risked their lives flying the Osprey—and sometimes lost them. He reveals the methods, motives, and obsessions of those who designed, sold, bought, flew, and fought for the tiltrotor. These stories, including never before published eyewitness accounts of the crashes that made the Osprey notorious, not only chronicle an extraordinary chapter in Marine Corps history, but also provide a fascinating look at a machine that could still revolutionize air travel.

Defense Acquisitions Katherine V. Schinasi,2008-05 In a letter to Sec. of Defense Cohen, dated Dec. 15, 2000, the author stated that the Marine Corps' V-22 aircraft was not ready for full-rate production & that the Sec. had made a prudent decision to defer that production decision until the V-22 Blue Ribbon Panel reports its findings. This report to Sec. of Defense Rumsfeld explains that conclusions about the program's readiness for full-rate production are based on 'best practices' work that has identified practices used by successful commercial & defense programs to develop & produce quality products in significantly less time & at lower costs. Reviews of major weapon systems has shown that failure to follow these practices has led to cost increases, schedule delays, & performance problems. III.

A TALE OF TWO BIRDS GORDON B. GREER,2009-01-06 Mr. Greer reviews the very sporadic appearance of new weapons of war during the first three millennia of recorded military history. He contrasts this with the increasing frequency of new weapons in the most recent two centuries and the short time generally taken to develop those later weapons. The increased pace of technology improvement in several important categories of weapons is discussed and the sequence is concluded by a review of an extremely long development period of a recent weapon, the Osprey.

Rotors in the Sand Don Harvel,2020-05-20 June 28, 1972, the day I reported to the United States Military Academy at West Point, one of our class's first military acts was to subscribe to the Cadet Code of Conduct, swearing not to lie, cheat or steal ... nor tolerate among us anyone who does. I also pledged, as a cadet, and later as an officer, to preserve, protect, and defend the constitution of the United States. Any future allegiance I incurred fell subordinate to these two.Perhaps that's why I developed an affinity to the flying safety field which resides in a sacred niche within the sphere of flying. At the pinnacle of this citadel of truth resides the accident investigation process ... where there is no room or tolerance for politics or innuendo.I accepted the job to investigate the April 9th, 2010 CV-22 Osprey accident with reservations concerning the magnitude of the task and the inherent barriers preventing the collection of evidence a half-a-world away. But I failed to account for the obstacles of full disclosure, politics, and the reluctance of the same entities that assigned me the task, to accept the controversial findings of the investigation.If, at this point, you have read the first few pages of this book looking for an indictment of the government, Air Force, or the contractors who supply weapons of war, put the book back on the shelf ... or click remove from the digital cart. This is no vendetta, tell-all, hatchet job. This book is about facts and truth. Over a period of five months, the Air Force CV-22 accident investigation board traveled thousands of miles, interviewed over one hundred witnesses, and collected mounds of evidence in an inhospitable environment searching for the reason an Osprey aircraft impacted the ground in the remote desert of eastern Afghanistan. The accident took the lives of four personnel aboard the accident airplane.The following pages chronicle the unpublished and exhaustive investigation process, ending with my opinion of the cause of the Osprey accident on th
