Mechademia 3 Frenchy Lunning, 2014-11-01 Dramatic advances in genetics, cloning, robotics, and nanotechnology have given rise to both hopes and fears about how technology might transform humanity. As the possibility of a posthuman future becomes increasingly likely, debates about how to interpret or shape this future abound. In Japan, anime and manga artists have for decades been imagining the contours of posthumanity, creating dazzling and sometimes disturbing works of art that envision a variety of human/nonhuman hybrids: biological/mechanical, human/animal, and human/monster. Anime and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human. Limits of the Human—the third volume in the Mechademia series—maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity's new potentialities and limits. Through a wide range of texts—the folklore-inspired monsters that populate Mizuki Shigeru's manga; Japan's Gothic Lolita subculture; Tezuka Osamu's original cyborg hero, Atom, and his manga version of Fritz Lang's Metropolis (along with Ôtomo Katsuhiro's 2001 anime film adaptation); the robot anime, Gundam; and the notion of the uncanny in Ghost in the Shell 2: Innocence, among others—the essays in this volume reject simple human/nonhuman dichotomies and instead encourage a provocative rethinking of the definitions of humanity along entirely unexpected frontiers. Contributors: William L. Benzon, Lawrence Bird, Christopher Bolton, Steven T. Brown, Joshua Paul Dale, Michael Dylan Foster, Crispin Freeman, Marc Hairston, Paul Jackson, Thomas LaMarre, Antonia Levi, Margherita Long, Laura Miller, Hajime Nakatani, Susan Napier, Natsume Fusanosuke, Sharalyn Orbaugh, Ôtsuka Eiji, Adèle-Elise Prévost and MUSEbasement; Teri Silvio, Takayuki Tatsumi, Mark C. Pago Pago Tango John Enright, 2023-08-29 First in a Samoan-set series featuring police officer Apelu Soifua: "Enright's portrait of cultural collision is the heart of this engaging series debut." —Booklist The city of Tafuna may be located on a tropical paradise, but it's no stranger to crime. Just like anywhere else in the world, it has its fair share of murder, drugs, and robbery. Which makes Apelu Soifua the perfect man for his job. He's a cop of two worlds: San Francisco, where he started his career, and now his native Samoa. Following up on a routine burglary call, Apelu heads to a palangi, or Caucasian, neighborhood. The victim, a VP at SeaKing Tuna—the largest employer on the island—reports only a few items missing. But a fatal shooting at a nightclub a few days later points Apelu to the executive's hard-partying daughter. With some help from local reporter Lupe, Apelu chases a wave of violence that stems from the burglary—and seeks out what really went missing. The investigation puts Apelu in over his head and is about to be dragged under . . . "Perfect for any armchair traveling mystery lover. Enright's descriptions of the Samoan landscape—where the frigate birds are as much a part of the sky as the clouds—are vivid and poetic." —Kittling: Books "Enright meticulously interweaves the experience and landscapes of Samoa's mountains, rain forests and jungles that he knows so well." —Providence Journal "The island setting is a terrific backdrop for the story, one that has Soifua bridging the cultural chasm between the local population and the American community." —Mysterious Reviews

Doctor Fau's Temptation David Mendes-Nassi, 2021-11-17 I believe there is one temptation that the Genius Doctor Fau will not be able to withstand, said Grandpa Co, You must share great honor with him, and gently offer him the chance to study the basis of life of our nation, the viruses, the first nation ever to be involved in the amazing idea of the Creation when it created the beginnings of life. You will not believe who is on the phone, said Mrs. Fau to her husband, Try to imagine Bin Laden calling President Bush. Doctor Fau listened attentively. He had devoted about two years to fighting the Corona family as the advisor of a few of the presidents of America, he brought them to significant achievements but was still far from reaching a solution. Even the finest Human scientists' ingenious methods of vaccination' were only lasting for a limited period of time and losing their power within a few months. And worst of all, the virus family was breaking every record with the variety of variants it created so casually. As he listened to Vi-ri, the Genius's paced breaths became more rapid as her offer became clearer. Vi-ri's plan was spectacular and attractive. She proposed that together they plan and construct a model that would immunize Human Beings not only against the Corona family, but against the entire viral nation, by defining the RNA core. , , , , , . , . , ? ? - . - , . , . , , . -2 , , ? -2 - , . . , . . , , , , , . .
