**Torpedo Bombers, 1900–1950** Jean-Denis Lepage, 2020-01-27 The torpedo-bomber was a very short-lived weapon system, operational for scarcely half a century from just prior WWI to the 1960s. Yet during its brief existence it transformed naval warfare, extending the ship-killing range of ships and coastal defences to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces. The torpedo-bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the Bismarck and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history and the aircraft themselves, including such well-loved types as the Swordfish, Beaufighter and Avenger. Over 300 aircraft are beautifully illustrated.

**International Warbirds** John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, International Warbirds: An Illustrated Guide to World Military Aircraft, 1914–2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

**Soviet Aircraft Industry** Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, Soviet Aircraft Industry examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

**Civil Aircraft Recognition** Paul Eden, 2012-12-21 The perfect guide for spotters and enthusiasts interested in airliners, feederliners, executive jets, light aircraft and other commercial aeroplanes. Contains 3-view silhouettes, colour photographs, dimensions, technical specifications and a potted history of those aircraft most likely to be seen in the skies and at airports. Other helpful details are included to make aircraft identification more certain.

**The Little Book of Aviation** Norman Ferguson, 2013-05-01 The Little Book of Aviation is a collection of facts, figures and interesting stories from the world of flight. Sad, humorous, baffling and astounding stories abound, from the pioneering days of the Wright Brothers to the present day, and covering everything from great milestones, famous names who've served, and the greatest of aircraft icons; phantom pilots and aircraft and a glossary of slang; the origins of plane-spotting and unusual aircraft names; great feats and enduring mysteries; lucky escapes and great aircraft in the movies... the trivia is limitless and will appeal to everyone, whether you want help telling your Spitfire from your Messerschmitt or you know a Spitfire I from a Spitfire II!

**Jet Flying Boats** David Oliver, 2018-03-15 In this book, aviation historian David Oliver covers the little-known flying-boat legacy of the Second World War.

**A Compendium of Armaments and Military Hardware (Routledge Revivals)** Christopher Chant, 2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Monino Museum Moscow Ken Duffey, 2013-06-19 One of the premier collections of Soviet and Russian aircraft, the Monino museum opened in 1960 and covers an area of about 20 hectares. It has on display more than 173 aircraft and 127 aero engines, with 44 of its exhibits having been declared as monuments of science and technology. The Monino museum charts the history of Soviet and Russian aviation from the earliest pre-revolutionary days until the present time, with exhibits in the form of models, artefacts, posters, aero engines, weapons etc., as well as airframes, ejection seats, rockets covering the later period. This book describes and illustrates all the exhibits on display in this amazing museum. It serves as a guide for those visiting Monino, and a mouth-watering taste for those unable to get there in person!

**Flying Boats & Amphibians Since 1945** David Oliver, 1987 The development of compact, reliable and economical turbo-prop engines in recent years has given the flying boat and amphibian a new lease of life, not only by extending the lives of some types by replacing existing piston engines, but also by encouraging new designs that

are able to compete favourably with landplanes in terms of economy while retaining their unique ability to land on water if and when necessary.

Scarecrow Returns Matthew Reilly, 2012-01-03 Pitted against a secretive terrorist group that has seized control of an island in the Arctic, Marine captain Shane Schofield and his crew are ordered by the president to stop the organization's zealous plot to destroy the planet.

**Stalking the Red Bear** Peter Sasgen, 2009-03-17 Thrilling submarine espionage and an inside look at the U.S. Navy's silent service *Stalking the Red Bear*, for the first time ever, describes the action principally from the perspective of a commanding officer of a nuclear submarine during the Cold War -- the one man aboard a sub who makes the critical decisions -- taking readers closer to the Soviet target than any work on submarine espionage has ever done before. This is the untold story of a covert submarine espionage operation against the Soviet Union during the Cold War as experienced by the Commanding Officer of an active submarine. Few individuals outside the intelligence and submarine communities knew anything about these top-secret missions. Cloaking itself in virtual invisibility to avoid detection, the USS *Blackfin* went sub vs. sub deep within Soviet-controlled waters north of the Arctic Circle, where the risks were extraordinarily high and anything could happen. Readers will know what it was like to carry out a covert mission aboard a nuke and experience the sights, sounds, and dangers unique to submarining.

Anti-Aircraft Artillery in Combat, 1950–1972 Mandeep Singh, 2020-04-30 Anti-aircraft artillery was extensively used in combat in the First World War, though such weapons had made their debut in the Franco-Prussian War in 1870, when the besieged French used balloons for observation and communication and the Prussians used the first custom built 1-pounder gun to try and shoot them down. It was, however, not until the Second World War that anti-aircraft artillery came into prominence, shooting down more aircraft than any other weapon and seriously degrading the conduct of air operations. In the battle between the attackers and anti-aircraft artillery, the latter had the upper hand when the war ended. The post-war years saw a decline in anti-aircraft artillery as peace prevailed, and the advent of the jet aircraft seemed to tilt the balance in favour of the aircraft as they flew faster and higher, seemingly beyond the reach of anti-aircraft artillery. It would take all the hi-tech equipment and the guile and cunning that anti-aircraft artillery could muster to try and reclaim pole position. It is that story, of the tug of war between the aircraft and artillery, that forms the narrative of this book – as it traces the history of combat employment of anti-aircraft artillery from the Korean War, in effect the first Jet Age war, to the War of Attrition between Arab states and Israel when the missiles came of age, sending the aircraft scurrying for cover. *Anti-Aircraft Artillery in Combat, 1950–1972* is the first attempt to look at the combat performance of ground-based air defences, incorporating the views, analyses and experiences of Soviet, Arab and South Asian Armies. The book looks at the major wars between 1950 and 1972, including the Korean War, Vietnam War, the wars in South Asia in 1965 and 1971, and conflicts in the Middle East, such as the Six Day War.
