### **The Gods' Machines** Wun Chok Bong, 2008-05-27

Based on the author's decipherment of prehistoric carvings and the application of mathematical measurements, *The Gods' Machines* shows how "unknown" phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy. The book traces the development of that civilization on Earth over 5,000 years, revealing how all these structures are aligned according to a universal formula: an angle of 135 degrees at which Earth's energy has been tapped by the alien creators of these monuments. These fascinating theories not only explain our distant past, but also open the door to a future of power technology and space travel. Megalithic sites such as Newgrange and Stonehenge are constructed with quartz- and iron-rich stones with electrical conduction properties – minerals also found atop Aztec temple and inside crop circles. These stones, according to the author, served as dry cell batteries when heated and stressed, and supplied energy to the builders' traveling vehicles. Most interestingly, the author has tested his theory on today's crop circles. *The Gods' Machines* is certain to stimulate debate among readers interested in alternative history, ancient civilization, and extraterrestrial intelligence.

*Harmony and Symmetry. Celestial regularities shaping human culture.* Gudrun

Wolfschmidt, 2020-12-29 For the SEAC conference in Graz (2018) and for the Proceedings the motto

Harmony and symmetry - celestial regularities shaping human culture was chosen. There were at least two strong reasons for this motto: First, the connection between astronomy and human culture has an extremely long tradition, and one of its absolute high points is the astronomer Johannes Kepler, who spent his entire life searching for the relationship between the movement of heavenly lights and ideas about harmonious structures and regular bodies. Kepler started his scientific career and authored his first book, the *Mysterium cosmographicum*, in Graz. Kepler argued in his first publication for the twelve-fold partition of the zodiac with arguments derived from the monochord, anticipating the procedure he developed in his *Harmonices mundi*. Five contributions deal with Kepler, including the harmony in musical theory. The second reason was the Eggenberg Castle. This palace, built for the nobleman Hans Ulrich von Eggenberg (1568-1634), is a remarkable piece of symmetry and harmony and an outstanding example of a strong connection between astronomy and culture. Seven contributions have the topic astronomy, astrology and architecture with the emphasis on astronomical orientation, symmetry and harmony in the Middle Ages and Renaissance. The Proceedings with ten chapters and 44 contributions range besides the mentioned Middle Ages and beyond and Johannes Kepler from Prehistoric Times, Bronze and Iron Age, Mythology and Ethnoastronomy, Babylonian Astronomy, Greek and Roman Astronomy, Meso- and South America, Middle East and Eastern Asia and Computational Astronomy. The celestial sphere, regarded as the sky of astronomy, as well

as the heaven of divine numina, from Antiquity to Copernicus and Kepler was equated with symmetry, harmony, and beauty. Until today, this has been reflected in the structure of cultural creations, from architectural objects to musical forms.

History's Mysteries Brian Haughton, 2010-04-20  
History's Mysteries is an absorbing and meticulously researched exploration of the archaeology, history, and mysteries of 35 ancient places worldwide. Haughton's book takes the reader on an unforgettable journey, from the 8,000-year-old stone circle of Nabta Playa to India's magical Taj Mahal; from Rhode Island's controversial Newport Tower to the enigmatic Royston Cave in the UK; from the strange medieval castle-village of Rennes-le-Château to the massive ancient walled city of Great Zimbabwe. Using the latest archaeological evidence, History's Mysteries explores: The incredible archaeological discoveries at the 11,000 year-old sanctuary of Göbekli Tepe in Turkey. The heated debate over the 47-million-year-old 'Ida Fossil'—could it be the missing link in our evolutionary history? The reality behind controversial ancient artifacts such as the Iron Pillar of Delhi, the Oak Island Treasure, and Egypt's "Dendera Lamps." What really happened to the Neanderthals? With 36 photographs and illustrations, this is the perfect reference work for those fascinated by the great mysteries of ancient history.

