A Companion to Yi jing Numerology and Cosmology Bent Nielsen,2013-04-15

Translations of the Yi jing into western languages have been biased towards the yili ('meaning and pattern') tradition, whereas studies of the xiangshu ('image and number') tradition - which takes as its point of departure the imagery and numerology associated with divination and its hexagrams, trigrams, lines, and related charts and diagrams - has remained relatively unexplored. This major new reference work is organised as a Chinese-English encyclopedia, arranged alphabetically according to the pinyin romanisation, with Chinese characters appended. A character index as well as an English index is included. The entries are of two kinds: technical terms and various other concepts related to the 'image and number' tradition, and bio-bibliographical information on Chinese Yi jing scholars. Each entry in the former category has a brief explanation that includes references to the origins of the term, cross-references, and a reference to an entry giving a more comprehensive treatment of the subject.

Biliary Tract Radiology Plinio Rossi, M. Bezzi, 2012-12-06 This book, edited by Prof. PLINIO ROSSI, an internationally well-known expert in biliary tract radiology, provides in 31 chapters a very comprehensive update on both diagnostic and therapeutic radiology of the biliary tract. First, a very complete and interesting overview of the normal morphology of the anatomical area is presented by an anatomist, a radiologist, and a surgeon. This is followed by a discussion not only of the well-known and accepted imaging modalities, but also of the newer ones such as, magnetic resonance imaging and endoluminal and laparoscopic ultrasound. The book thus illustrates very nicely the diversity of diagnostic radiological techniques that are currently available. Considerable technical progress and remarkable new insights in biliary tract radiology have been achieved in the field of the radiological interventional approach during recent years. Therefore, much emphasis has been placed in this book on the therapeutic possibilities of the radiologist using the percutaneous minimally invasive approach for the treatment of the various pathological conditions of the biliary tract. It is most impressive to note the substantial progress in terms of patient comfort achieved by using the percutaneous as compared to the surgical methods. These new methods also result in shorter hospitalization times and thereby help to reduce health care costs. This book provides the interested reader with a fascinating and very complete overview of these new procedures.

The book details for physicians the diagnostic and therapeutic decision making process for dealing with such problems as incidental tumors in the liver transplant, the role of neo-adjuvant chemotherapy, intra-arterial vs intravenous therapy, the uses of embolization, and the significance of portal vein thrombus. New chapters discuss the introduction into clinical practice of cell cycle growth inhibitors, an expanded knowledge of Genomics and Proteomics, and novel ways of delivering intra-hepatic chemotherapy. Life Confucianism as A New Philosophy Huang Yushun, Li Xuening, Yushun Huang, 2020-07-19 Life itself has long gone unnoticed in Confucian texts since the Qin and Han dynasties, which is similar to the forgetting of Being, per se, in the Western philosophy after the Axial Period, according to Heidegger. Today, there is a philosophical mission to return life to Confucianism, restoring and reconstructing Confucianism in the perspective of a comparison between Confucianism and Husserl's Phenomenology. The author reduces the features of life to the essence of a thing but returns to life as the essence of Being. The author rejects the idea of post-philosophy in order to reconstruct the metaphysical and the post-metaphysical gradations of Confucianism. These gradations are made along three strata in the life of human beings-no-being of anything (a life comprehension), metaphysical thinghood (the absolute Being), and post-metaphysical things (the relative beings). In this way we have a full understanding of the idea of Confucianism.

Even if she had to helplessly watch her beloved marry someone else, she would still be able to smile and offer her blessings. But why couldn't such a simple wish be fulfilled? What went wrong?
