Flying Boats & Seaplanes Stéphane Nicolaou, 1998 Beginning with races that were staged at elegant French resorts in the early part of the century, flying boats and seaplanes have played an integral part in aviation history. World War I spurred the development of these machines, and by the 1930s, flying boats and seaplanes had become pioneers in transcontinental flight. This photo-filled history recalls the role of flying boats and seaplanes in civil and military aviation history, and the enthusiasm of the engineers and pilots who are associated with their development. In addition to the golden years of hydraviation prior to World War II, author Nicolaou examines the decline of the seaplane, and its subsequent renaissance in nations that are today considered seaplane paradises. The saga is illustrated by more than 200 rare photographs uncovered in archives around the globe.

Soviet Aircraft Industry Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential

part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

Soviet Cruise Missile Submarines of the Cold War Edward Hampshire,2018-07-26 The Soviet Union's cruise missile submarines from the modified Whiskey, to the Oscar II classes were among the most formidable vessels of the Cold War. They were initially designed to carry land attack nuclear-tipped cruise missiles designed to strike targets on the eastern coast of the United States. By the late 1960s, however, submarine-launched ballistic missiles made the nuclear land-attack mission unnecessary, so existing classes were converted to the 'carrier killer' role, armed with anti-ship cruise missiles designed to destroy US super-carriers and other important naval targets. This fully illustrated study examines these powerful machines that were some of the largest and fastest submarines ever built. If war had broken out, they would have been at the forefront of the Soviet Navy's campaign to destroy NATO's sea power and cut America's sea link with Europe.

Soviet Secret Projects Tony Buttler,Yefim Gordon,2004 Among the best-selling aviation titles of recent years have been Midland's Lutwaffe and British Secret Projects series. Soviet secret projects now come under the spotlight. This first volume covers bomber concepts from the various design

bureaus from the 1940s onwards. Many unusual and sophisticated aircraft are featured in these pages, allowing comparisons between what the Soviets were working on and what was being produced in the West during that period.

The Proton Launcher Christian Lardier, Stefan Barensky, 2018-02-15 The Soviet / Russian space program was in the hands of three industrial empires: those of Serguei Korolev, the Soviet von Braun who launched Sputnik-1 and Yuri Gagarin, Vladimir Tchelomei, his main competitor, and Mikhail Yangel, Many launchers and satellites in Ukraine. In 2011, we published a first book on the history of the Soyuz launcher that was developed by Korolev and launched more than 1,800 copies. This time, we tell the story of the Proton, the main competitor of the European launcher Ariane, which was developed by Chelomei and launched more than 400 copies. Finally, the last book of the trilogy will deal with the many developments of Yangel. In the three books, the first part deals with the history of rockets in the USSR / Russia (East) and the second part on the history of their commercialization in the West.