#### Rhapsody of Northern Art Peter

Hupfaut, 2019-01-23 Rhapsody of Northern Art presents fascinating artefacts produced between the late Bronze Age and the start of the Romanesque Period. Ancient objects from Northern Europe, exhibited in museums, are usually appreciated as documenting the past and reflecting its society. The people viewing these objects are able to become aware of skills and techniques that were applied many generations ago. However, a number of such objects should certainly be regarded more as works of fine art. Since the early 20th century, artists such as Duchamp have created "object art" and installations from contemporary artists often show art of a quality

similar to that of some ancient Central and Northern European cultures. This book will serve to help and encourage readers to see and appreciate Bronze Age and early Medieval artefacts of Central and Northern Europe in the way they do works of art created by internationally well-known contemporary artists.

Our Moon Rebecca Boyle, 2024-01-16 NATIONAL BESTSELLER • “A riveting feat of science writing that recasts that most familiar of celestial objects into something eerily extraordinary, pivotal to our history, and awesome in the original sense of the word.”—Ed Yong, New York Times bestselling author of *An Immense World* A New York Times Book Review Editors’ Choice Many of us know that the Moon pulls on our oceans, driving the tides, but did you know that it smells like gunpowder? Or that it was essential to the development of science and religion? Acclaimed journalist Rebecca Boyle takes readers on a dazzling tour to reveal the intimate role that our 4.51-billion-year-old companion has played in our biological and cultural evolution. Our Moon’s gravity stabilized Earth’s orbit—and its climate. It drew nutrients to the surface of the primordial ocean, where they fostered the evolution of complex life. The Moon continues to influence animal migration and reproduction, plants’ movements, and, possibly, the flow of the very blood in our veins. While the Sun helped prehistoric hunters and gatherers mark daily time, early civilizations used the phases of the Moon to count months and years, allowing them to plan farther ahead. Mesopotamian priests recorded the

Moon's position in order to make predictions, and, in the process, created the earliest known empirical, scientific observations. In *Our Moon*, Boyle introduces us to ancient astronomers and major figures of the scientific revolution, including Johannes Kepler and his influential lunar science fiction. Our relationship to the Moon changed when Apollo astronauts landed on it in 1969, and it's about to change again. As governments and billionaires aim to turn a profit from its resources, Rebecca Boyle shows us that the Moon belongs to everybody, and nobody at all.

#### The Institutional Dictionary of Astronism

Cometan, 2021-03-21 The Institutional Dictionary of Astronism is the cumulation of receptions between Cometan and the astronomical world during the Founding era (2013-2021). The publication of this very first full-length Institutional Dictionary of Astronism represents eight years of the development of Astronism from its inception to how it stands today in 2021. The publication of this dictionary also encapsulates Astronism exactly as it exists now and how Cometan conceives it by the end of the Founding era. This dictionary and its contents capture what Astronism is now for posterity to look back on how this astronomical belief system will change as time progresses. Many of the words and definitions of this dictionary will alter as we enter the Establishment era and Astronism continues its progression in becoming world religion. However, what will not ever change is Cometan's absolute devotion to the stars of the night sky and his discovery of their secrets through his receptions, personal inspirations, and

his overall relationship with The Great Cosmos. Covering all the major Astronist beliefs, practices, cultural elements, theories, branches of study, and historical events, A Dictionary of Astronism, also known as the Institutional Dictionary of Astronism, is published by the Astronist Institution through its subsidiary, Astral Publishing, to commemorate the end of the era of The Founding of Astronism. The Founding of Astronism began exactly eight years on 1st July 2013 which sparked Cometan's ideations and indrudies and which afforded him the insight, knowledge, and vision to found a new religious movement, philosophy, spirituality and political ideology. As The Founding of Astronism, also simply known as the Founding era, comes to an end, the Astronist Institution wants to acknowledge the fundamental importance of this year period of the history of Astronism and to the wider history of religion, philosophy and spirituality as a whole. The Dictionary of Astronism immortalises that commemorative spirit by providing thousands of definition entries of Astronist terms that have been authorised by Astronist Institution scholars for dissemination worldwide. This dictionary captures the most up-to-date understanding of what Astronism is and how it as a whole and its component parts should be defined. Enjoy this dictionary that emblematises Astronism and how this new religion has so far developed.
