Are you ready to make changes but find yourself completely paralyzed by the choices in front of you? We live in a hyper-connected, “always-on” world, and frankly? It’s exhausting. Let’s make time to disconnect from the distractions and reconnect with yourself. So many of us are wandering through life wearing an invisible backpack full of those things, and it can be heavy. The weight of the stuff we are silently carrying is killing us slowly. We as individuals and every level of our communities are affected by trauma. When we don’t get help, unresolved trauma manifests as mental and physical disease. Join Sydney Williams as she unpacks her trauma pack, sharing the story of how hiking helped her reconnect to, and heal, her mind and body - kicking her limiting beliefs and Type 2 Diabetes to the curb in the process.

📖 ***Why We Get Sick*** Benjamin Bikman, 2020-07-21 A scientist reveals the groundbreaking evidence linking many major diseases, including cancer, diabetes, and Alzheimer’s disease, to a common root cause—insulin resistance—and shares an easy, effective plan to reverse and prevent it. We are sick. Around the world, we struggle with diseases that were once considered rare. Cancer, heart disease, Alzheimer’s disease, and diabetes affect millions each year; many people are also struggling with hypertension, weight gain, fatty liver, dementia, low testosterone, menstrual irregularities and infertility, and more. We treat the symptoms, not realizing that all of these diseases and disorders have something in common. Each of them is caused or made worse by a condition known as insulin resistance. And you might have it. Odds are you do—over half of all adults in the United States are insulin resistant, with most other countries either worse or not far behind. In Why We Get Sick, internationally renowned scientist and pathophysiology professor Benjamin Bikman explores why insulin resistance has become so prevalent and why it matters. Unless we recognize it and take steps to reverse the trend, major chronic diseases will be even more widespread. But reversing insulin resistance is possible, and Bikman offers an evidence-based plan to stop and prevent it, with helpful food lists, meal suggestions, easy exercise principles, and more. Full of surprising research and practical advice, Why We Get Sick will help you to take control of your health.

📖 ***Ancient Turkey*** Antonio Sagona, Paul Zimansky, 2015-02-24 Students of antiquity often see ancient Turkey as a bewildering array of cultural complexes. Ancient Turkey brings together in a coherent account the diverse and often fragmented evidence, both archaeological and textual, that forms the basis of our knowledge of the development of Anatolia from the earliest arrivals to the end of the Iron Age. Much new material has recently been excavated and unlike

Greece, Mesopotamia, and its other neighbours, Turkey has been poorly served in terms of comprehensive, up-to-date and accessible discussions of its ancient past. Ancient Turkey is a much needed resource for students and scholars, providing an up-to-date account of the widespread and extensive archaeological activity in Turkey. Covering the entire span before the Classical period, fully illustrated with over 160 images and written in lively prose, this text will be enjoyed by anyone interested in the archaeology and early history of Turkey and the ancient Near East.

Morphology, Kinematics and Star Formation Across the Hubble Sequence of Galaxies Santiago Erroz-Ferrer, 2015-11-21 This thesis discusses the evolution of galaxies through the study of the morphology, kinematics, and star formation properties of a sample of nearby galaxies. The main body of the thesis describes the kinematic observations with the GHAFAFAS Fabry-Perot instrument on the William Herschel Telescope of a sample of 29 spiral galaxies. The work is closely related to the Spitzer Survey of Stellar Structure in Galaxies, and uses the mid-infrared data of that survey to determine key parameters of the galaxies studied. From these data, important results are obtained on streaming and other non-circular motions in galaxies, on the distribution and rates of star formation, and on how correlations of these parameters and of the rotation curve shape with basic galaxy parameters yield clues on the evolutionary processes taking place in disk galaxies.
