**Glock** Paul M. Barrett, 2013-01-15 The Glock pistol is America's Gun. It has been rhapsodized by hip-hop artists and coveted by cops and crooks alike. Created in 1982 by Gaston Glock, the pistol arrived in America at a fortuitous time. Law enforcement agencies had concluded that their agents and officers, armed with standard six-round revolvers, were getting outgunned by drug dealers with semi-automatic pistols; they needed a new gun. With its lightweight plastic frame and large-capacity

spring-action magazine, the Glock was the gun of the future. You could drop it underwater, toss it from a helicopter, or leave it out in the snow, and it would still fire. It was reliable, accurate, lightweight, and cheaper to produce than Smith and Wesson's revolver. Filled with corporate intrigue, political maneuvering, Hollywood glitz, bloody shoot-outs—and an attempt on Gaston Glock's life by a former lieutenant—Glock is not only the inside account of how Glock the company went about marketing its pistol to police agencies and later the public, but also a compelling chronicle of the evolution of gun culture in America.

**Handbook of Handguns** Jeffrey Strickland, 2013-04-25 In light of the 2nd Amendment debates, shooting may become the national passtime. To act responsibly within the 2nd Amendment, means knowing how to properly bear arms. Knowing involves understanding firearm types, firearm operation, ammunition, internal ballistics, and shooting. These require training, especially shooting. Whether you own or plan to own a handgun for recreation, competition, or self-defense, training is of the utmost importance. When you fire a projectile (bullet) from a firearm, you are responsible for where it goes. You need to understand how fast it travels, how far it can travel, and how accurate your firearm is in delivering the projectile to your intended target. Yes, bearing arms is a right, but not one to be taken lightly. Firing a handgun is a grave responsibility and must be done correctly and with a full understanding of all the components that make up shooting.

**The Browning High-Power Pistol** Leroy Thompson, 2020-04-30 Making its debut in 1935, the Browning High-Power was the world's most widely used military pistol for much of the 20th century. Military and law-enforcement agencies in more than 90 countries have issued the High-Power and it has seen combat in conflicts from World War II through to the 'War on Terror'. After conquering Belgium, Nazi Germany produced more than 300,000 High-Powers for use by the Waffen-SS, Fallschirmjäger and others, and after 1945 the High-Power became standard for most NATO-armed forces as well as scores of others. Chambered for the 9×19mm Luger cartridge, John Browning's High-Power improved on the classic Colt M1911 design, especially in its use of a far simpler takedown system. The pistol's innovative 13-round magazine, designed by Dieudonné Saive, staggered the cartridges for higher capacity without unduly increasing the grip size. During its 82-year production run at Fabrique Nationale (FN) in Belgium, the design evolved slightly, but a 2017 High-Power was still easily recognizable as a descendant of the original model. Packed with gripping material including detailed technical specifications, contemporary photographs and highly accurate artist's renditions, this title is a comprehensive and informative guide to the world's most iconic semi-automatic pistol.

*National Defense* U S Government Accountability Office (G,U. S. Government Accountability Office (, 2013-07 GAO discussed the military's M9 9-millimeter (mm) handguns, focusing on: (1) M9 safety and quality problems; (2) allegations that the Army attempted to cover up the problems; (3) similarities and differences between M9 tested in 1984 and current M9; and (4) the status of recompetition for award of a follow-on procurement contract. GAO found that: (1) the Army contracted to buy 321,260 M9 valued at \$77.3 million; (2) as of August 17, 1988, the Army accepted delivery of 133,830 M9; and (3) M9 have experienced frame cracks, causing the Army to reject about 12,000 and the contractor to implement an engineering change proposal in April 1988 to correct the problem. GAO also found that: (1) M9 had 14 slide failures, causing injuries to four shooters; (2) the contractor believes that the failures resulted from firing incorrect ammunition, but the Army believes that metal fatigue is the primary cause of failure; (3) there was no evidence that the Army attempted to cover up the problem, as it issued a safety message to all M9 users shortly after the first slide failure; and (4) the Army plans to stop delivery of M9 until the contractor corrects the problem. GAO also found that a February 1988 Army report concluded that current M9 met the 1984 requirements and that contract changes have not materially altered their characteristics or configuration or degraded their performance. In addition, GAO found that the Army cancelled the on-going competition for follow-on procurement of 9-mm handguns, began a new competition in May 1988, and expected to award the contract in 1989.
